PART I.—NOUNS, ADJECTIVES, PRONOUNS, ADVERBS, PREPOSITIONS, AND CONJUNCTIONS

CHAPTER I.—HOW TO TELL THE PARTS OF SPEECH

- 1. How to tell the Parts of Speech.—To find out the "Part of Speech" to which a word belongs, ask yourself, "What kind of work does the word do in the sentence before me? What part does it play in helping to make the sentence?"
- (1) If a word gives a name to some individual person or thing or to some kind of person or thing, the word is a Noun:—

James saw an apple fall to the ground.

Here "James" is the name of some person. "Apple" is the name of a kind of fruit. "Ground" is a name given to the piece of earth on which the apple fell. So James, apple, and ground are all nouns.

"Noun" and "name" mean the same thing. "Noun" is of Latin origin (nomen). "Name" is of Anglo-Saxon origin

(nama).'

(2) If a word refers to some person or thing without giving a name to the person or thing referred to, the word is a **Pronoun**. (If it gives a name to some person or thing, it is of course a Noun, not a Pronoun. Herein lies

3E A 2

PART 1

the essential difference between the one part of speech and the other.)

You and he came here a week before me.

Here "you" refers to the person spoken to without naming him; "he" refers to some person spoken of, whose name has been mentioned in a previous sentence; "me" refers to the person speaking without naming him. So all these words are pronouns.

The word "pronoun" means "for (Latin pro) a noun"; i.e. a word used instead of a noun, or as a substitute for a noun.

(3) If a word adds to the meaning of a noun so as to show more clearly what person or thing the noun is meant to stand for, the word is an Adjective:—

This house. A noble character. A white brick.

The word "this" points out the house to which the writer or speaker alludes. The word "noble" shows what sort of character is meant. The word "white" describes one quality of the brick, namely, its colour. So all these words are adjectives. Each of them qualifies (i.e. adds something to the meaning of) the noun to which it is attached.

The word "adjective" (Latin adjectivum) implies addition: a word is added to a noun or pronoun in order to add to its meaning.

(4) If a word says something (i.e. makes some statement, or expresses some command, or asks some question) about a person or thing, the word is a Verb:—

The bird has flown. Has the bird flown? Go away.

In the first of these sentences "has flown" makes a statement about the bird. In the second it asks a question about it. "Has flown" is therefore a verb in either case. In the third sentence "go" expresses a command; therefore it is a verb.

The word "verb" is from Latin verbum, which means literally "word." It is called the word by way of distinction, because it is the most important kind of word in human speech.

(5) If a word expresses some relation between two

persons or things 1 (i.e. shows what the one has to do with the other), the word is a **Preposition**:—

A bird in the hand.

Here the word "in" shows what the hand has to do with the bird, or the bird with the hand. The bird might be above the hand, or under the hand, or away from the hand, or somewhere near the hand, or in the hand. The noun or pronoun before which the preposition is placed is said to be its **Object**.

The word "preposition" means "placed before" (Latin prae-before, and positus, placed); i.e. placed before the noun or

pronoun that is called its Object.

- (6) If a word *joins* one sentence to another so as to make a larger sentence, or if it *joins* one part of speech to another of the same or a similar kind, the word is a Conjunction:—
 - (a) The thief was caught, but the money was lost.
 - (b) James and I went out for a walk.

In (a) the second sentence (the money was lost) is joined to the first (the thief was caught) by the word but. In (b) the pronoun "I" is joined to the noun "James" by the conjunction and.

The word "conjunction" (from Latin con and jung-ere, junction-em) means the act of joining together or the thing that joins.

- (7) If a word adds to the meaning of some verb, adjective, preposition, or conjunction, the word is an Adverb:—
 - (a) A snake moves silently in the grass.
 - (b) The air is remarkably cool.
 - (c) He swam half across the channel.
 - (d) He was despised, merely because he was poor.
 - (e) He walks very slowly.

In (a) the adverb "silently" qualifies (i.e. adds to the meaning of) the verb "moves." In (b) "remarkably" qualifies the adjective "cool." In (c) "half" qualifies the preposition

¹ It is not correct to say that "a Preposition is a word used with a noun or pronoun to show its relation to some other word in the sentence." According to this definition "A bird in the hand" does not mean that a bird is in the hand, but that the noun "bird" is in the noun "hand." The relation expressed by a Preposition is not between words, but between the things denoted by words.

"across." In (d) "merely" qualifies the conjunction "because."

In (e) "very" qualifies the adverb "slowly."

"Adverb" means "added to a verb" (Lat. ad verbum). This is the main work of adverbs; but they are now used to qualify not only verbs, but adjectives, prepositions, conjunctions, and other adverbs,—in fact, any part of speech except a noun or pronoun.

- 2. The Same Word in different Parts of Speech.—Until we see a word in a sentence, we cannot say what kind of work it does in the sentence; and until we know this, we are often unable to say to what part of speech it belongs; for the same word may do one kind of work in one sentence, and another in another. The form that a word may have is often no guide at all; but the work that a word does is an unfailing guide. Take the following examples:—
 - (a) The man has come. Man the lifeboat.

Here the first "man" is a noun, because it gives a name to a kind of animal or living thing. The second is a verb, because it says something to some one, i.e. it expresses an order.

(b) Bring me some water. Look at that water bird.

Here the first "water" is a noun, because it gives a name to a certain kind of thing. The second is an adjective, or rather noun used as an adjective, because it adds to the meaning of the noun "bird" by showing what kind of bird is meant.

(c) He hopes for pardon; for he knew no better.

Here the first "for" is a preposition, because it shows the *relation* between the act expressed by *pardon* and the feeling expressed by *hope*. The second is a conjunction, because it *joins* the sentence "he knew no better" to the sentence "he hopes for pardon."

(d) This is a long journey; we have long been travelling; and I long for rest.

Here the first "long" is an adjective, because it qualifies the noun "journey." The second is an adverb, because it qualifies the verb "have been travelling." The third is a verb, because it says something about the person denoted by "I."

- 3. The Parts of Speech defined.—From the account that has now been given, the parts of speech may be defined thus:—
- (1) A **noun** is a word used for *naming* some person or thing.

(2) A **pronoun** is a word used *instead of* a noun or noun-equivalent.

(3) An adjective is a word used for qualifying a noun or pronoun.

(4) A verb is a word used for saying something about a person or thing (such as making a statement, asking a question, or giving an order).

(5) A preposition is a word used for showing what one

person or thing has to do with another person or thing.

(6) A conjunction is a word used for *joining* one sentence to another sentence, or one word to another word of the same or similar part of speech.

(7) An adverb is a word used for qualifying any kind of

word except a noun or pronoun.

4. Interjection.—To the seven parts of speech already named one more must be added to make the list complete, viz. the Interjection. So there are altogether eight parts

of speech.

An interjection is unlike all the rest, because it does nothing in the sentence, i.e. it does not help to make the sentence as the other seven do. If it happens to occur in the middle of a sentence, it is not connected with any word either before or after. Sometimes it does not occur in any sentence, but stands quite alone.

Oh! ah! pooh! alas! fie!

These are merely exclamatory sounds intended to express some feeling of the mind. The word "interjection" (Latin inter, "amongst," and jactus, "thrown") means a word or sound "thrown into" a sentence, but forming no part of its construction, i.e. not contributing to the materials of which the sentence is built.

If we cut out the word "alas," what remains makes quite as perfect a sentence as the original. Every other word does something to some other word or words. Thus my qualifies the noun son; the noun son is the subject of the verb is; is is the verb of the sentence, having son for its subject; dangerously is an adverb qualifying the adjective ill; ill goes with the verb is, and completes what the verb left unsaid. But the word alas goes with nothing, and can be cut out without altering or damaging the structure of the sentence.

4a. Inflexion or Change of Form.—Inflexion is a variation in the form of a word to mark a variation in its use. Among the eight Parts of Speech, there are three, viz. Prepositions, Conjunctions, and Interjections, that are not subject to inflexion or change of form. Adjectives have no inflexion except in the plurals these and those and in forming the degrees of comparison. Adverbs have no inflexion except in forming degrees of comparison. So the only Parts of Speech that are frequently subject to inflexion or change of form are Nouns, Pronouns, and Verbs.

CHAPTER II.—FORMS AND KINDS OF NOUNS

SECTION 1.—NUMBER

5. Singular and Plural.—When you speak of one thing at a time, the noun that you use is in the Singular number; as "a cow."

When you speak of more than one thing at a time, the noun that you use is in the Plural number; as "cows."

- 6. How Plurals are formed.—The main rules are-
- (i) Add s to the Singular. This is the general rule.

(-)	8		
Singular.	Plural.	Singular.	Plural.
Cow	cows	Town	towns
Boy	boys	Star	stars
Bird	birds	Flea	fleas

(ii) Add es to the Singular, if you find that you cannot pronounce the s without the help of e:—

Singular.	Plural.	Singular.	Plural.
Glass	glass-es	Brush	brush-es
Box	box-es	Branch	branch-es
Kiss	kiss-es	Porch	porch-es

Note.—If the Singular ends with a silent e, the e is dropped before the es of the Plural:—

Singular.	Plural.	Singular.	Plural.
House	hous-es	Size	siz-es
Page	pag-es	Bridge	bridg-es
Face	fac-es	Nose	nos-es
Cause	caus-es	Horse	hors-es

(iii) If the Singular ends in y, and the y is preceded by a consonant, change y into ies:—

Singular.	Plural.	Singular.	Plural.
Fly	flies	Army	armies
Cry	cries	Penny	∫ pennies
Duty	duties	Lenny	\ pence

Note.—If the Singular ends in ay, ey, or oy (i.e. if the y is preceded by a vowel, and not by a consonant), simply add s and make no change in the y:—

Singular.	Plural.	Singular.	Plural.
Day	days	Ray	rays
Boy	boys	Monkey	monkeys

(iv) If the Singular ends in f or fe, change the f or fe into ves:—

Singular.	Plural.	Singular.	Plural.
Wife	wives	Loaf	loaves
Wolf	wolves	Thief	thieves

Note.—But there are at least fourteen Singular nouns ending in f or fe, which form the Plural by simply adding s to the Singular. Some of these, however, viz. hoof, staff, scarf, turf, and wharf, sometimes form the Plural in ves.

Singular.	Plural.	Singular.	Plural.
Chief	chiefs	Proof	proofs
Roof	roofs	Strife	strifes
Hoof	hoofs, hooves	Fife	fifes

Singular.	Plural.	Singular.	Plural.
Turf	turfs, turves	Reef	reefs
Dwarf	dwarfs	Searf	scarfs, sc rves
Gulf	gulfs	Wharf	wharfs, wharves
Grief	griefs	Staff	staffs, staves

(v) If the Singular ends in o, and the o is preceded by a consonant, add es, not s, to the Singular:-

Singular.	Plural.	Singular.	Plural.
Cargo	cargoes	Volcano	volcanoes
Hero	heroes	Potato	potatoes
Buffalo	buffaloes	Echo	echoes
Motto	mottoes	Negro	negroes

Note 1.—The following are exceptions:—grotto, grottos; halo, halos; memento, mementos; proviso, provisos; tiro, tiros; piano, pianos; canto, cantos; solo, solos. No reason can be given to justify this troublesome distinction.

Note 2.—If the o is preceded by a vowel, the Plural is formed by simply adding s to the singular, as :- folio, folios ; cameo, cameos.

(vi) If the noun is a compound word, i.e. a word formed by the union of two or more words into one, change the Singular of the principal word into a Plural:

Singular.	Plural.	Singular.	Plural.
Court-martial	courts-martial	Maid-servant	maid-servants
Son-in-law	sons-in-law	Foot-man	foot-men
Step-son	step-sons	Hanger-on	hangers-on
Man-of-war	men-of-war	Maid-of-	maids-of-
		honour	honour

Note 1.—Examples of double Plurals:—man-servant, menservants; lord-justice, lords-justices; Knight-Templar, Knights-Templars.

Note 2.-In words like spoonful, compounded of spoon and full, the Plural is formed by simply adding s to the end of the word. The word, although it is a compound, is treated as if it were a single word; as spoonful, spoonfuls; handful, handfuls.

7. Exceptional Plurals.

(i) There are eight nouns that form the Plural by changing the inside vowel of the Singular :-

Hingular.	Plural.	Singular.	Plural.
Man	men	Goose	деене
Woman	women	Tooth	teeth
Foot	feset	Mouse	mice
Louise	lico	Dormouse	dormic

(ii) There are four nouns, that make the Plural terminate in en or ne:

Singular.	Plural.	Singular.	Plural.
Ox	oxen	Child	children
Cow	kine (or	Brother	brethren (or
	cown)		brothers)

(iii) There are a few nouns that have the same form for the Plural as for the Singular:

Hingular.	Plural.	Singular.	Plural.
Deer	deer	Trout	trout
Sheep	sheep	Cod	cod
Eish	fish	Brace	brace
Swine	swine	Dozen	dozen
Grouse	grouse	Score	score
Salmon	salmon	Stone	stone
			(weight

(iv) Some nouns have no Singular :-

Annals	Gallows	Pincers	Victuals
Bellows	Statistics	Scissors	Tidings
Tongs	Suds	Shambles	News
Shears	Nuptials	Thanks	Means

In spite of the Plural form we say, "By this means," "This news is not true."

Note.—A noun like "earth," "sun," etc., has no Plural, because in nature there is only one earth and only one sun.

Further particulars regarding exceptional Plurals are given below in Chapter XXXIV. These can be studied later on.

Exercise 1

In the following exercises—(1) pick out all the nouns; (2) say whether each noun is Singular or Plural as it stands; (3) change every Plural into a Singular, and every Singular into a Plural:—

- 1. There are many cities in England, many smaller towns, and an immense number of villages.
 - 2. A cat and a dog are seldom good friends.
 - 3. The earth turns round once in one day and one night.

4. When the cat is away, the mice play.

- 5. The branch of that tree has leaves of a bright green colour.
- 6. The cries of animals are many and various: a horse neighs; a dog barks; a cat mews; a swine or pig grunts; an elephant trumpets; an ass brays; an ox lows; a monkey chatters; a goose cackles; a boy laughs or weeps; a fish is silent.

7. If we stop in this wood, we shall be lost. So let us get back into the public road, before night comes on.

- 8. The wolf living in that forest killed many calves.
- 9. Some thieves broke into the house of my friend.
- 10. The stars are seen through the leaves and branches of that oak-tree.
- 11. He went out fishing for salmon, and caught two dozen and more in his net, besides some trout to the number of two or three score.
- 12. Sheep cannot run as fast as deer; and so the sheep were caught first by the wolves.
 - 13. The cat has caught two mice and one rat to-day.

14. Oxen are of more value than deer to a farmer.

- 15. The feet of men are larger than those of women; but the teeth are about the same in size.
- 16. The sun's light is brighter than the moon's; but the moon's rays are not so hot as those of the sun.
- 17. Joseph had eleven brethren, who sold him as a slave to some merchants on their way to Egypt.
 - 18. A valley is usually hotter than the top of a hill.
 - 19. He is a big man, and weighs fourteen stone.

SECTION 2.—GENDER

8. The Genders.—A noun that denotes a male is of the Masculine gender; one that denotes a female is of the Feminine gender; one that denotes either sex is of the Common gender; one that denotes neither sex, that is, something without life, is of the Neuter gender.

So the genders of Nouns are four in number :-

- 1. Masculine-males.
- 3. Common—either sex.
- 2. Feminine-females.
- 4. Neuter-neither sex.

Note. In Old English the gender of a noun was indicated by its form. In Modern English it has become entirely a matter of sex or the absence of sex. This is not gender in the grammatical sense of the term.

9. Masculine and Feminine.— These are distinguished in three different ways:—

	1. By a Ch	ange of Word	
Masc.	Fem.	Masc.	Fem.
TO 1 1	∫ spinster	Gander	goose
Bachelor	maid	Gentleman	lady
Boar	BOW	Hart	froe
Boy	girl	nare	hind
Brother	sister	Horse	mare
Buck	doe	Husband	wife
Bull	cow	King	queen
Bullock (heifer	Lord	lady
Steer 5	nener	Man	woman
Cock	hen	Milter	spawner '
Colt	filly	Nephew	niece
Dom	∫ bitch	Ram	ewe
Dog	alut	Sir	madam
Drake	duck	Sire	dam
Drone	bee	Sloven	slut
Earl	countess	Son	daughter
Father	mother	Stag	hind
Friar)	*****	Uncle	aunt
Monk)	nun	Viceroy	vicereine
Gaffer	gammer		

2. By a Change of Ending

Masc.	Fem.	Masc.	Fem.
Abbot	abbess	Emperor	empress
Actor	actress	Founder	foundress
Adventurer	adventuress	Giant	giantess
Author	authoress	God	goddess
Conductor	conductress	Governor	governess
Duke	duchess	Heir	heiress

Masc.	Fem.	Masc.	Fem.
Host	hostess	Priest	priestess
Hunter	huntress	Prince	princess
Lad	lass	Prophet	prophetess
Lion	lioness	Shepherd	shepherdess
Manager	manageress	Songster	songstress
Marquis	marchioness	Seamster	seamstress
Master	mistress	Steward	stewardess
Mayor	mayoress	Tiger	tigress
Murderer	murderess	Traitor	traitress
Negro	negress	Viscount	viscountess
Ogre	ogress	Votary	votaress
Patron	patroness	Waiter	waitress
Poet	poetess		

Note.—In the word laundress we have an example of a feminine form to which there is now no corresponding masculine.

Peculiar Changes of Ending

Masc.	Fem.	Masc.	Fem.
Czar	Czarina	Sultan	sultana
Executor	executrix	Testator	testatrix
Fox	vixen	Widower	widow
Hero	heroine	Wizard	witch
Spinner	spinster		

3. By placing a Word before or after

Masc.	Fem.
He-goat	she-goat
Land-lord	land-lady
Man-servant	maid-servant
Grand-father	grand-mother
Bride-groom	bride
Great-uncle	great-aunt
Pea-cock	pea-hen
Cock-sparrow	hen-sparrow

Examples of Nouns in the Common gender

Parent Monarch Relation Person Friend Pupil Enemy Orphan Consin Pig Bird Sheep Elephant Fowl Child Camel Deer Calf Foal Baby Infant Student Servant Teacher

SECTION 3.—CASE

10.—Five Cases.—" Case" depends (1) upon the change of ending that a noun or pronoun incurs according to the purpose for which it is used in a sentence; (2) if there is no change of ending, upon the grammatical relation in which the noun or pronoun stands to some other word in the same sentence.

There are five Cases in English—(1) the Nominative, (2) the Vocative, (3) the Accusative, (4) the Genitive, (5) the Dative.

Pronoun. He, her, him. Noun. Man, man's, man.

In some pronouns the Accusative Case has a distinct form, as in Nom. he, Acc. him. But in nouns the only Case distinguished by a change of form is the Genitive, as man's. In such words the form of the Accusative and Dative is the same as that of the Nominative, and hence the difference between Nom. and Acc. and Dat. depends solely upon grammatical relation.

11. Genitive.—This is formed by adding 's (called a-pos-tro-phe s) to the Nominative of Singular nouns, and to the Nominative of those Plurals which do not end in s:—

Singular-man's.

Plural—men's.

If the Plural ends in s, as nearly all Plurals do, the Genitive is formed by simply adding the apostrophe:—

Singular.	Plural.
A cow's tail	cows' tails
My niece's book	my nieces' book
A thief's trick	thieves' tricks
A horse's foot	horses' feet
A lady's cloak	ladies' cloaks
Mistress's fan	mistresses' fans

- 12. Nominative and Vocative.—A noun or pronoun is in the Nominative case when it is the Subject of a verb. When it is used for purposes of address it is in the Vocative. Other uses of the Nominative case will be shown hereafter.
 - (1) This man rides well . . . (Subject of Verb.)
 - (2) Leave me, my son . . (Vocative.)
- In (1) the verb "rides" expresses the action of riding. Who performs this action? The man. Therefore the noun "man" is in the Nominative case.
- In (2) "son" is the person addressed. Therefore "son" is in the Vocative case.

Note.—To find out the Subject of a verb ask yourself, "Who or what does this?" Or, "Who or what suffers this?" Any noun or pronoun which answers this question must be in the Nominative case.

13. Accusative.—A noun or pronoun is in the Accusative case, when it is the direct object to a verb or governed by a preposition. The indirect object is in the Dative case:—

The man rode a fine horse . . . (Acc.)
The earth is moistened by rain . . (Preposition.)
He gave John a shilling . . . (Dative.)

Exercise 2

Pick out every noun in the following sentences, and say—
(a) what is its Gender, (b) what is its Case, and (c) what is its Number:—

1. A friend called at our house in the evening. 2. Did you see the elephant, that was led into Dover with one man walking

by its side and another seated on its neck? 3. Between a cow and a dog, as between a cat and a dog, there seems to be a natural enmity; and between a cat and a cow there seems to be a natural friendship. 4. The King of England is monarch of a vast empire. 5. A herd of deer adds much to the beauty of a park. 6. How many sheep and how many goats are there in your flock? 7. There are certain animals, such as cats, jackals, foxes, owls, and tigers, that see things more clearly in the night than in the day: the brightness of the sun dazzles their eyes. 8. The heroine of that story was a poor lass, who was left an orphan at six years of age, but who conquered all difficulties and became a prosperous and happy woman. 9. The cattle are grazing on the side of the hill, and the cowherd is seated on the grass beside them. 10. The bridegroom will bring the bride to his house in a few days. 11. A peacock is one of the most beautiful of birds, and a lion is one of the stateliest of wild beasts. 12. A man. ignorant of the arts of reading, writing, and ciphering, is in point of knowledge more like a child than a man. 13. Cows are as fond of grass as bears are of honey. 14. Health is one of the greatest blessings that a man or woman can hope to enjoy in life. 15. The Czar of Russia was lord of the eastern half of Europe and the northern half of Asia, besides being master of a huge army and a large fleet. 16. A King who cannot live in peace and safety with his own subjects, and cannot leave his palace without fear, is not fit to reign. 17. The love of money is the root of all evil; but by a proper use of money men can do much good.

SECTION 4.—THE KINDS OF NOUNS

- 14. Nouns may be divided into five different kinds—
 (1) Proper, (2) Common, (3) Collective, (4) Material,
 (5) Abstract.
- 15. A Proper noun is a name given to one particular person or thing, and is not intended to denote more than one person or thing at a time; as James (person), New Testament (book), York (city), France (country).

Note.—The writing of a Proper noun, or of any other kind of noun when it is used as a Proper noun, should be commenced with a capital letter.

16. A Common noun denotes no one person or thing in

particular, but is common to all persons or things of the same kind; as "man," "book," "country."

Here man does not point out any particular man, such as James, but can be used for any and every man. Book does not point out any particular book, such as the New Testament, but can be used for any and every book. Country does not point out any particular country, such as France, but can be used for any and every country in any part of the world.

17. A Collective noun denotes a group, collection, or multitude, considered as one complete whole.

For instance, there may be many sheep in a field, but only one flock. Here "sheep" is a Common noun, because it may stand for any and every sheep; but "flock" is a Collective noun, because it stands for all the sheep at once in that field, and not for any one sheep taken separately.

Note 1.—A Collective noun is a peculiar kind of Common noun. Thus "flock" is a Common noun for any number of

flocks.

Note 2.—On the difference between a Collective noun and a noun of Multitude see Rule IV, § 100, in Chapter XIX.

18. A noun of Material denotes the matter or substance of which certain things are made; as in the following examples:—

A cow eats grass. Seeds are grown in soil. Salt is necessary to life. Fish live in water. We cannot live without air. Zinc is less valuable than gold. Mud is soil mixed with water. They live chiefly on rice. That bar is made of iron. Fish I prefer to meat. We had meat with bread and butter. We shall dine on wheat to-day. Milk is the best of foods. Some men never eat flesh. We can write with ink or with chalk. A black-board is made of wood.

Note.—Sometimes a Common noun has a Material noun that pairs with it; as ox (Common), beef (Material); sheep (Common), mutton (Material); pig (Common), bacon or ham or pork (Material); deer (Common), venison (Material); tree (Common). timber (Material), etc.

19. An Abstract noun denotes some quality, state, or action apart from any object or objects.

Quality.—Cleverness, height, humility, roguery, colour.

State.—Poverty, manhood, bondage, pleasure, youth.

Action.—Laughter, movement, flight, choice, revenge.

The four kinds of nouns named in §§ 15-18 all relate to objects of sense,—that is, to things which can be seen, touched, heard, smelt, or tasted, and all these kinds are concrete. But an abstract noun relates to things which cannot be seen or touched, etc., and which are thought of apart from any object or objects of sense.

For example—We know that stone is hard. We also know that iron is hard. We also know that a brick is hard. We can therefore speak of hardness apart from stone, or iron, or brick, or any other object having the same quality. "Abstract" means "drawn off" or "apart from" the object (Latin abs, off, and tractus, drawn).

How Abstract Nouns are formed

20. Abstract nouns can be formed from Adjectives, or from Common nouns, or from Verbs, by adding some syllable or letter, which is called a suffix. Sometimes they are of the same form as Verbs.

(a) Abstract Nouns formed from Adjectives

		· ·	
Adjective.	$Abstract \\ Noun.$	Adjective.	Abstract Noun.
Wise	wisdom	Just	justice
Poor	poverty	Great	greatness
High	height	Hot	heat
Short	shortness	Sleepy	sleepiness
Honest	honesty	Bitter	bitterness
Dark .	darkness	Wide	width
Long	length	Sole	solitude
Brave	bravery	Broad	breadth
Prudent .	prudence	Deep	depth
Sweet	sweetness	True	truth
Young	youth	Cold	coldness
Proud	pride	Humble	humility

(b) Abstract Nouns formed from Common Nouns

	· · · · · · · · · · · · · · · · · · ·		
Common	Abstract	Common	Abstract
Noun.	Noun.	Noun.	Noun.
Man	manhood	Bond	bondage
Child	childhood	Hero	heroism
Friend	friendship	Thief	theft
Boy	boyhood	Mother	motherhood
Captain	captaincy	Rascal	rascality
Priest	priesthood	Rogue	roguery
Agent	agency	Slave	slavery
Regent	regency	Infant	infancy
King	kingship	Owner	ownership

(c) Abstract Nouns formed from Verbs

Verb.	Abstract Noun.	Verb.	Abstract Noun.
Serve	service	Defend	defence
Live	life	Judge	judgment
Hate	hatred	Conceal	concealment
Obey	obedience	Seize	seizure
Choose	choice	Laugh	laughter
Move	motion	Expect	expectation
See	sight	Protect	protection
Relieve	relief	Think	thought
Believe	belief	Till	tillage
Please	pleasure	Steal	stealth
Advise	advice		

(d) Abstract Nouns of the same form as Verbs

		· ·	
Verb.	Abstract Noun.	Verb.	Abstract Noun.
Fear	fear	Walk	walk
Норе	hope	Run	run
Desire	desire	Step	step
Regret	regret	Laugh	laugh
Order	order	Taste	taste
Rise	rise	Ride	ride
Fall	fall	Touch	touch
Stay	stay	Love	love
Stop	stop	Sleep	sleep

20a. There are certain parts of a verb which are equivalent to Abstract nouns, that is, have the same force or meaning as Abstract nouns, although they are not the same in form. These are—(1) the Gerund ending in -ing, as "working"; (2) the Infinitive form which is preceded by to, as "to work." There is no difference in meaning between an Abstract noun, a Gerund, and an Infinitive:—

Work is good for health . . . (Abstract Noun.)
Working is good for health . . . (Gerund.)
To work is good for health . . (Infinitive.)

- 21. The class to which a Noun belongs depends on the sense in which the noun is used. The form does not always serve as a guide.
- (a) Thus a Proper noun is sometimes used as a Common noun:—

A Daniel come to judgment.—Shakespeare.

Here Daniel does not stand for the Jewish prophet, but for any man who resembles the Jewish prophet in wisdom and judgment.

Hence some Common nouns have been formed from Proper; as epicure (from Epicurus); hansom (from the inventor); lumber (from Lombard pawnbrokers); mackintosh (from the inventor); currant (from Corinth); dunce (from Duns Scotus); calico (from Calicut); china (from the country); port (from Oporto); davy (a miner's safety lamp, from the inventor); guinea (from the Guinea coast).

(b) An Abstract noun can be used as a Proper noun:— The Terror set sail yesterday. Whatever he did. Fortune smiled on him.

Here "Terror" stands for the name of a ship. "Fortune" is used as if it were the name of a person. When an Abstract noun is thus used as a Proper noun, it is written with a Capital, as a Proper noun is.

(c) An Abstract noun is sometimes used as a Common noun:—

He is a lover of justice . . . (Abstract.)
He is a justice of the peace . . (Common.)

In the first sentence justice means the quality of being just. In the second it stands for the man who represents justice, viz. the judge.

She is a person of great beauty . . . (Abstract.)
She is the beauty of the place . . . (Common.)

In the first sentence beauty denotes the quality of being beautiful. In the second it denotes the person possessing the quality.

{Poetry is one of the fine arts . . . (Abstract.) He wrote very good poetry . . . (Common.)

In the first sentence *poetry* denotes the art; in the second the poem or poems written by some one,

(d) The same word can be a Material noun in one sentence and a Common noun in another:—

Fish live in water . . . (Common.) Fish is a good kind of food . . (Material.)

In the first sentence the word *fish* denotes the animal; in the second its matter or substance.

Exercise 3.—The kinds of Nouns

Point out the kind or use of each of the nouns occurring in the following sentences:—

1. A cow eats grass. 2. Seeds are sown in soil. 3. Give him the slate. 4. There is no slate to be got out of this quarry. 5. Is that chain of yours made of gold or brass? 6. Salt is necessary to life. 7. He is a man of great kindness. 8. He has done me many kindnesses. 9. We cannot live without air. 10. He is a man of very clear judgment. 11. The judgment that he gave on that case was too severe. 12. Milk is the best kind of food. 13. Some men never eat flesh. 14. A man, ignorant of the arts of reading, writing, and ciphering, is in point of knowledge more like a child than a man. 15. As soon as I heard that news, I was seized with wonder. 16. It is a wonder that he was not killed. 17. They had fish for dinner that day. 18. There are many fish in this river. 19. A black-board is made of wood. 20. We have a wood about half-a-mile from our house. 21. The Czar of Russia was lord of the northern half of Asia, besides being master of a huge army and a large fleet. 22. He lives in peace and safety with his own subjects.

CHAPTER III.—FORMS AND KINDS OF ADJECTIVES

SECTION 1.—THE KINDS OF ADJECTIVES

- 22. Kinds of Adjectives.—There are eight different kinds of adjectives:—
 - (1) Proper: formed from a proper name:-

A Chinese sailor = a sailor from China.

The British empire = the empire of Britain.

The English language = the language of England.

(2) **Descriptive:** showing of what *quality* or in what *state* a thing is. (These are sometimes called Qualitative.)

A brave boy. A sick lion. A fertile field. A dark night.

Note.—From such adjectives Abstract nouns are formed; as bravery, sickness, fertility, darkness. See additional examples given in (a), § 20.

(3) Quantitative: showing how much of a thing is meant:—

He had much (a large quantity of) silver.

He ate little (a small quantity of) bread.

He walked the whole way back.

A half loaf is better than no bread.

He did not eat any (any quantity of) bread.

- (4) Numeral: showing—(a) how many things are meant, or (b) in what order a thing stands:—
- (a) Adjectives showing how many are called Cardinals:—

 He had seven apples and three buns.
- (b) Adjectives showing in what order are called Ordinals:—

He stood seventh in English and third in arithmetic.

Note.—Adjectives which refer to number, but specify no number in particular, are called **Indefinite** Numerals:—

- All men are mortal. Some men are rich. Many men are poor. Few men are rich. Several men have come. Sundry men have gone.
- (5) **Demonstrative:** showing which or what thing is meant. The most common are this, that (with Singular nouns); these, those (with Plural nouns); such, same.

Adjectives like any, a certain, some, other, any other, are called Indefinite Demonstratives.

This man came here to-day. These dogs are a nuisance.

That boat leaks: those persons will be drowned.

This is not the book I chose: I chose the other (book).

Such a man as that is to be admired.

He said the same thing two or three times.

He gave me the choice of certain books.

You must take some book or other (book).

Note.—Much care is needed in classifying the adjective "some." (a) "I have some bread"; here some denotes quantity, -a certain quantity of bread. (b) "I have some loaves": here some denotes number, -a certain number of loaves, the actual number being unspecified. (c) "You must take some book or other ": here some denotes neither quantity nor number, but is a vague kind of Demonstrative.

(6) Interrogative: asking which or what thing is meant:— What book is that? Which book do you prefer?

Note 1.—From these two examples it will be seen that what is used in a general sense, and which in a selective or particular sense. Out of the number of books before him the person addressed is asked to state which of them he prefers.

Note 2.—What is sometimes used in an exclamatory sense :-What fine books you have bought!

(7) Distributive: showing that the things named are taken separately or in separate lots:-

The two men had each (man) a gun. Every man was punctually in his place. Take either side, whichever you like best. Every four hours (that is, every period of four hours).

- (8) Possessive: my, thy, his, her, its, our, your, their.
- 23. Articles.—It is convenient as well as customary to call a or an the Indefinite article, and the the Definite. But in point of fact these words are Demonstrative adjectives. A or an is merely a short form of one, and hence it is used only before nouns in the Singular number. The is merely a short form of this, that, these, or those, and hence it can be used before nouns in either number.

An is used before an open vowel or a silent consonant; as "an ox," "an hour," "an heir," "an honest man," "an historical event."

Note.—We say "a history," "an historical event," because in "history" the h is very distinctly sounded, while in "historical" the h is scarcely sounded at all. In "history" the accent is thrown on the first syllable; whereas in "historical" it is thrown on the second syllable.

A is used before a consonant; as "a box," "a house." It is also used before a vowel, when the *sound* of the vowel (not the *spelling*) is preceded by the sound of w or y:—

A useful thing. A one-eyed man. A ewe-lamb.

24. How Adjectives are Formed.—Some adjectives are original or primary words, as dry, hot, quick, wet, long, short, etc. Others are formed by adding a letter or syllable (which is called a suffix) to some noun, and occasionally, though less frequently, to some other adjective, or less frequently still to some verb or adverb.

(a) Adjectives formed from Nouns

Noun.	Adjective.	Noun.	Adjective.
Stead	steadfast	Haste	hasty
TT	∫hopeful	Part	partial
Hope	hopeless	Rome	Roman
Grace	graceful	Hercules	Herculean
Fear	fearless	Europe	European
Life	lifelike	Unit	unitarian
Child	∫childish	Sale	saleable
Child	l childlike	China	Chinese
Quarrel	quarrelsome	Picture	picturesque
Toil	toilsome	Statue	statuesque
Wretch	wretched	Infant	∫infantile
Wood	wooden	Imant	linfantine
Woman	∫ womanish	Glory	glorious
	womanly	Labour	laborious
Fop	foppish	Joy	∫joyous
Might	mighty	Joy	ljoyful
Worth	worthy	Pity	∫piteous
Naught	naughty	1109	\ pitiful

(b) Adjectives formed from other Adjectives

	V /	J J	~	,	~	
1st A	dj.	2nd Adj.	1	1st Adj.		2nd Adj.
Two		twofold		Dramatic		dramatical
Many	r	manifold		Periodic		periodical
Four		fourteen	-	Politic		political
		forty		Pale		palish
Three		∫thirteen		Red		reddish
	7	thirty		Middle		middling
Full		fulsome		Sick		sickly
Whol	e	wholesome		Poor		poorly
Comi	c	comical		Tacit		taciturn

(c) Adjectives formed from Verbs

Verb.	Adjective.	Verb.	Adjective.
Cease	ceaseless	Talk	talkative
Resist	resistless	Snap	snappish
Tire	tiresome	Move	movable

(d) Adjectives formed from Adverbs

Adverb.	Adjective.	Adverb.	Adjective.
$\mathbf{U}\mathbf{p}$	upright	Fore	forward
Down	downright	In	inward
Fro	froward	Out	utmost

Exercise 4

Pick out all the adjectives in the following sentences, and say to what class each of them belongs:—

1. Some persons were present, but I cannot say how many.
2. A live ass is better than a dead lion. 3. Twenty students are in the fourth class, and each has a book on English history.
4. A lazy boy gives much trouble to both his parents. 5. A little learning is a dangerous thing. 6. There is a forest of fine old oak-trees on either bank of the river. 7. Which pace do you like better in a horse, trotting or cantering? 8. The whole distance travelled on that day was thirty-two miles. 9. Roman history has been divided into several different periods; and the beginning of each period is marked by some great event. 10. The two great periods in the history of the Roman Empire are the pagan and the Christian. 11. London is the greatest city in the modern world, as Rome was in the ancient.

SECTION 2.—COMPARISON OF ADJECTIVES

25. Adjectives have no change of form (such as nouns and pronouns have) to express Number, Gender, and Case.

The single exception is this, that; these, those. The two first are used with Singular nouns; as "this man," "that man." The two last are used with Plural ones; as "these men," "those men."

26. Degrees of Comparison.—But adjectives incur a change of form, according to the degree of comparison in which they are used.

There are three degrees of Comparison,—the Positive,

the Comparative, and the Superlative.

The Positive denotes the simple quality; as "fat ox."

The Comparative denotes a higher degree of the quality; as "fatter ox." This is used, when two things are compared in respect of a certain quality.

The Superlative denotes the highest degree of the quality; as "the fattest ox." This is used, when one thing is compared with all other things of the same kind.

Note.—Of the eight kinds of adjectives named in § 22, the only one that admits of being freely used in different degrees of comparison is the Descriptive. Among Quantitative adjectives there are only two: much, more, most; and little, less, least. Among Numeral adjectives there are only two; many, more, most: few, fewer, fewest.

Among Descriptive adjectives there are some which from the nature of their meaning cannot have degrees of comparison.

- (a) Shape, as round, square, oblong, triangular, four-footed.
- (b) Material, as golden, vegetable, leathern, wheaten, etc.
- (c) Time, as weekly, annual, monthly, hourly, etc.
- (d) Place, as Kentish, Canadian, insular, celestial, etc.
- (e) Natural objects, as solar, lunar, sidereal.
- (f) Qualities in the highest degree, as perfect, eternal.
- (g) Qualities in a moderate degree, as reddish, palish.
- 27. Regular Comparatives.—There are two regular methods of forming the second and third degrees of Comparison:—

PARTI

26

(1) By adding the adverbs more and most. This is the method generally used for adjectives of two syllables; and it is the only method used for adjectives of more than two syllables:—

More beautiful (not beautiful entire fuller). Most beautiful (not beautifuller).

More famous (not famouser). Most famous (not famousest).

(2) By adding er and est to the Positive. This is called the Flexional method. Observe the following rules:—

(a) If the Positive ends in two consonants or in a single consonant preceded by a long vowel, it incurs no change of spelling when er and est are added:—

Pos.	Comp.	Super.	Pos.	Comp.	Super.
Small	smaller	smallest	Great	greater	greatest
Thick	thicker	thickest	Brief	briefer	briefest
Bold	bolder	boldest	Deep	deeper	deepest

(b) If the Positive ends in a *single* consonant, and this consonant is preceded by a *short* vowel, the final consonant is doubled before *er* and *est*:—

Pos.	Comp.	Super.	Pos.	Comp.	Super.
Thin	thinner	thinnest	Wet	wetter	wettest
Hot	hotter	hottest	Glad	gladder	gladdest

(c) If the Positive ends in e, we add r and st, not er and est:—

000 .					
Pos.	Comp.	Super.	Pos.	Comp.	Super.
Brave	braver	bravest	Large	larger	largest
Free	freer	freest	Fine	finer	finest
True	truer	truest	White	whiter	whitest

(d) If the Positive ends in y, and the y is preceded by a consonant, the y is changed to i before er and est. But if the y is preceded by a vowel, it is not changed:—

Pos.	Comp.	Super.	Pos.	Comp.	Super.
Happy	happier	happiest	Grey	greyer	greyest
Dry	drier	driest	Gay	gayer	gayest

Note.—The only dissyllables in which er and est are commonly used are (1) those ending in le, as humble, noble, feeble, simple, ample, etc.; (2) those ending in y, as happy, early, gloomy,

lazy, dirty, heavy, easy; (3) those ending in er, as tender, bitter, clever, sober. Such words as supple, subtle, docile, fragile, eager, are exceptions: here you must use the adverbs more and most.

If the final syllable of a dissyllable is accented, -er and est can be used, as sublime, sublimer; severe, severer. But such examples are rare.

28. Irregular Comparatives.—In the words marked* the comparison is defective rather than irregular; that is, the Positive has no Comp. or Superl. of its own, but has borrowed them from an adjective that has no Positive of its own.

Pos.	Comp.	Super.	Pos.	Comp.	Super.
Good*	better	best	Old	∫older	oldest
Bad,* ill*	worse	worst	Old	$\ell_{ m elder}$	eldest
Little*	less	least	Taka	(later	latest
Much*	more	most	Late	latter	last
Many*	more	most		(former	(foremost
Hind	hinder	hindmost	Fore	-	first
				further	furthest 1

There are five words which are adverbs in the Positive degree, but adjectives in the Comparative and Superlative:—

Pos.	Comp.	Super.	Pos.	Comp.	Super.
Far	farther	farthest		Couter	utmost
In	inner	innermost	Out		uttermost
		inmost	(Be)neath	nether	nether-
Up	upper	uppermost			most

Exercise 5

Write out the Comparatives and Superlatives of the following adjectives; and use, whenever you can, the forms er and est:—

Fierce, merry, short, loud, good, docile, permanent, handsome, sweet, able, little, bad, jealous, clever, much, pretty, large, late, rich, flat, few, red, soft, strange, idle, tall, kind, horrible, guilty.

¹ The words *elder*, *eldest*, apply only to persons; as "He is the *elder* of my two sons." The words *older*, *oldest* apply to things as well as persons; as, "That is the *oldest* tree in the orchard."

The words later, latest denote differences of time; as, "This is the latest news." The words latter, last denote differences of position; as, "This was

PART I

CHAPTER IV.—FORMS AND KINDS OF PRONOUNS

29. Kinds of Pronouns.—There are five different kinds of pronouns:—

(1) Personal: I, thou, you, he, she, it, they, etc.

(2) Possessive: mine, thine, his, hers, ours, yours, theirs.

(3) Demonstrative: one, this, that, such, etc.

(4) Relative or Conjunctive: who, which, that, as.

(5) Interrogative: who? which? what?

Note 1.—We must exclude from the list of Pronouns such words as any, each, every, some, either, neither. These words are used with nouns, not for nouns; and therefore they are adjectives. As has been shown in § 22, these adjectives are either Demonstrative (some, any) or Distributive (each, every, either, neither). They qualify nouns expressed or understood, and are not substitutes for nouns. Therefore they are not Pro-nouns.

Note 2.—The definition of Pronoun given in § 3,—"a word used instead of a Noun or Noun-equivalent,"—is conveniently short and simple, but is not quite sufficient; for we cannot say that I or those or who? is used instead of any noun that has been expressed. The definition which covers all classes of pronouns is that given in § 1, (2), "a word which refers to some person or thing without giving a name to the person or thing referred to."

SECTION 1.—PERSONAL PRONOUNS

30. The Personal pronouns are so called, because they stand for the three persons, viz.—

(a) The First, or the person speaking; as I, we, myself.

(b) The Second, or the person spoken to; as thou, you, thyself.

(c) The Third, or what is spoken of; as he, she, it, himself, etc.

the last boy in the class." The word last can also denote time; as, "This is the last time that I shall see you."

The words farther, farthest denote differences of distance; as, "Exeter is farther from London than Bath." The words further, furthest denote differences of degree, or of progress, or of advance; as, "Make no further complaints"; "I shall go no further to-day."

to a rusted of some thing

The First Person, Masculine or Feminine

Case.	Singular.	Plural.
Nominative	I	We
Accusative and Dative .	Me	Us
Genitive	[My, mine	Our, ours]

The Second Person, Masculine or Feminine

Case.	Singular.	Plural,
Nominative	Thou	Ye or you
Accusative and Dative .	Thee	You
Genitive	[Thy, thine	Your, yours]

The Third Person, of all Genders

Case.		Plural.		
Uase.	Masculine.	Feminine.	Neuter.	All Genders.
Nominative .	He	She	It	They
Acc. and Dat.	Him	Her	It	Them
Genitive .	His	[Her, hers	Its	Their, theirs]

31. Possessive Adjectives and Possessive Pronouns.— The forms my, thy, his, her, its, our, your, their, which were formerly the Genitives of the Personal Pronouns, are now classed as Possessive Adjectives.

They stand before the nouns with which they are joined, and qualify them like adjectives :--

My book, thy book, her book; our book, your book, their book.

The words mine, thine, his, hers, ours, yours, theirs, which are alternative forms of the old Genitive, are now classed as Possessive Pronouns. They are used (a) when separated from the noun by a verb coming between; (b) when the noun is not expressed; (c) when preceded by the preposition " of " .-

- (a) This book is mine. That house is theirs.
- (b) My horse and yours (your horse) are both tired.
- (c) That horse of yours is tired.
- 32. When "self" or "own" is added to a personal pronoun, the pronoun is called either Reflexive or Emphasizing.

I. The First Person

	Singular.	Plural.
Nom. Acc. Dat. Poss. Adj. or Pron	Myself My own, mine own	Ourselves Our own

II. The Second Person.

,	Singular.	Plural.
Nom. Acc. Dat Poss. Adj. or Pron	Thyself Thy own, thine own	Yourselves Your own

III. The Third Person

	Singular.			Plural.
	Masculine.	Feminine.	Neuter.	All Genders.
Nom. Acc. Dat Poss. Adj. or Pron.	Himself His own			Themselves Their own

Exercise 6

Put pronouns in the place of the nouns noted below:—

- 1. I told James that the snake seen by James in the garden would do James no harm, if James left the snake alone to go its own way.
- 2. The girl went into the green field, and there the girl saw the sheep and lambs, as the sheep and lambs played about in the field.
- 3. A man brought round some wild beasts in a show. Among the beasts there was an elephant. The man threw cakes at the elephant, and the elephant caught the cakes in its trunk.
- 4. A dog was carrying an umbrella for its master. Some boys tried to take away the umbrella from the dog. But the dog was too quick for the boys. The dog ran past the boys at full speed, and carried the umbrella safely out of their reach.

5. When the camel is being loaded, the camel kneels down so that the load may be put on its back. The camel loves men,

if men treat the camel well.

6. The bees are flying towards the flowers. The bees suck

the flowers, and fill their bags with honey.

7. Wolves hunt in large packs, and when wolves are pressed by hunger, wolves become very fierce, and will attack men and eat men up greedily.

8. A horse cannot defend a horse against wolves; but a horse can run from wolves, and wolves are not always able to catch a horse.

SECTION 2.—DEMONSTRATIVE PRONOUNS

33. A Demenstrative pronoun points to some noun going before, and is used instead of it. The noun going before is called its Antecedent.

- 34. This, that, these, those. These words are adjectives, when they are used with a noun (expressed or understood); but they are pronouns, when they are used for a noun:—
 - (1) Work and play are both necessary to health: this (namely play) gives us rest, and that (namely work) gives us energy.

Here this is a pronoun, because it is used instead of "play";

that is a pronoun, because it is used instead of "work."

(2) This house and that (house) are both to let.

Here this is not a pronoun, but an adjective, because it qualifies the noun "house," and is not used instead of it. That is also an adjective, because it qualifies the noun "house" understood after it.

- 35. One, ones, none.—When the antecedent noun is Singular, we use one. When it is Plural, we use ones. "None" is a shortened form of "not one," but it may stand either for a Singular or a Plural noun.
 - (1) I prefer a white horse to a black one.
 - Here one is a pronoun, because it is used instead of "horse."
 - (2) He came to my house one day. Here one is an adjective, because it qualifies the noun "day."

Note.—"They" and "one" are sometimes used without reference to any antecedent. They are then called **Indefinite** Demonstrative pronouns:—

They say that he is very clever.

One must take care of one's health.

Here they and one refer to no antecedent. They are Indefinite, and stand for no person or persons in particular.

Exercise 7

Show whether each of the words printed in Italics in the following examples is a Demonstrative adjective or a Demonstrative pronoun. If it is a pronoun, show whether it is Definite or Indefinite:

1. This horse is stronger than that. 2. Health is of more value than money; this cannot give such true happiness as that. 3. I prefer a house built of stone to one built of brick. 4. You will repent of this one day, when it is too late. 5. You have kept your promise; this was all that I asked for. 6. The faithfulness of a dog is greater than that of a cat. 7. One Mr. B. helped his friend in need; that was a true friend. 8. Bring me that book, and leave this where it is. 9. The step you have taken is one of much risk. 10. A pale light, like that of the moon, begins to fringe the horizon.

SECTION 3.—RELATIVE OR CONJUNCTIVE PRONOUNS

36. A Relative pronoun is so called, because it *relates* to some noun or Personal pronoun going before. Another name by which it is called is "Conjunctive," because it joins two sentences. The noun or Personal pronoun to which the Conjunctive pronoun relates is called the Antecedent.

Case.	Singular and Plural.	Singular and Plural.
Cast.	Masc. and Fem.	Neuter.
Nominative	Who	Which
Acc. and Dat	Whom	Which
Genitive	Whose	Whose, or of which

Exercise 8

- (a) Point out the antecedent to the Relative pronouns noted below, and say in what case each Relative is:—
 - 1. We love those persons who are kind to us.
 - 2. The pen whose point was broken has been mended.
 - 3. The ground which we dig will bear a fine crop.

- 4. That is the man whom we saw yesterday.
- 5. Is this a dagger which I see before me?
- 6. We left the house in which we had long lived.
- 7. He lost the box of clothes which I brought.
- 8. The child whose parents are dead is an orphan.
- (b) Join each pair of sentences into a single sentence by putting a Relative pronoun in the place of the Personal pronoun or Possessive adjective:—
 - 1. This is the house; Jack built it.
 - 2. This book is a good one; I read it.
 - 3. This is the man: I read his book.
 - 4. The boy has come; he lost his hat.
 - 5. The girl has come; you were looking for her.
 - 6. These are the trees; their leaves have fallen.
 - 7. You built this house; I have long lived in it.
 - 8. These men have fled; the ox was stolen by them.
 - 9. Look at those boys; we read in class with them.
 - (c) Supply the Relative pronoun in the following sentences:—
 - 1. The box —— I bought was soon lost by him.
 - 2. The man —— I met to-day was an old friend.
 - 3. These are the only things —— I was looking for.
 - 4. This is the book —— I won as a prize.

36a. The Relative pronoun, provided it would be in the Accusative case, is often omitted.

Supply the omissions in the following:—

- 1. Be so kind as to pick up the book I dropped.
- 2. The girl you teach is very clever.
- 3. Have you seen the boy I sent for?
- 4. This is the house we lived in.
- 5. These are the wolves I shot to-day.

Note 1.—If the Relative is in the Nominative case, it cannot be omitted. Thus we can say:—

I found the man who came yesterday.

But we cannot say-

I found the man came yesterday.

Note 2.—The antecedent to a Relative is sometimes omitted.

Whom the gods love die young.

What cannot be cured must be endured.

Here whom signifies they whom. What stands for that thing which, or those things which.

Note 3.—The Relative which can also be used without having an antecedent expressed. But it has a selective or special sense, that distinguishes it from what.

I know what I want. I know which I want.

Here what is more general than which. The latter implies choice or selection.

Note 4.—What can also be used in an exclamatory sense.

What a noise you are making!

37. That, as, but.—" That" and "as" can be used for "who," "whom," or "which," but not for "whose." "As" was originally a conjunction, but is now used as a Relative pronoun after such and sometimes after same.

The man that we were looking for has come.

This is the same book as yours.

He is not such a clever student as you are.

But.—This conjunction is sometimes used as if it were a Relative pronoun signifying who . . . not or which . . . not.

There is no one but agrees to it =

There is no one who does not agree to it.

"But," however, is not really a Pronoun, but a Conjunction: "There is no one, but he agrees to it"; "It never rains but it pours." In the sentence "There is no one but agrees to it," the pronoun "he" has been omitted, and must therefore be understood.

Section 4.—Interrogative Pronouns

38. The name In-ter-rog-a-tive is given to those pronouns that are used for asking questions:—

Who spoke? . . . (Nominative to the verb.)

Of whom did he speak? . . (Accusative after preposition.)

What did he say? . . . (Accusative after verb.)
Who are you? . . . (Complement to the verb.)

Whose book is that? . . . (Genitive case.)

Which of them won the prize? . (Nominative to the verb.)

Whether of them twain did the will

of his father? . . . (Nominative to the verb.)

Note.—Which (as has been explained already) is used in a selective sense, implying a choice or selection among a certain number of persons or things. In this respect it differs from who or what, both of which are quite general. Whether means "which of two," and is therefore far less general than which. But whether as an Interrogative pronoun has become obsolete. i.e. it has passed out of current use. As an Interrogative conjunction (see the fourth example in § 59) it is still commonly used.

CHAPTER V.—FORMS AND KINDS OF ADVERBS

SECTION 1.—THE KINDS OF ADVERBS

- 39. Three kinds of Adverbs.—The three kinds of adverbs are—
- I. Simple. II. Interrogative. III. Relative or Conjunctive.
- 40. Simple Adverbs.—These are distinguished from one another according to their meaning. The chief meanings expressed by Adverbs are shown below.
- (a) Quality or Manner.—He acted thus. He did his work slowly, but surely. He behaved foolishly. We must needs try again.
- (b) Quantity or Degree.—He is almost, but not quite, the cleverest boy in the class. He is very clever, but rather or somewhat indolent. He is clever enough for me. He is too clever for me (=cleverer than what I require or desire). A is more clever than B. A is the most industrious boy in the class.

Note.—The word "the," when it is placed before an adjective or adverb of the Comparative degree, is not the definite article, but an adverb of Quantity (formed from Anglo-Saxon thy). "The sooner, the better" = by how much sooner, by so much better.

(c) Number.—He seldom failed, and always did his best. Try again. He has tried twice already. He often failed.

(d) Time.—He did this before, and you have done it since. He will soon be here. He has already come. Some time ago.

(e) Place.—We must rest here, and not there. South-ward, home-ward, on-ward. In-side, outside. Hither, thither, whither.

Note.—The adverb there is used with Intransitive verbs, when the verb is placed before its Nominative instead of after it; as "There stood a man at the gate." In such positions there is merely introductory, and has no signification of place.

(f) Affirming or Denying.—He will probably return to-day. We shall certainly succeed. He did not come. Perhaps he will

ome.

- (g) Emphasizing.—He too or he also was absent. Even he was dismissed. Only one man was caught.
- **41.** The **Interrogative** adverbs are those used for asking questions. Many of these adverbs are compounds, *i.e.* are expressed by two words, not merely by one.
- (a) Quality or Manner.—How (in what manner) did he do this? How (in what state of health) is he to-day?
- (b) Quantity or Degree.—How far (to what extent) is this report true?
- (c) Number.—How often did he come? How many persons came?
- (d) **Time.**—When did he come? How long will he remain here? How soon will he go?
- (e) Place.—Where did he go? How far (to what distance) did he go? Whence has he come?
- (f) Cause.—Why (for what reason or cause) did he say this? Wherefore does she weep?
- 42. Relative or Conjunctive adverbs.—The Interrogative adverbs, when they are not used for asking a question, but relate to some antecedent, are called Relative adverbs. They are also called Conjunctive, because they join sentences:—

This is the place where (=in which) we dwell.

Sometimes the Antecedent is not expressed:—
This is where we dwell.

Here the adverb where does two things—(1) it modifies the verb of its own sentence "we dwell," as if it were a Simple adverb; (2) it joins its own sentence to the previous sentence "this is," as if it were a conjunction.

SECTION 2.—COMPARISONS OF ADVERBS

- 43. Adverbs, like adjectives, take no change of form, except when they are used in different degrees of Comparison.
- (a) If the adverb is of one syllable, we add er and est to the Positive:—

Long longer Fast faster fastest longest louder loudest Hard harder hardest Loud Late later latest or last nearer nearest

Note.—The adjective "near" has two adverbial forms, near and nearly, but their meanings are not the same: "He stood near (=a short distance off): he nearly (=almost) fell."

The adjective *late* has two adverbial forms, *late* and *lately*, in the Positive degree, and two, *last* and *lastly*, in the Superlative, but their meanings are not the same.

(b) In some adverbs the Comparative forms are irregular:—

Well better best Much more most Badly worse worst Little less least

(c) Adverbs ending in -ly form the Comparative and Superlative by adding more and most:—

Wisely more wisely most wisely
Beautifully more beautifully most beautifully

The adjective early has the same form, early, for its adverb; and the same forms, earlier and earliest, for the Comparative and Superlative degrees.

The only adverbs that freely admit of degrees of Comparison are Simple adverbs of Quality. These might be called **Descriptive** adverbs. They answer to the Descriptive adjectives mentioned in § 26, Note, the only kind of adjective that freely admits of Comparative and Superlative forms.

SECTION 3.—THE FORMS OF ADVERBS

44. Some Adverbs have the same form as the corresponding adjectives. In this case the one must be distinguished

from the other by the work that it does (§ 1) in the sentence. Both are qualifying words; but an adjective qualifies a noun or pronoun, while an adverb qualifies any part of speech except a noun or pronoun; see § 1 (3) and (7).

A	7	verb.
А	a	vero.

CHAP. V

He was much pleased. He stayed long. He spoke loud. He came early. He hit him hard. Stand near while I speak. He was a little tired. He came only once. He has slept enough. He rode fast.

He arrived late.

Adjective.

There is much sickness here. He went on a long journey. There is a sound of loud voices. He woke up at an early hour. This is a hard piece of wood. He is my near relation. There is a little hope now. This is my only son. He has had enough sleep. He rode at a fast gallop. He arrived at a late hour.

45. Adverbs in "-ly."—Most Adverbs are formed from adjectives by adding -ly.

Adjective.

Adverb. wisely (Adverb of Quality or Manner) Wise

Whole wholly (Adverb of Quantity)

firstly (Adverb of Number or Order) First

formerly (Adverb of Time) Former distantly (Adverb of Place) Distant certainly (Adverb of Affirming) Certain

But this form of the Adverb occurs most frequently in Simple adverbs of Quality or Manner; and there is generally an Abstract noun which can be placed between the Adjective and Adverb :-

Adjective.	Abstract Noun.	Adverb.
Wise	wisdom	wisely
Poor	poverty	poorly
High	height	highly
Short	shortness	shortly

Note.—Adjectives ending in le form the adverb by changing e into y; as simple, simply; humble, humbly; single, singly; audible, audibly; probable, probably.

46. Adverbs formed from Pronouns.—

		1	ADVERBS.		
	Rest.	Motion to.	Motion from.	Time.	Manner.
Dem. {This He Rel. Who Inter. Who?	there here where where?	thither hither whither whither?	thence hence whence whence?	then when when?	thus how how?

Many of the above adverbs can be compounded with prepositions:—

From "there" we get therein, thereto, therefore, therefrom, therewith, thereout, thereon, thereby, thereof.

From "here" we get herein, hereto, heretofore, herewith, hereupon, hereby, hereafter.

From "where" we get wherein, whereto, wherefore, whereon, whereof.

From "hither" we get hitherto (=up to this point of place or time).

From "thence" we get thenceforth, thenceforward.

From "hence" we get henceforth, henceforward.

47. Adverbs ending in "s."—These have been formed from the Genitive cases of nouns:—

Needs (=of need, necessarily). Once (=of one, i.e. of one time). Twice (=of two times). Sometimes (=of some time). Always (=of all way). Sideways (=of a side-way). Lengthways (=of a length-way). Else (=of other, from an old form, "elles," of another). Besides (adverbial form of beside).

- 48. Adverbial Phrases.—There is a large class of words in English which are made up of two or more words, and may be called Adverbial phrases:—
 - (1) A preposition followed by a noun:—At random (aimlessly); of course (necessarily); at length (finally); in fact (actually); to boot (moreover); of a truth (truly).
 - (2) A preposition amalgamated with a noun:—Indeed (actually); betimes (punctually); besides (in addition); between (in the middle); to-day (on this day); to-morrow (on the next day); asleep (in a state of sleep); abed (in bed); away (on the way).

Note.—The "be" is an old form of the preposition "by." The "a" is a contracted form of the preposition "on" or "in."

- (3) A preposition followed by an adjective. Some noun is understood after the adjective:—In general, in particular, in short, at large, in vain, on high, of old, after all, at first, at last, at least, at all, at most, at best, in future, at present.
- (4) A preposition amalgamated with an adjective. Here, as before, some noun is understood after the adjective:—

 Below, beyond, behind, abroad, anew, awry, across, along, aloud, etc.
- (5) A noun qualified by an adjective :—Meantime, meanwhile, midway, yesterday, etc.
- (6) Miscellaneous phrases:—By all means, by no means, by the by (something said in passing), by the way (the same meaning as by the by), once on a time, inside out, upside down, to be sure (certainly), head foremost (with the head in front), head downwards, topsy-turvy, head over heels (the head being thrown over the heels).
- 49. Adverbs sometimes go together in pairs, the one being connected with the other by the conjunction "and":—

He is walking up and down, to and fro.
He is walking here and there, hither and thither.
The mice run in and out, backwards and forwards.
He comes here now and then (occasionally).
He works off and on (irregularly).
You will see him by and by (in a short time).

CHAPTER VI.—PREPOSITIONS

50. Preposition and Adverb.—A Preposition must not be confounded with an Adverb, though the two words are often identical in form. The only way to distinguish them is to look to the work that each of them does. § 1 (5), (7).

Whenever an Adverb is used, only one factor in the sentence is affected by it, viz. the word or phrase which it qualifies; as "He walked about." Here the word "about" qualifies the verb "walked" and nothing more.

Whenever a Preposition is used, two factors at least are affected by it, viz. (1) the word that is its object, and (2) the word that is connected with its object by the Preposition. "He walked about the field." Here "about" connects its object "the field" with the verb "walked." The Preposition shows what the field has to do with the act of walking, or in what relation the one stands to the other, § 1 (5). The noun or pronoun following the Preposition is in the Accusative case.

Examples

Adverb.

The man ran past.
The above-named book.
He swam across.

I saw him once before. Go along quickly. You must go behind, He sat below. There is nothing beyond. The horse was going by. Sit down here. He sat inside. The men stood around. He is standing near. He died two years since. Stand up as straight as you can. He lived on for two years. He came a few days after. Bees fly in and out. There were four men besides, The house was clean within. The house was clean without.

Preposition.

He came at half-past seven.

The sky is above the earth.

The house stands across that

field. He stood *before* the door.

Let us walk along the bank.

A man stood behind the door.

He stood below me in the class.

They went beyond the mark.

By whom was this done?

The boat floats down the stream.

The book is *inside* the box.

They walked around the fields.

Your house is near mine.

Since that year I have been ill.

Walk up the hill.

A book is on the table.

He came after a few days.

Fish swim in water.

and ten more besides these.

I slept within the house.

Animals die without food.

51. A Preposition, according to the definition given in § 3 (5), shows in what relation one thing stands to another

thing, i.e. what one thing has to do with another. Some examples of such relations are given below:—

1. Place, Situation, Circumstance

In.—Stand in the water. He is in a bad temper.

Into.—Go into the water. Water can be changed into steam.

Through.—Go through the door. He passed through many dangers.

Past or beyond.—Beyond or past the boundary. This is past or beyond endurance.

On or upon.—Sit on or upon the box. On this condition I will trust you.

At.—He is not at home. He was much at fault.

By.—Sit by me. I will abide by my promise.

With.—I will go with you. All with one exception failed.

Over or above.—Air is above the earth. He spends above his income.

Below or **under.**—Snakes live *under* or *below* the ground.

The matter is *under* inquiry. *Under* these circumstances he was released.

Behind.—The dog is behind you. There is a smile behind his frown.

Before.—Stand before the door. Duty before (in preference to) pleasure.

To.—He has gone to England. This is much to your credit.

For.—He starts for home. He worked hard for a prize.
From.—He starts from home. We are now free from danger.

Of.—He shot wide of the mark. He was robbed of his

About.—Walk about the streets. He went about his business.

Near.—Come near the spot. His success is near my heart.

Along.—The boats were tied along the shore.

Among or amid.—Let us walk amid the trees. They quarrelled among themselves. (Among is used for more than two things.)

Between.—Between the two banks of the river. He still halts between two opinions. (Between is chiefly (not always) used for two things; as, There was peace between France, England, and Russia.)

Up, down.—The monkey ran up and down the tree.

Across.—He sailed across the sea. Sit across the saddle.

Around or **round**.—Describe a circle *round* a given centre.

Beside.—He sat beside me. He is beside himself with anger.

Besides.—He has two sons in India besides one in England.

Against.—It is not easy to swim against the stream.

Without.—He stands without (outside) the gate. Men cannot live without food.

Within.—He is within the house. This is not within my power.

2. Time

In.—He finished the work in ten days. He arrived in time.
Through.—He has been a lazy man through or throughout his whole life.

Past or beyond.—He is now past or beyond the age of forty.

On .- I will expect you on Monday next.

At.—Bats fly out at night; but retire at daybreak.

By.—The sun shines by day; the moon by night.

With.—With the return of the hot winds the grass fades.

Over.—He was absent over two weeks.

Under.—You will not finish that work under two months.

Behind, after.—He arrived behind time. He returned after many days.

Before.—He commenced work before seven o'clock A.M.

To.—To-day, to-night, to-morrow. The train is not up to time.

For.—He was made a prisoner for life.

From.—They commence work daily from ten o'clock.

About.—It is now about three o'clock P.M.

Between.—He arrived between four and five o'clock P.M.

During.—I will remain here during your pleasure.

Pending.—Nothing more can be done pending his arrival.

Till or until.—They worked all day till sunset.

Within.—This was finished within the time fixed.

Note 1.—When one Preposition does not express fully the relation that is intended, two Prepositions can be used with the same object:—

From under.—The seed sprouted from under the ground. From among.—One stood out from among the rest.

In between.—The mouse crept in between the planks.

Into.—He slept late into the day.

Note 2.—A preposition may be preceded by an adverb, so as to form a kind of compound preposition:—

Out of .- This was done out of jealousy.

As to.—As to that matter I will enquire again.

52. Forms of Object.—The object to a Preposition is usually a noun or a pronoun. Sometimes, however, an adverb is made the object, sometimes a phrase, and sometimes a sentence:—

This news has come from afar. (Adverb.)
I bought this for under-half-its-value. (Phrase.)
This depends on what-he-promises-to-do. (Sentence.)

53. Omission of Object.—This never occurs except when the object, if it were expressed, would be the Relative pronoun, whom, which, that.

The man you were looking for has come. Here the object to "for" is whom or that understood.

54. Prepositions in the form of Participles.—Such words, originally Participles, can now be parsed as prepositions:—

Pending fresh orders. During the summer. Notwithstanding his anger. All except one (all, one being excepted). The hour past sunset. Considering his age, he did well. Owing to this. According to that writer. Inform me concerning, touching, or regarding this matter.

55. Phrase-prepositions.—Sometimes a Preposition takes the form of a *phrase*, and not of a *single word*. But a phrase-preposition almost always ends in a Simple preposition.

By means of; because of; in front of; in opposition to; in spite of; on account of; with reference to; with regard to; for the sake of; on behalf of; instead of; in lieu of; in the place of; in prospect of; with a view to; in the event of.

Note.—In the following examples, the phrase has no Simple preposition at the end of it :—

On this side (of) the river. On board (of) the ship.

55a. Disguised prepositions, as in the following examples:—

Fourpence a (on) day. I go a (on) fishing. One o' (of) clock.

CHAPTER VII.—CONJUNCTIONS

- 56. A Conjunction is a word used for joining. 1 It joins—
 - (1) One word to another word.
 - (2) One sentence to another sentence.

One Word joined to another Word

57. When two words are joined together by a Conjunction, they are usually of the same or of a similar part of

speech.

Thus, a noun is joined to a noun or pronoun; a verb to a verb; an adjective to an adjective or participle; an adverb to an adverb or to a phrase which does the work of an adverb; a preposition to a preposition.

The cat slowly and silently approaches. James and I went away at four o'clock. The horse is lame as well as thin. She sat down and wept. The bird flew into and through a cloud. He returned happy and smiling.

He is poor, but honest. They are sad, but or but yet hopeful.

Take this book or that. Do not walk up, but down the

hill.

Point out all the parts of speech which are joined together by the Conjunctions in the above sentences.

58. Correlative Conjunctions are those which go in pairs.

He is both wise and good.

Take either the one book or the other.

He is neither wise nor good.

The goat was not only killed, but also eaten.

One Sentence joined to another Sentence

59. Among those Conjunctions which join one sentence to another sentence, the most common are given in the following examples:—

¹ The difference between Co-ordinating and Subordinating conjunctions, which is somewhat difficult to a beginner, is shown hereafter in Chapter XXV.

Conjunction. First Sentence. Second Sentence. My father says, that this book is mine. I trust his word, becausehe speaks the truth. The boy will come. if he is allowed to do so. I wish to know, *whether I am excused or not. She walked slowly, lest she should fall down. He will do this, he is stopped by you. unless The boy returned. although the day was still wet. the rain has now ceased. You may go out, as or since He left his bed. *when the sun was seen to rise. We could not tell, *whence the noise of voices arose. No one could find out. *nhere the cow was lying hid. The mice will play, while the cat is away. Can you tell me, *whither he intends to go. You must wait here. untilyour father comes back. They could not tell, *whu they were so heavily fined The girl is quick, she reads very well. and she was feeling quite tired. She went to bed. for He was so badly hurt. he died soon after. that I will trust you, provided you sign your name. since We must believe it. you say so. Pay that debt. you will not be trusted. or I wish to know *how the sick man is to-day. *however He will die some day. rich he may be. He closed his house. afterhis friends had gone. He cleaned his house well, before his friends came. The girl is clever. hut the boy is a dunce. He left the house, the rain stopped. as soon as He could not pass. though he tried often. Your horse is swifter than. mine (is).

Note.—The conjunctions marked with an asterisk, namely, whether, when, whence, where, whither, why, how, and however, are Conjunctive or Relative adverbs (see § 42), i.e. partly adverbs and partly conjunctions. Such a word does the work of two parts of speech. So far as it qualifies the verb of its own sentence by stating the time, place, manner, etc., of the event, it is an Adverb. So far as it joins one sentence to another, it is a Conjunction.

60. Conjunction and Adverb.—Care must be taken not to confound a Conjunction with an Adverb, or with a

Preposition, or with any other part of speech. There is no fear of any confusion, if the student will ask himself, What work does the word do in the sentence before him? If it joins one word or sentence to another word or sentence, it is a Conjunction. If it shows in what relation one thing stands to another thing, or what one thing has to do with another thing, it is a Preposition. If it qualifies some word, it is an Adverb.

Conjunction.

We will go after you have dined.

He went before he had dined.

He is shrewd, but unlearned.

He is either a fool or a knave.

He fled; else he would have been caught.

I cannot beg; for I am ashamed.

Neither you nor I can do that. Do what you like; only keep quiet.

We must trust it, since you say so.

The time is up; so we must go. I heard that you had come.

Preposition, Adverb, etc.

We will go after dinner (Prep.). He came a few days after (Adv.). He went away before dinner (Prep.).

I have never seen him before (Adv.).

All but four escaped (Prep.). There is but one present (Adv.). He is ruined in either case (Adj.).

We could do nothing else(Adv.).

He has been ill for a long time (Prep.).

I agree with neither side (Adj.). I heard of this only vesterday

(Adv.). The only dog I had was stolen (Adj.).

I have not been there since Sunday last (Prep.).

I took this house four weeks since (or ago) (Adv.).

Do not walk so fast (Adv.).

The book that you gave me is here (Relative Pron.).

The light of the sun is brighter than that of the moon (Demon. Pron. § 34).

I am no admirer of that book (Demon. Adj. § 34).

Conjunction.

I like this more than (I like) that.

Wait till I return.

As the sun is up, let us start.

Preposition, Adverb, etc.

No drink other than water suited him (Prep.).

Wait here till sunset (Prep.).

He is not such a man as you are (Rel. Pron. § 37).

PART II.—VERBS, THEIR INFLECTIONS AND USES

CHAPTER VIII.—THE KINDS OF VERBS

- 61. Three kinds of Verbs.—There are three kinds of verbs,—the verb used Transitively, the verb used Intransitively, and the Auxiliary.
- I. Transitive.—A verb used Transitively denotes an action, that is directed towards some person or thing, which is called its object:—

The man killed a snake.

Note.—The word "Transitive" means "passing over." Verbs of Class I. are said to be used Transitively, because the action expressed by such a verb as "killed" does not stop with the doer, but passes from the doer to some person or thing such as "snake."

II. Intransitive.—A verb used Intransitively denotes an action that stops with the doer, and concerns no person or thing except the doer:—

Men sleep to preserve life.

Sleep what? That is nonsense. No word or words can be placed as object after such a verb as *sleep*. The verb *sleep* is therefore used Intransitively.

Note.—An Intransitive verb, which is made Transitive by having a preposition added to it and can be used as such in the Passive voice, is called a **Prepositional verb**:—

We act-on this rule. This rule is acted-on by us.

The verb act, used without a preposition, is Intransitive. We cannot say,—"We act this rule."

III. Auxiliary.—An Auxiliary verb is one that helps

other verbs to form some of their parts. It happens that very few of our tenses and moods are formed by inflection, that is, by a change of inside vowel or by a change of ending. So for forming most tenses and moods verbs require help, and this help is given them by the special class of verbs, which are for this reason called Auxiliary (Latin auxiliaris, helpful).

(1) I have slept well. (2) He will sleep well.

Here the Auxiliary have goes with the verb "slept." The two verbs thus joined make a compound tense, which could not have been expressed by any form of the verb "sleep" alone.

Similarly, the Auxiliary will goes with the verb "sleep." The two verbs thus joined make a compound tense, which could not have been expressed by any form of the verb "sleep" alone.

- 62. Transitive Verbs used Intransitively.—There are two ways in which Transitive verbs can become Intransitive:—
- (a) When the verb is used in such a general sense that no object or objects are thought of in connection with it:—

Transitive Verb.
He never eats meat.
He writes a good letter.
I see a ship coming.

Intransitive Counterpart.

Men eat to preserve life.

He writes legibly.

A new-born child sees, but a kitten is born blind.

(b) When the Reflexive pronoun is omitted:—
He drew (himself) near me. He made (himself) merry.

The following are common examples of Transitive verbs which have acquired an Intransitive force by omitting the Reflexive pronoun:—

Transitive Verb.

Get you (=yourself) gone.

Give him a penny.

He obtained a place.

The fire burnt up the house. Do not stop me. They open the doors at nine. Intransitive Counterpart.
Get out of my way.
The shoe gives after it is worn.
This doctrine obtained (held its ground) for a long time.
He burnt with rage.
Let us stop here a little.
School opens at ten o'clock.

Transitive Verb.

Intransitive Counterpart. The day breaks at six.

A man breaks stones with a hammer.

The ox drew this cart.

Move away this stone. He broke up the meeting. The mouse steals food.

They bathed the child. He rolls a ball down the hill.

He burst the door open. Bad men hide their faults.

He turned me out of the room.

They keep the boat on the left bank.

He sets the school in order. He feeds the horse on grain. They shook down the fruit.

He drew near to me.

Move on a little faster. School broke up at three.

The mouse steals into its hole.

Let us hathe here. The ball rolls down the hill.

The storm has burst.

Bats hide during the day. He turned to me and spoke.

They drop the boat into the water. Rain drops from the sky. The boat keeps on the left bank.

> The sun sets at six P.M. Many men feed on rice. He shook with fear.

62a. Intransitive Verbs used Transitively.—Intransitive verbs are sometimes used in a causal sense. The verb in such a case, though Intransitive by nature, becomes for the time Transitive.

Intransitive

A bird flies.

Wheat grows in this field.

The horse ran round the field. The horse trots. Let the horse walk. The tub is floating.

Causal or Transitive.

He is flying a kite (causing it to fly).

They grow wheat in this field (cause it to grow).

He ran a thorn into his hand. They trotted out the horse. Let us walk the horse a little. They floated the tub on the river.

There are a few Intransitive verbs, which change the inside vowel to denote causation :-

Intransitive.

The tree falls. The sun will rise at six. The cow lies on the grass. We must not sit here. He will fare well.

Transitive.

He fells the tree with an axe. I cannot raise this box. The man lays down his coat. He set the books in order. He will ferry me across.

Intransitive.
The enemy quails.
The fish bite well to-day.
His chains clink on him.

Transitive.
He quells the enemy.
I took care to bait them well.
Help me to clench this nail.

- 63. Verbs that require a Complement.—A word or combination of words that supplies what is still needed to complete the sense partially expressed by the verb is called the Complement of that verb. The word "complement" means that which fills up a gap. A verb that requires a complement may be either (a) Transitive or (b) Intransitive.
- (a) Transitive verbs. Such verbs not only take an object, as all transitive verbs do, but require the help of some other word or words to supply what has still to be said about the object. Verbs of making, naming, finding, declaring, considering, supposing, etc., all belong to this class.

Subject.	Verb.	Object.	Complement.
The citizens	made	him	their leader.
The judge	set	the prisoner	free.
They	found	their friend	hard at work.
The jury	declared	the accused	to be innocent.

(b) Intransitive verbs. Verbs of being, becoming, seeming, turning out, continuing, etc., belong to this class.

Subject.	Verb.	Complement.
That vagrant	turned out	a thief.
The results	are	out (=published).
This ring	was	of much value.
He	continued	to be very prosperous.
The horse	had become	very tired.

In examples (a) the complement is said to be **objective**, because it helps the verb to say something about its object. In examples (b) the complement is said to be **subjective**, because it helps the verb to say something about the subject.

Note.—Complete and Incomplete Predication.—A verb that makes a complete sense, so that nothing more need be added to it, is called a verb of Complete Predication; as Hogs grunt. All such verbs are Intransitive.

CHAPTER IX -THE PARTS OF A FINITE VERB

64. Finite and non-Finite. — The various different forms that a verb can take are subdivided under two main headings: I. The Finite; II. The non-Finite. present chapter deals with the Finite only.

Any part of a verb can be called Finite, which is limited or bound to some Subject. The word Finite means

"limited."

(1) The tree fell (Finite). (2) The falling tree (non-Finite). In (1) the verb fell is limited to its Subject "tree." In (2) the verb falling has no Subject, and therefore it is non-Finite.

On the meaning of the word Subject see § 12, Note.

- 65. The Finite moods.—" Mood" is the form assumed by a verb to show the mode or manner in which the action denoted by the verb is represented. There are three Finite moods:--
 - I. Indicative. II. Imperative. III. Subjunctive.
- I. In the Indicative mood we assert some action as a fact, or announce it as a condition, or ask some question about it :-

He comes (fact). If he comes (condition). Did he come? (question).

II. In the Imperative mood we command or advise some action or entreat some one to do the action :-

> Leave the room. (Command.) This is the best course; follow it. (Advice.) Help me, if you can. (Entreaty.)

In these three examples the Subject "thou" or "you," though not mentioned, is implied.

III. In the Subjunctive mood we express some action, not as a fact, but as a condition which implies a doubt, or as a desire, or as a purpose :--

Sesjonetive - Assumes the role of

If he come (older form) . (Condition or Supposition.) If he should come May he come! . . . (Desire or wish.) He eats that he may live . (Purpose.)

Note.—The Subjunctive mood is sometimes called the "Conditional" mood because condition is the main, though not the only, idea that it expresses. It is called "Subjunctive," because the sentence in which it occurs is generally (not always) subjoined to some other sentence.

66. Number and Person.—The number and person of a Finite verb depend upon the number and person of its Subject :-

(If the Subject is Singular, the verb must be Singular; Number. as, Rain is falling.

If the Subject is Plural, the verb must be Plural; as,

Raindrops are falling.

If the Subject is in the First Person, the verb must be in the First person; as, I see. We come.

Person. If the Subject is in the Second person, the verb must be in the Second person; as, Thou seest. You see.

If the Subject is in the Third person, the verb must be in the Third person; as, He sees. They see.

Note.—The agreement of a Finite verb in number and person with its Subject is called a Concord.

- 67. Tense.—" Tense" is the form assumed by a verb for showing—(a) the time in which an event occurs; (b) the degree of completeness ascribed to an event at the time of its occurrence.
- (a) Now as regards the question of time the verb may tell you-
 - (1) That an action is done in Present time; as, He comes.
 - (2) That it was done in Past time; as, He came.
 - (3) That it will be done in Future time; as, He will come.
- (b) As regards the question of completeness, there are four different degrees, which give rise to four different forms of Present, Past, and Future time:-
 - I. Indefinite; which denotes Present, Past, or Future

time in its simplest form, the degree of completeness being left indefinite; as, I see, I saw, I shall see.

II. Continuous; which denotes that the event (in Present, Past, or Future time) is still continuing, or not yet complete; as, I am seeing, I was seeing, I shall be seeing. (This is sometimes called the Imperfect form of tense.)

III. Perfect; which denotes that the event (in Present, Past, or Future time) is in a completed or perfect state; as,

I have seen, I had seen, I shall have seen.

IV. Perfect Continuous; which combines the force of the two preceding forms; as, I have been seeing, I had been seeing, I shall have been seeing.

68. Voice is that form of a verb which shows whether what is named by the Subject does something or has some-

thing done to it.

In the Active voice the person or thing denoted by the Subject is said to do something to some other person or thing (The word active from Latin ag-o, ac-tum, means "doing.")

Tom threw a ball.

In the **Passive** voice the person or thing denoted by the Subject is said to *suffer* something from some other person or thing. (The word *passive* from Latin *pat*-ior, *pass-us*, means "suffering.")

A ball was thrown by Tom.

Note 1.—It will be seen from these examples that when the verb of a sentence is changed from Active to Passive, the object of the Active verb becomes the subject of the Passive one.

Note 2.—An Intransitive verb has no Passive voice, unless it takes a Cognate object (§ 95) in the Active. Even then the Passive can be used only in the third person:—"I ran a race"; "a race was run by me."

69. Conjugation of the Finite moods. — The conjugation of a verb in the Finite moods, Active and Passive, is shown in the following tables. It will be observed that the only tenses formed by inflection, that is, without the help of Auxiliary verbs, are the Present and Past Indefinite, and these only in the Active voice.

A. ACTIVE VOICE OF DO I.—Indicative Mood

Ţ	Tense.	1st Person.	Singular. 2nd Person.	3rd Person.	Plural. 1st, 2nd, 3rd Persons.	ersons.
Present	Indefinite . Continuous Perfect .	do am doing have done have been doing	doest or dost ¹ art doing hast done hast been doing	does is doing has done has been doing	do are doing have done have been doing	80
Past	Indefinite . Continuous Perfect . Perfect .	did was doing had done had been doing	didst wast doing hadst done hadst been doing	did was doing had done had been doing	did were doing had done had been doing	مح
	Indefinite .	shall do	wilt do	will do	$\begin{array}{c} \text{1. shall} \\ \text{2, 3. will} \end{array} \bigg\} \text{do}$	0
Fufure	Continuous	shall be doing	wilt be doing	will be doing	<u> </u>	be doing
	Perfect .	shall have done	wilt have done	will have done	<u> </u>	have done
	Perf. Cont.	shall have been doing	wilt have been doing	will have been doing		have been doing
	[Indefinite .	should do	wouldst do	would do	1. should de 3. 3. would	op
Future	Continuous	should be doing	wouldst be doing	would be doing	_	be
Past	Perfect .	should have done	wouldst have done would have done	would have done	should 3. would	have
	Perf. Cont.	should have been doing	wouldst have been would have been doing	would have been doing		have been doing
		Dost is used only when	Doef is used only when the verb is Auxiliary; as "Thou dost arise."	"Thou dost arise."		

II.—Subjunctive Mood

1st Person.	Indefinite . do Continuous be doing Perfect . have done Perf. Cont. have been doing	(Same as Indic.) were doing (Same as Indic.)
Singular. 2nd Person.	do be doing have done have been doing	(Same as Indic.) wert doing (Same as Indic.) (Same as Indic.)
3rd Person.	do be doing have done have been doing	(Same as Indic.) Were doing (Same as Indic.) (Same as Indic.) (Same as Indic.)
Plural. 1st, 2nd, 3rd Persons.	do be doing have done have been doing	(Same as Indic.) Were doing (Same as Indic.) (Same as Indic.) (Same as Indic.)

B. PASSIVE VOICE OF See

This, if we omit the Past Participle "seen," gives a complete conjugation of the Finite forms of the verb " to be."

I.—Indicative Mood

Te	Tense.	1st Person.	Singular. 2nd Person,	3rd Person.	Plural. 1st, 2nd, 3rd Persons.
Present	(Indefinite . Continuous Perfect . Perf. Cont.	am seen am being seen have been seen (None)	$\begin{array}{c} \text{art seen} \\ \text{art being seen} \\ \text{hast been seen} \\ (Nome) \end{array}$	is seen is being seen has been seen (None)	are seen are being seen have been seen $(Nome)$
Past	Indefinite . Continuous Perfect . Perf. Cont.	was seen was being seen had been seen (None)	$\begin{array}{c} \text{wast seen} \\ \text{wast being seen} \\ \text{hadst been seen} \\ (None) \end{array}$	was seen was being seen had been seen (None)	were seen were being seen had been seen $(None)$
Future	Indefinite . Continuous Perfect .	shall be seen $(None)$ shall have been seen	wilt be seen (None) wilt have been seen	will be seen $(None)$ will have been seen	$egin{array}{ll} & \mathrm{shall} & \mathrm{be} \\ 2, 3. & \mathrm{will} & \mathrm{seen} \\ & (None) \\ 1. & \mathrm{shall} & \mathrm{have} \\ 2, 3. & \mathrm{will} & \mathrm{been} \\ \end{array}$
	Perf. Cont. (Indefinite.	(None) should be seen	(None) wouldst be seen	(None) would be seen	(None) 1. should be 2. 3. would seen
Future in the Past	Continuous Perfect .	(None) should have been seen	(None) wouldst have been seen	(None) would have been seen	
	Perf. Cont.	(None)	(None)	(None)	(None)

II.—Subjunctive Mood

	Tense.	1st Person.	Singular. 2nd Person.	3rd Person.	Plural. 1st, 2nd, 3rd Persons.
Present	Indefinite . Continuous Perfect . Perf. Cont.	be seen (Same as Indic.) have been seen (None)	be seen (Same as Indic.) have been seen (None)	be seen (Same as Indic.) have been seen (None)	be seen (Same as Indic.) have been seen (None)
Past	Indefinite . Continuous Perfect . Perf. Cont.	were seen were being seen (Same as Indic.) (None)	wert seen wert being seen (Same as Indic.)	were seen were being seen (Same as Indic.) (None)	were seen were being seen (Same as Indic.)

Exercise 9

Point out the Voice, Mood, Tense, Number, and Person of every Finite verb noted below:—

1. Come and tell me what you have heard. 2. If you should be at home when I call at your house, I shall be glad. 3. He came to my house at four o'clock in the afternoon. 4. You will be killed, if that stone falls upon your head. 5. Why were these books brought to me? 6. My father will not return for some time. 7. If he should return to-morrow, I should be much surprised. 8. Will you come soon to see me? 9. He told them to call for him at four o'clock. 10. Put away the books, and shut the door of the room. 11. The cow is a quiet and useful animal. 12. Oxen draw the plough. 13. I see four men coming. 14. They see the sun rising. 15. We see the hills in the distance. 16. Thou art the wisest man in the room. 17. The horse carries its rider. 18. That the horse is lame is seen by all of us. 19. How to do this was not understood.

Exercise 10

- (a) Change the following sentences from the Active voice to the Passive:—
- 1. A cat chased a mouse, and a dog chased the cat. 2. He brought six apples for me. 3. The lower animals do not need tools. 4. But they possess limbs as useful to them as tools. 5. Man alone knows how to make tools. 6. God has given no such mind to other animals. 7. We must find out the reasons of things. 8. This king conquered that. 9. Who made you and all the world?
 - (b) Change the following sentences from Passive to Active:
- 1. The shops are closed by all the dealers. 2. This book was brought here by my servant. 3. The roof of the house was blown off by the wind. 4. The ripening wheat was destroyed by a storm of hail. 5. The soil of the earth is made fertile by rain. 6. That fine tree was split by lightning. 7. The walls of the house were cracked by an earthquake in several places. 8. The men were ordered by the king's messengers to go away. 9. Four men must be sent by us to the market. 10. How to spell, read, and write is known by man alone. 11. His death was bewailed by all of us.

69a. Verbs Active in form, but Passive in sense.—
(a) Transitive verbs in the Active voice are sometimes used in a Passive sense, with an adjective or other word placed after them as complement.

The stone feels rough (is rough when it is felt). Honey tastes sweet (is sweet when it is tasted).

The milk smells sour (is sour when it is smelt).

Your blame *counts* for nothing (is worth nothing when its value is counted).

Your letter reads well (sounds well when it is read).

That cloth will wear thin (become thin when it is worn).

(b) In the above examples every verb has an adjective or other word placed immediately after it as complement. But Transitive verbs in the Active voice can sometimes be used in a Passive sense even when there is no other word placed after them as complement.

This house does not let (is not taken when it is meant to be let). That horse does not sell (is not bought when it is meant to be sold).

(c) Verbs in a Continuous form of tense, Active voice, are often used in a Passive sense.

The house is building (is being built). The trumpets are blowing (are being blown). The drums are beating (are being beaten). The book is printing (is being printed).

Note.—As regards the examples shown under (c) we are now obliged to parse the verb as being in the Present Continuous tense, because it can be qualified by an adverb: "The house is rapidly building." Originally, however, the construction was "The house is a-building," or "The house is in building." Here "building" is a gerund or verbal noun, preceded by the preposition in, which was carelessly pronounced as a and finally dropped altogether.

- 69b. Uses of some of the Tenses.—Something has yet to be said about the main uses of some of the tenses in the Indicative mood. The main uses of the Imperative and the Subjunctive have been described already in § 65.
- (a) The Present Indefinite.—This tense can be used to denote—

CHAP. IX

- (1) What is always and necessarily true:—

 The sun shines by day and the moon by night.
- (2) What is habitual in life or character:—

 He keeps his promises. He has good health.
- (3) What is present, if this is helped by the context:—
 I understand what you say. The door is open.
- (4) What is future, if this is helped by the context:—
 When do you (=will you) start for York?
- (5) What is past, provided that the event is known to be past. (This is called the Historic or Graphic Present.)

 The Moghul now leads his men through the Khyber

Pass, and enters the plains of India.

(b) The Present Perfect.—This tense connects a past event in some sense or other with present time:—

The British empire in India has succeeded to the Moghul.

Observe the force of has. It implies that the British empire not only succeeded to the Moghul as an event of past history, but that it is the living successor to this day.

(c) The Past Perfect.—This tense (called also the Pluperfect) is never used, except when we wish to say that some action was either completed or supposed to have been completed, before another was commenced:—

I had been ill two days, when the doctor came. (Fact.)

If I had seen him, I should have known him. (Supposition.)

(d) The Future Perfect.—This tense denotes the completion of some event either in Future time or in Past time.

You will have arrived before the rain sets in. (Future.)

You will have heard the news; so I need not tell you. (Past.)

It seems like a contradiction to make a Future tense have reference to anything Past. But the future tense here implies an inference. You will have heard means "I infer or believe that you have heard."

- (e) The Future in the Past and the Future Perfect in the Past.—These tenses describe an action which at some past time was viewed as future: I told you I should do so.
- (f) Shall and Will in Future Tenses.—The uses of shall and will are explained below in § 80.

CHAPTER X.—PARTS OF A VERB THAT ARE NOT FINITE

70. Non-Finite parts of a Verb.—Any part of a verb which is not connected, and from the nature of its meaning cannot be connected, with a Subject, comes under the

heading of non-Finite (§ 64).

The non-Finite parts of a verb are three in number:—
(1) the In-fin-i-tive mood; as, "I wish to retire";
(2) a Par-ti-cip-le; as, "A retired officer"; (3) a Gerund; as, "I think of retiring." Not one of the three forms here noted can have a noun or pronoun placed before it as Subject, and hence not one of them is a Finite part of the verb "retire."

71. Infinitive.—The Infinitive mood is that part of the verb which names the action without reference to any doer. It may denote either Present or Past time:—

 $Present \begin{cases} Indefinite & . & To send & To be sent. \\ Continuous & . & To be sending & (None.) \\ Perfect & . & To have sent & To have been sent. \\ Perf. Contin. & To have been sending & (None.) \end{cases}$

The Infinitive is usually preceded by "to," but not always. "To" is not used after the verbs hear, see, feel, make, let, bid, watch, behold, know; nor after the Auxiliary verbs shall, will, may, do; nor after the verbs must, can; nor after the negative forms need not, dare not:—

I hear thee *speak* of the better land. You need not *send* these books to me. I do *hope* that you will *return* soon. Let me *see* what you have done.

Note 1.—Observe the last example "let me see." Here let is the second person Imperative—the only person which can be expressed by a verb in the Imperative mood. To express the first or third person, we use the verb "let" in such forms as "let me see," "let him see." In all such examples "see" is in the Infinitive mood.

Note 2.—A full account of the uses of the Infinitive is given in Chapter XX. This can be studied afterwards.

72. Participle.—A Participle (when it is not part of a tense) is a Verbal adjective, that adds to the meaning of some noun or pronoun as ordinary adjectives do. It may denote either Present or Continuous or Past time :-

Active voice. Passive voice.

Present or Continuous . Loving Being loved.

Past . . . (None) Loved.

. Having loved Having been loved. Perfect .

Note.—The form loving stands for both Present and Continuous time. These are not the same in meaning :--

(a) Hearing this he was much surprised . (Present.)

(b) He went away sorrowing . . . (Contin.)

In (a) the action denoted by hearing is completed. In (b) the action denoted by sorrowing is continuous.

We have no form of Participle to express Future time. This is expressed by the Infinitive; as, "The world to come." To express a near Future, we add the words about or going to the Infinitive :-

> The house is about to fall. The house is going to fall.

We may express a very near Future by the following phrase:-The house is on the point of falling.

- 73. Double Character of Participles. A Participle is in one respect a verb, in another an adjective :-
- (a) It is a verb, because (if the verb is Transitive) it can be followed (like a Finite tense) by an object :-

Having eaten his dinner, he returned to work.

- (b) It is an adjective or like an adjective, because (1) it can have degrees of Comparison as ordinary adjectives have; and (2) it is connected with some noun or pronoun, as ordinary adjectives are :-
 - (1) Faded (Positive); more faded (Comp.); most faded (Superl.).

(2) Having eaten his dinner, he returned to work.

Note.—Such words are called participles, because they participate in the nature of verbs and also in the nature of adjectives.

Exercise 11

Pick out every Infinitive and every Participle in the following sentences, and say what time it denotes:—

- 1. I saw him take aim with his bow. 2. Being tired of work the men went home. 3. I feel the cold air strike against my face. 4. The returned soldier was received gladly by his parents. 5. Grazing in the fresh grass, the lambs soon became strong. 6. To stay awake at night is bad for health. 7. A vicious and kicking horse gives much trouble to its master. 8. He dared not say this in open day. 9. Pleased at seeing me return, he made me come and sit by his side. 10. I have often known him laugh for nothing. 11. The boy that you see there painting a picture is my brother. 12. My wife, expecting me to return shortly, did not leave the house. 13. A man-eating tiger must be shot at once, if you can do it. 14. I was told that I might go away, and so I went. 15. He hears his daughter singing a new song. 16. The days of our youth are passed, never to return to us again.
- 74. Gerund.—A Gerund is a kind of noun which names the action or state denoted by the verb. It has four forms,—two for the Active voice, and two for the Passive:—

Active. Passive.

Present or Continuous Loving Being loved.

Perfect . . Having loved Having been loved.

The forms, then, are identical with those of the Participle; but their use is entirely different. A Gerund is a

Exercise 12

In the following sentences, say whether the words noted below are Gerunds or Participles:—

kind of noun; a Participle is a kind of adjective.

1. The oats will grow well in the coming rains. 2. We heard of his coming back to-day. 3. Did you hear of his having won a prize? 4. The boy, having won a prize, was much praised. 5. She was fond of being admired. 6. Being admired by all, she was much pleased. 7. The cow, having been killed by a tiger yesterday, could not be found. 8. The boy was ashamed of having been beaten in class by his sister. 9. I am tired of doing this work. 10. Doing this work every day, you will soon improve.

- 11. Spelling is more difficult than writing. 12. He was in the habit of boasting of his eleverness. 13. A boasting man is much despised. 14. He was pleased at having found his son. 15. Having found his son, he was very much pleased. 16. Foxes do not enjoy being hunted, but men enjoy hunting them. 17. The fox being hunted fled into its hole.
- 75. Double Character of Gerunds.—A Gerund is in one respect a verb, in another a noun:—
- (a) Ît is a noun, because it has all the uses of a noun; for it can be the Subject, Object, or Complement to a verb, or the Object to a preposition:—

Spelling is more difficult than writing . . (Subject to verb.)
He teaches spelling with much success . . (Object to verb.)
The hardest thing to learn is spelling . . (Compl. to verb.)
He is very clever at spelling English words . (Obj. to prep.)

(b) It is a verb, because it can express Present or Past time, and can be in the Active or Passive voice (for examples see § 74). Moreover, if the verb is Transitive, it requires an Object in the same way that the Finite forms of the verb do:—

He made two mistakes in spelling that word.

Here "word" is the Object to the verb "spelling."

75a. If we place of after "spelling," and an article before it, then "spelling" is a pure noun, and not a verb at all.

He made two mistakes in the spelling of that word.

Here "spelling" is a pure noun, and "that word" is not the Object of "spelling," but of the preposition "of."

CHAPTER XI.—STRONG AND WEAK VERBS

76. Verbs are distinguished into Strong and Weak according to the manner in which they form the Past tense and the Past Participle. (Sometimes, but with less propriety, Strong verbs are called Irregular, and Weak verbs Regular.)

I. How to tell a Weak verb from a Strong:

(a) All verbs, whose Past tense ends in a -d or -t, which is not in the Present tense, are Weak:-

Live, live-d. Fan, fann-ed. Carry, carri-ed. Plunge, plunge-d. Sleep, slep-t. Burn, burn-t. Shoe, sho-d. Flee, fle-d. Pav. pai-d. Bend, ben-t. Build, buil-t. Send, sen-t. Gird, gir-t or gird-ed. Think, though-t. Work, wrough-t. Sell, sol-d. Owe, ough-t or owe-d.

(b) All verbs, whose Past tense is formed by shortening the vowel of the Present tense, are Weak:-

Bleed, bled. Shoot, shot. Lead, led. Light, lit or light-ed.

(c) All verbs, whose Past tense is the same as the Present, are Weak :-

Cut, cut. Hurt, hurt. Put, put. Rid, rid. Spread, spread.

- II. How to tell a Strong verb from a Weak:—
- (a) All verbs, which form the Past tense by changing (not merely shortening) the inside vowel, and do not add on a final -d or -t, are Strong:
 - Fight, fought: (but "buy, bough-t" is Weak, because, after changing the inside vowel, it adds a final -t). Hold, held. Stand, stood. Sit, sat. Find, found. Drive, drove.
- (b) All verbs, which form the Past participle in -en or-n, are either wholly or partly Strong :-

Wholly.—Draw, drew, draw-n. Shake, shook, shake-n. Slay, slew, slai-n.

Partly.—Saw, saw-ed, saw-n. Cleave, clef-t, clov-en. Lade, lade-d, lade-n.

Observe that the verbs in the last two lines are Weak in the Past tense and Strong in the Past participle. These might very properly be classed as "Mixed," partly Weak and partly Strong.

77. Lists of Strong Verbs.—Though we have many Strong verbs still left, yet the Strong conjugation is practically obsolete, because (1) no new verbs (i.e. verbs imported into English from any foreign source) have ever been so conjugated, (2) many verbs that were once Strong have become Weak.

Group I (50 verbs).—Final -n or -en retained in Past Participle

Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Arise	arose	arisen	Grow	grew	grown
Bear (pro-	bore	born	Hide	hid	*hidden,
duce)					hid
Bear	bore	borne	Know	knew	known
(carry)			Lie	lay	lain
Beget	begot,	begotten,	Ride	rode	ridden
	begat	begot	Rise	rose	risen
Bid	bade,	bidden,	See	saw	seen
	bid	bid	Shake	shook	shaken
Bind	bound	*bounden,	Shrink	shrank	*shrunken,
		bound			shrunk
Bite	bit	bitten, bit	Sink	sank	*sunken,
Blow	blew	blown			sunk
Break	broke	broken	Slay	slew	slain
Chide	chid	chidden,	Slide	slid	slidden.
		chid			slid
Choose	chose	chosen	Smite	smote	smitten,
Draw	drew	drawn	- 1		smit
Drink	drank	*drunken,	Speak	spoke	spoken
		drunk	Steal	stole	stolen
Drive	drove,	driven	Stride	strode	stridden
	drave		Strike	struck	*stricken,
Eat	ate	eaten			struck
Fall	fell	fallen	Strive	strove	striven
Fly	flew	flown	Swear	swore	sworn
Forbear	forbore	forborne	Take	took	taken
Forget	forgot	forgotten	Tear	tore	torn
Forsake	forsook	forsaken	Throw	threw	thrown
Freeze	froze	frozen	Tread	trod	trodden,
Get	got	*gotten,			\mathbf{trod}
		got	Wear	wore	worn
Give	gave	given	Weave	wove	woven
Go, wend	`went	gone	Write	wrote	written

Note.—The seven participles marked * are now chiefly used as adjectives, and not as parts of a tense :—

Adjective.
Our bounden duty.
A drunken man.
A sunken ship.
A stricken deer.
The shrunken stream.
Ill-gotten wealth.
A hidden meaning.

Part of some Tense.

He was bound by his promise.

He had drunk much wine.

The ship had sunk under the water.

The deer was struck with an arrow.

The stream has shrunk in its bed.

He got his wealth by ill means.

The meaning is hid or hidden.

Group II (32 verbs).—Final -n or -en lost in Past Participle

Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Abide	abode	abode	Sing	sang	sung
Awake	awoke	awoke ¹	Sit	sat	sat
Become	became	become	Sling	slung	slung
Begin	began	begun	Slink	slunk	slunk
Behold	beheld	beheld, be-	Spin	spun	spun
		holden ²	Spring	sprang	sprung
Cling	clung	clung	Stand	stood	stood
Come	came	come	Stick	stuck	stuck
Dig	dug	dug	Sting	stung	stung
Fight	fought	fought	Stink	stank	stunk
Find	found	found	String	strung	strung
Fling	flung	flung	Swim	swam	swum
Grind	ground	ground	Swing	swung	swung
Hold	held	held	Win	won	won
Ring	rang	rung	Wind	wound	wound
Run	ran	run	Wring	wrung	wrung
Shine	shone	shone			

Group III.—Mixed or Strong-Weak Verbs (29 in number)

Present Tense.	Past Tense.	Past Participle.
Beat	beat	beaten
Cleave (split)	clave, cleft	*cloven, cleft
Climb	clomb, climbed	climbed
Crow	crew, crowed	crowed, crown (rare)
Do	did	done
Grave	graved	*graven, graved

¹ Awaked is less common. Awake is Intransitive. The Transitive form of the verb is awaken.

² "Beholden" means "indebted."

Past Tense.	Past Participle.
hung, hanged	hung, hanged
heaved, hove	heaved, hove
hewed	*hewn, hewed
laded	laden
melted	*molten, melted
mowed	mown
proved	†proven, proved
rived	riven
rotted	*rotten, rotted
sawed	sawn
seethed	*sodden, seethed
sewed	*sewn, sewed
shaped	†shapen, shaped
shaved	shaven
sheared	*shorn, sheared
showed	shown
sowed	sown
stove, staved	stove, staved
strewed	strewn or strown
swelled	swollen
throve, thrived	thriven, thrived
washed	*washen, wasl ed
writhed	†writhen, writhed
	hung, hanged heaved, hove hewed laded melted mowed proved rived rotted sawed seethed sewed shaped shaved shaved stove, staved strewed swelled throve, thrived washed

Note 1.—The participles marked * are now chiefly used as adjectives, and not as parts of a tense :-

Adjective. A graven image. A molten image. A rotten plank. The sodden flesh. A well-seym cloth. Un-washen hands. A shorn lamb. A hewn log.

Part of some Tense. The image was engraved with letters. The image was melted with heat. The plank was rotted by water. The flesh was seethed in hot water. I have sewed or sewn it. I have washed my hands.

The lamb was sheared to-day. The log is hewed or hewn.

Note 2.—The participles marked † are almost obsolete.

¹ The Intransitive verb is conjugated in the Strong form only. The Transitive verb is conjugated in both forms. Hanged means "killed by hanging"; as, "The man was hanged." Hung is used in a general sense; as, "He hung up his coat."

- 78. Lists of Weak Verbs.—The mode of adding the suffix of the Past tense is not uniform; and the two rules given below should be observed:—
 - (1) If the verb ends in e, then d only is added; as—
 Live, lived (not liveed).

 Clothe, clothed (not clotheed).

To this rule there is no exception.

(2) The final consonant is doubled before ed, provided (a) that the final consonant is single; (b) that it is accented or monosyllabic; (c) that it is preceded by a single vowel; as—

Fan, fanned (not faned); drop, dropped (not droped). Compel, compelled; control, controlled; confer, conferred.

But in a verb like *lengthen*, where the accent is not on the last syllable, the Past tense is *lengthened*; in a verb like *boil*, where the vowel is not single, the Past tense is *boiled*; and in a verb like *fold*, where the last consonant is not single, the Past tense is *folded*.

To this rule there are very few exceptions. One exception occurs in the final l. The final l is doubled, even when it is not accented; as, travel, travelled (not traveled).

Group I.—Shortening of Inside Vowel: Past tense in t

	4	0 0			
Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Creep	crept	crept	Feel	felt	felt
Sleep	slept	slept	Kneel	knelt	knelt
Sweep	swept	swept	Smell	smelt	smelt
Keep	kept	kept	Spell	\mathbf{spelt}	spelt
Weep	wept	wept	Lean	lĕant	lĕant
Burn	burnt	burnt		or lean	ed or leaned
Deal	$\mathbf{d}\check{\mathbf{e}}alt$	dĕalt	Mean	mě a n t	mě a n t
Dream	${ m dr}reve{a}{ m mt}$	$\mathrm{dr}\check{\mathrm{e}}a\mathrm{mt}$	Spill	Spilt	spilt
	or dreamed o	r dreamed	Spoil	spoilt	spoilt
Dwell	dwelt	dwelt		or spoiled	or spoiled

Exceptional Verbs.—Make, made, made. Have, had, had. Hear, heard, heard. Leave, left, left. Cleave, cleft, cleft. Lose, lost, lost. Shoe, shod, shod. Flee, fled, fled. Say, said, said. Lay, laid, laid. Pay, paid, paid.

Group II.—Changing of Inside Vowel

Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Beseech	besought	besought	Work	wrought,	wrought,
Bring	brought	brought		or worked	or worked
Buy	bought	bought	Owe	ought	owed
Catch	caught	caught		or owed	
Seek	sought	sought	Dare	durst	dared
Sell	sold	sold		or dared	
Teach	taught	taught	Can	could	(None)
Tell	told	told	Shall	should	(None)
Think	thought	thought	Will	would	(None)
			May	might	(None)

Clothe, clothed or clad, clothed or clad.

Group III. - Verbs ending in d or t

Verbs ending in d or t in the Present tense have discarded the d or t of the Past tense, to avoid the repetition of d or t.

(a) Some verbs in this group have the three forms (Present tense, Past tense, and Past Participle) all exactly alike:—

Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Burst	burst	burst	Shut	shut	shut
Cast	cast	cast	Slit	slit	slit
Cost	cost	cost	Spit	spit or spat	spit
Cut	cut	cut	Split	split	split
Hit	hit	hit	Spread	spread	spread
Hurt	hurt	hurt	Sweat	sweat	sweat
Let	let .	let	Thrust	thrust	thrust
Put	put	put	Bet	bet	bet
Rid	rid	rid	Quit	quit	quit
Set	set	set		or quitted	or quitted
Shed	shed	shed	Knit	knit	knit
Shred	shred	shred		or knitted	or knitted

Note.—"Spit" is a Weak verb, although it has a form spat for the Past tense. In Anglo-Saxon the Present also had two forms.

(b) Other verbs in this group end in d in the Present tense, but form the Past tense and Past Participle by

changing d into t. (There are at least nine such verbs in English.)

Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Bend	bent	bent, bended	Rend	rent	rent
Build	built	built	Send	sent	sent
Gild	gilt, gilded	gilt	Spend	spent	spent
Gird	girt, girded	girt	Wend	went	(None)
Lend	lent	lent			

Exceptions:—end-ed, mend-ed blend-ed, or blent, defend-ed.

(c) Other verbs of this group have the three forms all alike, except that they shorten the vowel in the Past forms:—

Present	Past	Past	Present	Past	Past
Tense.	Tense.	Part.	Tense.	Tense.	Part.
Bleed	bled	bled	Lead	led	led
Breed	bred	bred	Read	read	read
Feed	\mathbf{fed}	fed	Light	lit, lighted	lit, lighted
Speed	sped	sped	Shoot	shot	shot
Meet	met	met			

Exercise 13

In the following sentences say whether the verb italicised is Strong, Weak, or Mixed:—

1. The ox fell into a well. 2. The bubble burst as soon as it was pricked. 3. We sought for him in vain. 4. I felt very sorry, when I heard that. 5. He meant everything that he said. 6. The lawn has been well mown. 7. The cock crew at four o'clock. 8. The prisoners fled as soon as the door of the jail was thrust open. 9. You could not do that, if you tried. 10. A shorn lamb feels a cold wind. 11. Who steals my purse steals trash.—SHAKESPEARE. 12. The evil that men do lives after them; the good is oft interred with their bones.—SHAKESPEARE. 13. The wind blows cold and fresh from the tops of hills. 14. Never forget a kindness. 15. Owe no man anything.—New Test. 16. Know then thyself, and seek not God to scan.—Pope. 17. What I have written I have written.—New Test. 18. Solomon built him an house.—New Test. 19. There is a hidden meaning

in his words. 20. Stick to your point. 21. Abide with us; fast falls the eventide.—Keble. 22. I have fought a good fight; I have kept the faith.—New Test. 23. Men will reap as they sow. 24. Hope springs eternal in the human breast.—Pope. 25. On whomsoever it shall fall, it will grind him to powder.—New Test. 26. There's a divinity that shapes our ends, rough hew them how we will.—Shakespeare.

CHAPTER XII.—AUXILIARY VERBS

79. Six Auxiliary Verbs.—The Auxiliary verbs are have, be, shall, will, may, do. None but these six are rightly called Auxiliary, because none but these are used for helping other verbs to form those tenses, which cannot be formed by inflection.

(a) Observe that have and be, when these verbs are used for Auxiliary purposes, are always followed by Parti-

ciples :-

I have seen. I had seen. I am seeing. I was seeing.

(b) Observe that the other four, when they are used for Auxiliary purposes, are always followed by an Infinitive, and that the Infinitive is never preceded by "to":—

I shall go. He will go. May he go! I did not go.

The verb that is helped by an Auxiliary, as seen or seeing in (a) and go in (b), is called the **Principal** verb.

Note 1.—Auxiliary verbs not only assist Principal verbs, but they assist one another :—

I shall have been going. (Future Perfect Continuous.)

Here shall (which by rule (b) is followed by an Infinitive) helps have. Have (which by rule (a) is followed by a Participle) helps been. Been (which by rule (a) is followed by a Participle) helps the Principal verb going. Thus to form a Future Perfect Continuous tense three Auxiliary verbs are needed.

Note 2.—A Principal verb is sometimes called "Notional" because it has an independent meaning of its own. It expresses a complete *notion* or thought.

79a. Be.—This verb has three distinct uses :—

(1) As an Auxiliary verb. All tenses in the Passive voice and all Continuous tenses in the Active are formed with the help of this Auxiliary.

I am sent; I was sent. I am sending; I was sending.

(2) As a verb of incomplete predication. The verb to be sometimes couples or combines a noun or other kind of Complement with its Subject.

I was absent. They were at home. That man is a thief.

(3) As a Principal verb signifying existence.

The world is (exists). There are (exist) some who, etc.

79b. Have.—This verb has two distinct uses :—

(1) As a *Transitive* verb denoting possession and declined in all moods and tenses.

I have a dog. They will have a book.

- (2) As an Auxiliary verb. All the Perfect tenses, in all the Moods, Active and Passive, are formed with the help of this Auxiliary.
- 80. Shall, will.—These are the Auxiliaries used for forming the Future tense; for this tense cannot be formed by inflection, as the Present and Past can.

Take note that the Future tense is formed with shall in the First person, and with will in the Second and Third persons.

Singular I shall go. | Thou wilt go. | He will go. | Plural We shall go. | You will go. | They will go.

If will is used in the First person, as "I will go," it expresses not merely future time, but intention. Thus "I will go" means "I intend to go." Here will is a Principal verb (not an Auxiliary), since it expresses a great deal more than future time and is equivalent to the verb "intend."

If shall is used in the Second or Third person, as "You shall go," "He shall go," it expresses not merely future time, but an order or a promise or a threat or a very confident prediction. Here shall is a Principal verb, not an Auxiliary, since it expresses a great deal more than future time.

81. May, might; should, would.—These are the Auxiliaries used for forming Subjunctive equivalents. Should and would are also used to form the Future in the Past Tense.

May and might are used to express a purpose. If the verb going before is in the Present or Future Indicative, we use may to express the Subjunctive. If the verb going before is in the Past Indicative, we use might to express the Subjunctive:—

He has worked hard (Present)
He will work hard (Future)
He worked hard (Past)

that he may win a prize.

that he might win a prize.

May is also used to express a wish or prayer—
May he live long and see not the grave!

Should and would (the Past forms of shall and will) are used to express a condition and its consequence:—

Condition. Consequence.

If he should meet me, he would know me.

82. Do, did.—These auxiliaries are used for forming the Present and Past tenses (Indefinite) of a Principal verb in the Indicative mood, whenever the Principal verb is used either (1) with a Negative, or (2) for asking a question:—

I do not see this.

Did he see it?

The verb "do" is also used for forming the Imperative of a Principal verb, whenever the Principal verb is used with a Negative:—

Do not come. Do not ask me any questions.

83. Auxiliary and Principal.—The verbs may, do, like the verbs have, be, shall, and will, are sometimes Auxiliary and sometimes Principal verbs:—

Auxiliary.

I have come.

He was praised.

He eats that he may live.

He did not go.

If he should come.

Principal.

I have (possess) a watch.

The earth is round.

He may (is permitted to) go away.

He did (performed) his work well. He should (ought to) keep his word.

Exercise 14

In the following sentences say whether the verb italicised is Principal or Auxiliary :-

1. I had a fine horse to show him: but he had gone away and could not see it. 2. That horse of yours is a fine creature, and is admired by every one who has seen it. 3. You shall leave the room, if you do not leave off making that noise. 4. Why did you refuse to speak? 5. You may read that book, if you wish to do so; but do not ask me to lend you another. 6. If you take a man's life, you shall be hanged. 7. Thou shalt not steal. 8. He shall receive his prize to-morrow, and I hope that all will be satisfied. 9. The spirit of my father grows strong in me, and I will no longer endure it. 10. Charles, I thank thee for thy love to me, which thou shalt find I will most kindly requite.—SHAKE-SPEARE.

CHAPTER XIII.—DEFECTIVE AND IMPERSONAL VERBS

84. Defective Verbs.—Among the six Auxiliary verbs there are three, namely have, be, do, that have all the forms of moods and tenses complete, whether they are or are not used for Auxiliary purposes.

The remaining three, namely (1) shall, should, (2) will, would, and (3) may, might, have no tenses but the Present and Past just given. These are therefore said to be Defective (that is, deficient in some of the forms that belong to other verbs).

Note.—The verb will, when it signifies to bequeath by will or testament, is not Defective, but is conjugated in all possible forms throughout. The Past Tense is then willed, not would.

To these three we must add three more Defective verbs, namely (1) can, could, (2) must, (3) ought,-all of which are in common use. Not one of these three verbs is an Auxiliary. They are all Principal verbs (Transitive), and the Infinitive that follows them is their object:-

- (i) I can or could (Trans. verb) go (Infin. object).
- (ii) I must (Trans. verb) go (Infin. object).
- (iii) I ought (Trans. verb) to go (Pres. Infin. object).
- (iv) I ought (Trans. verb) to have gone (Past Infin. object).

Note.—Avoid the common mistake of saying, "He didn't ought to have gone." This is very bad English. The Auxiliary did can never be used before ought; for it has been shown in § 79 that did as an Auxiliary is always followed by an Infinitive. But ought is not an Infinitive. It is a Past tense, an older form of "owed." The sentence should therefore be, He ought not to have gone.

85. Impersonal Verbs.—These take "it" for their Subject, and are followed by some Personal pronoun in the Accusative case, which in Personal verbs would be the Subject in the Nominative case:—

It shames me to hear this = I am ashamed to hear this.

It repents me of my folly = I repent of my folly.

It behoves me to do this=I ought to do this.

In the common phrase "methinks" (=it seems to me) the "it" is omitted and me is in the Dative case. The verb "thinks" is here an Old English verb signifying "seems," quite distinct from the verb think="imagine." The verbs, though now they are both spelt with i, were differently spelt in Anglo-Saxon,—the former with a y (thync-an), the latter with an e (thenc-an).

Note.—Besides the Defective verbs named in § 84, we may mention the following, some of which are now rarely used.

Beware; a compound of be + ware (=wary, cautious).

Dight, "adorned," Past Part. for dighted; rare.

Hight, "is or was named," Past tense of an obsolete verb;

used only in a Passive sense. Now seen only in poetry.

Quoth, "says" or "said," used only in the First or Third person, never in the Second. Properly the Past tense of an obsolete verb, Strong Conj., of which the Present form has survived in "be-queath."

Wis, wot (Pres.), wist (Past), "to know"; nearly obsolete. Wont, "accustomed." Past Part. of an obsolete verb.

Worth; as "Woe worth (=befall) the day." Subjunctive mood.

PART III.—PARSING AND SYNTAX

This Part assumes that the student has thoroughly mastered Parts I and II. The main points of both, so far as parsing is concerned, are recapitulated below; but the student should not be encouraged to repeat them by rote. He will remember them without effort, if he understands them thoroughly as he goes through them.

Kinds of Nouns

Noun: a word used for naming some person or thing.

Proper: a name given to one particular person or thing, and not intended to denote more than one person or thing at a time; as John, London, Windsor Castle, the Bible.

Common: a name that may stand for any number of persons

or things of the same kind; as man, city, castle, book.

Collective: a name given to a group, collection, or multitude; as herd, flock, class, library, pack.

Material: a name denoting some kind of matter or substance; as mutton, grass, fruit, bread, water, oil, grease, blacking.

Abstract: a name denoting some quality, state or action, apart from any object or objects; as hardness, fever, pride, humility.

Genders of Nouns

Masculine: denotes males, as father; Feminine, females, as mother; Common, either sex, as parent.

Neuter: neither sex (or things without life), as book, bread, fever.

Kinds of Pronouns

Pronoun: a word used instead of a noun. Or, a word which refers to some person or thing without giving a name to the person or thing referred to.

Personal: denotes the First person, as I, we; the Second, as thou, you; the Third, as he, she, it, they.

Possessive: mine, thine, his, hers, ours, etc.

Demonstrative: points to some noun previously mentioned. and is used instead of it, as "Health is better than wealth; this gives less happiness than that." Here this stands for wealth, that for health.

Note.—Such words are Pronouns, when they are used for some noun; Adjectives, when they are used with some noun expressed or understood. The former are substitutes for some noun, the latter qualify some noun.

Relative or Conjunctive: (1) relates to some noun or pronoun going before (which is called the Antecedent), and (2) joins its own sentence to the sentence of the Antecedent, as "I whom you speak of am here."

Interrogative: inquires about some person or thing; as "Who spoke? What did he say?"

Kinds of Adjectives

Adjective: qualifies a Noun, i.e. adds something to its meaning, so as to show more clearly what person or thing, or what kind of person or thing, the Noun is meant to stand for.

Proper: formed from a Proper noun, as English, French.

Descriptive: showing of what quality or in what state a thing is; as "a tame lion," "a fine house," "a thick forest."

Quantitative: showing how much of a thing is meant, as

"much bread," "a whole holiday," "a half holiday."

Numeral: showing how many things are meant (Cardinal); as "six houses": or in what numerical order a thing stands (Ordinal); as "the sixth house." If the number is not specified, as in "many houses," "a few houses," "all houses," the adjective is called Indefinite Numeral.

Demonstrative: showing which or what thing is meant, as "this house," "that man." (The articles a and the are Demonstrative Adjectives, though it is convenient to call them articles)

Interrogative: asking which or what thing is meant, as "which house?" "what man?"

Distributive: showing that things are taken separately or in separate lots, as "each person," "every word," "every six hours," "either side." (Every six hours = every space of six hours.)

Possessive: my, thy, his, hers, its, our, etc.

Degrees of Comparison

Positive: denotes the simple quality expressed by the adjective, as "a fat ox."

Comparative: denotes a higher degree of the quality, when one thing is compared with another of the same kind, as "a fatter ox."

Superlative: denotes the highest degree of the quality when one thing is compared with all other things of the same kind, as "the fattest ox."

Kinds of Adverbs

Adverb: qualifies, or adds something to the meaning

of, any kind of word except a noun or pronoun.

Simple: modifies the meaning of some verb, adjective, preposition, conjunction, or other adverb, by saying something about the quality, as "badly"; or the quantity, as "almost"; or the number, as "thrice"; or the time, as "then"; or the place, as "there"; or any other attendant circumstance.

Interrogative: makes some inquiry about the quality, as "how?" the quantity, as "how far (=to what extent)?" the number, as "how often?" the time, as "when?" or the place, as "where?"

Relative or Conjunctive: (1) modifies the verb of its own sentence, and (2) joins its own sentence to the sentence of its Antecedent; as, "Tell me the hour when you will come."

Kinds of Verbs, Subject, Object

Verb: a word used for stating a fact or a condition, giving an order or a request, or asking a question.

Transitive: denotes an action that is directed towards some person or thing; as "He shot a crow."

Intransitive: denotes an action that stops with the doer, and concerns no person or thing except the doer; as "He fell."

Auxiliary: assists a Principal verb (which may be either Transitive or Intransitive) to form some tense or tenses in the Indicative or Subjunctive mood and in the Active or Passive voice; as "I have come."

Subject: the word or words answering the question, Who or what does this? Who or what suffers this?

Object: the word or words answering the question, To whom or to what is the action of the verb directed?

Conjugations of Verbs

Weak: forms its Past tense by adding d or ed or t to the Present, and sometimes (besides adding d or ed or t) changes the inside vowel of the Present tense; as seek, sought; sell, sold. (Sometimes, but improperly, called Regular.)

Strong: never adds d or ed or t to the Present tense for forming its Past tense, but always changes the inside vowel of the Present tense; as drink, drank. (Sometimes, but im-

properly, called Irregular.)

Mixed: forms its Past tense as a Weak verb by adding d or ed or t, but forms its Past participle as a Strong verb by adding en or n; as mow, mowed, mown.

Voice

Active: when the verb is in the Active voice, the person or thing denoted by the Subject is said to do something; as I love.

Passive: when the verb is in the Passive voice, the person or thing denoted by the Subject is said to *suffer* something; as I am loved.

Finite Moods

Mood: the form assumed by a verb to show the *mode* or *manner* in which the action denoted by the verb is represented.

Indicative: asserts something as a fact, or as a condition; as "I came," "if he comes." Or it enquires about something; as, "Did he come?"

Imperative: commands, or advises, or begs for something; as come.

Subjunctive: expresses a condition, a purpose, or a wish,—any kind of contingency except a fact; as "if he come or should come" (condition); "that he may come" (purpose); "may he come!" (wish).

Tenses in the Finite Moods

Tense: the form assumed by a verb for showing (a) the time at which an event occurs, (b) the degree of completeness ascribed to an event at the time of its occurrence.

Indefinite: denotes Present, Past, or Future time in its simplest form, making no definite assertion about the degree of

completeness or incompleteness to be ascribed to the event; as "I come." "I came." "I shall come."

Continuous: denotes that the event (in Present, Past, or Future time) is not yet complete, but still going on; as "1 am coming," "I was coming," "I shall be coming."

Perfect: denotes that the event (in Present, Past, or Future time) is in a completed or perfect state; as "I have

come," "I had come," "I shall have come."

Perfect Continuous: combines the force of the two preceding forms; as "I have been coming," "I had been coming," "I shall have been coming."

Person: a verb is in the First person when the subject of the verb denotes a person speaking; in the Second person when it denotes a person spoken to; in the Third person when it denotes a person (or thing) spoken of.

Parts of a Verb not Finite

Infinitive: names the action in its most general sense, without reference to any doer.

Participle: that part of a verb which is used either (a) as part of a tense and as such is preceded by an auxiliary verb be or have, or (b) as an adjective to qualify some noun or pronoun.

Gerund: a mixture of noun and verb,—(1) a noun in so far as it can be in the Nominative or Accusative case; (2) a verb in so far as it expresses Present or Past time,—is in the Active or Passive voice, and (if Transitive) is followed by an object.

Complement of a Verb

Complement to an Intransitive verb, or to a Transitive verb in the Passive voice, is a word or combination of words, which completes what the verb left unsaid about its *Subject*. This is called a Subjective complement.

Complement to a Transitive verb in the Active voice is a word or combination of words, which completes what the verb left unsaid about its *Object*. This is called an Objective complement.

CHAPTER XIV.—THE PARSING OF NOUNS

86. What parsing is.—To parse a word is to examine it in two different points:—(1) What part of speech it is, (2) what part it plays in the building of a sentence. (Parse is from Latin pars, a part.)

Note.—Of the eight parts of speech the only kind of word that cannot be parsed in the second sense is an Interjection. This point has been explained already in § 4. So in parsing such a word the only thing we can say is that it is an Interjection.

All the other parts of speech stand in some connection with other words, and must therefore be parsed in the second sense as well as in the first. Thus if we have to parse "in" in such a phrase as "a bird in the hand," we say not merely that it is a preposition, but a preposition having "hand" for its object. It shows what the bird has to do with the hand, or the hand with the bird.

In the older forms of our language, when inflectional endings were more numerous, parsing was less difficult than it is now, when we have but few of these left to guide us. Now we have to look chiefly to the work that a word does in a sentence (as explained in Chap. I), and not expect so much help from the form or ending.

87. How to parse Nouns.—To parse a noun you have to show four different things concerning it:—

(a) Of what kind it is,—whether Proper, Common, Collective, Material, or Abstract.

- (b) Of what **gender** it is,—whether Masculine, Feminine, Common, or Neuter.
 - (c) Of what number it is,—whether Singular or Plural.
- (d) In what case it is,—whether Nominative, Accusative, or Genitive, etc. (The rules for case are given in detail in Chapter XVI.)

Examples

(1) The master of this class teaches French without a book.

Master.—Common noun, Masculine gender, Singular number, Nominative case, Subject to the verb "teaches."

Class—Collective noun, Neuter gender, Singular number, Accusative case after the preposition "of."

French—Proper noun, Neuter gender, Singular number, Accusative case after the verb "teaches."

Book—Common noun, Neuter gender, Singular number, Accusative case after the preposition "without."

(2) The deer in my father's forest nibble the grass with eagerness.

Deer—Common noun, Common gender, Plural number, Nominative case, Subject to the verb "nibble."

Father's—Common noun, Masculine gender, Singular number, Genitive case qualifying the noun "forest,"

Forest—Collective noun, Neuter gender, Singular number, Accusative case after the preposition "in."

Grass—Material noun, Neuter gender, Singular number, Accusative case after the verb "nibble."

Eagerness—Abstract noun, Neuter gender, Singular number, Accusative case after the preposition "with."

CHAPTER XV.—THE PARSING OF PRONOUNS

- 88. How to parse Pronouns.—To parse a pronoun you have to show five different things concerning it:—
- (a) Of what kind it is,—whether Personal, Possessive, Demonstrative, Relative (i.e. Conjunctive), or Interrogative.
- (b) Of what gender it is,—whether Masculine, Feminine, Common, or Neuter.
 - (c) Of what number it is,—whether Singular or Plural.
 - (d) Of what person it is,—whether first, second, or third.
 - (e) In what case it is,—whether Nominative, Accusative, etc. (The rules for case are given in detail in Chapter XVI.)

Examples

(1) I have written down your names in my book.

I—Personal pronoun, Common gender, Singular number, First person, Nominative case, Subject to the verb "have written down."

Your—Possessive adjective qualifying the noun "names." My—Possessive adjective qualifying the noun "book."

(2) Who spoke? and what did he say?

Who—Interrogative pronoun, Common gender, Singular number, Third person, Nominative case, Subject to the verb "spoke."

What—Interrogative pronoun, Neuter gender, Singular number, Third person, Accusative case after the verb "say."

He—Personal pronoun, Masculine gender, Singular number, Third person, Nominative case, Subject to the verb "did."

89. Relatives and Demonstratives.—The following rule should be remembered and observed in parsing Relatives and Demonstratives:—

A Relative or a Demonstrative pronoun is of the same gender, the same number, and the same person as its antecedent; but its case has nothing to do with the case of its antecedent.

This rule is called a Concord (or Agreement). The following form may be used for putting it into effect:—

Kind of Pro-	Name its	Therefo An	Case.		
noun:	Antecedent.	Gender.	Number.	Person.	
Relative or Demonstra- tive					

Examples

(1) I prefer a white horse to a black one.

One—Demonstrative pronoun, having "horse" for its antecedent, and therefore of Common gender, Singular number, and Third person. Accusative case after the preposition "to."

(2) The man who was caught turned out to be the thief.

Who-Relative pronoun, having "man" for its antecedent, and therefore of Masculine gender, Singular number, and Third

person. Nominative case, because it is the Subject of the verb "was caught."

(3) I whom you suspected of the theft was not guilty.

Whom—Relative pronoun, having "I" for its antecedent, and therefore of Common gender, Singular number, and First person. Accusative case after the verb "suspected."

Note 1.—The antecedent to a Relative pronoun is not always expressed:—

Whom the gods love die young.

Here some antecedent such as "Those" or "Those persons" must be understood. It is clear from the context that whom is of the Common gender, Plural number, and Third person.

Note 2.—The antecedent to a Demonstrative pronoun such as "They" or "One" is not always expressed.

They say that prices will soon fall. One must be careful of one's money.

When they or one are thus used without reference to any antecedent, they are said to be **Indefinite** Demonstrative pronouns, because they stand for no person or persons in particular.

CHAPTER XVI.—CASES OF NOUNS AND PRONOUNS

- 90. Nominative.—There are four different conditions under which a noun or pronoun can be in the Nominative case:—
 - (1) As Subject to a verb:—

 I did this. Rain is falling. You are tired.
 - (2) As Complement to an Intransitive or Passive verb:— I am he. William I. was surnamed the Conqueror.

He became or turned out a scholar. He seems a good rider.

(3) In apposition with some other noun or pronoun in the Nominative case. (One noun is said to be in apposition with another, when it refers to the same person or thing and is mentioned immediately after it.)

John, the carpenter, has done well to-day.

Note.—Sometimes a noun is in apposition with a sentence or with some noun implied in the sentence :—

He slew all his prisoners,—a cruel and impolitic act.

He ordered the *slaying* of all his prisoners, a cruel and impolitic act.

In the first sentence the noun act is in apposition with the noun slaying implied in the verb slew.

- (4) Nominative absolute. (A noun or pronoun is absolute, *i.e.* free and independent, when it is neither the Subject of a verb, nor the Object of a preposition. In this construction it goes with some participle or with an Infinitive):—
 - (a) We then started, he remaining behind.
 - (b) We having given the signal, the guns were fired.
 - (c) The race will be run to-day, the winner to receive a silver cup.
- In (a) the participle expresses present time, in (b) the participle expresses past time, in (c) the Infinitive expresses future time. We have no participle to express futurity.

Note.—The participle is sometimes omitted. When this occurs some participle such as being must be understood:—

Breakfast over (=breakfast being over), we started on our journey.

90a. The Vocative case is used for the purpose of address:—

How art thou fallen, O Cæsar!

91. Genitive.—A noun in the Genitive case or a *Possessive Adjective* has the same force as an adjective, and may be used either as qualifying some noun or as the complement of some verb. A *Possessive Pronoun* may also be used as a complement:—

My son has come; I am pleased at his coming. (Qualifying.) This house is mine, not the barber's. . . (Complement.)

Note 1.—When two nouns in the Genitive case are in apposition, the apostrophe s is added either to the first or last, but not to both:—

King Alfred's reign. (We do not say, "King's Alfred's reign.")

Herod married his brother Philip's wife.

For the queen's sake, his sister .- Byron.

Note 2.—There are three different senses in which the Genitive case can be used :—

- (a) Subjective.—Here the noun in the Genitive or the Possessive adjective denotes the *subject* of the action or feeling.
 - His friendship for me (i.e. the friendship that he has for me) is sincere.
- (b) Objective.—Here the noun in the Genitive case or the Possessive adjective denotes the object of the action or feeling.

His friendship (i.e. the friendship that I had for him) must be given up by me.

(c) Descriptive, denoting the quality expressed by the noun.

The mother's (i.e. motherly) nature of Althea.—Lowell.

To her woman's (i.e. womanly) heart love was all.—Mrs. Craik.

- 92. Accusative.—There are seven different conditions, under which a noun can be in the Accusative case:—
 - (1) As Object to a verb: for details see Chapter XVII.
 - (2) As Complement to a Transitive verb:—

They made him their leader.

(3) In apposition with another noun or pronoun in the Accusative case:—

The Roundheads beheaded Charles I, the king.

(4) As Object to a preposition:—

A house built on sand. He depends on me.

(5) Adverbial accusative:

He lived ten years . . . Time.

He walked four miles . . . Space.

This cost or is worth six shillings . Value.

That box weighs twelve pounds . Weight.

The air is a trifle hotter to-day . Quantity.

Bind him hand and foot . . Attendant circumstance.

(6) Accusative after the adjectives like, near. (This has arisen from the omission of the preposition "to," which is still sometimes expressed.)

No man could ride like him. The house nearest the grove is the best.

(7) Accusative in exclamation :-

Oh dear me! Unhappy man!

92a. The Indirect object is in the Dative case:—
I told him a story. He taught Jack arithmetic.

Exercise 15

Parse (by the methods shown in §§ 87-89) every noun and pronoun occurring in the following examples, and explain its case by the rules given in Chapter XVI:—

1. Marius having been defeated returned to Rome. 2. Marius having been defeated, his troops returned to Rome. 3. He needs strong arms, who swims against the tide. 4. If he had remained a soldier, he would probably have got his commission. 5. Here lay Duncan, his silver skin laced with his golden blood.—Shakes. 6. For thy servant David's sake.—Old Test. 7. This wall is a hundred feet high. 8. He came to see us every other day. 9. I thought him the cleverest man that I had ever seen. 10. Solomon's temple was built without the noise of axe or hammer; the fabric grew silently like a tall palm. 11. He dwelt two months in the house of one Simon, the Tanner. 12. He grew day by day more and more like his former self. 13. The army of the Canaanites, nine hundred chariots strong, covered the plains of Esdraelon .- MILMAN. 14. Why stand ye here all the day idle ?-New Test. 15. He, having finished the work, received his pay for the day. 16. He having finished the work, the horse and cart were taken back to the farm. 17. Who is the maker of this watch? 18. My story being done, she gave me for my pains a world of sighs.—SHAKES. 19. Poor man! I wish I could have helped him out of that difficulty. 20. I who speak unto thee am he .- New Test. 21. Six shillings were paid for this book; but it was worth only four (shillings). 22. Our country has not produced two Newtons. 23. The rock lies ten fathoms deep under the water. 24. He walked ten miles a day, and never complained of fatigue. 25. Ye mariners of England, who guard our native seas, whose flag has braved a thousand years the battle and the breeze.—Campbell.

CHAPTER XVII.—VERB AND OBJECT

93. Direct and Indirect Objects.—There are some Transitive verbs that take two objects, one of which (called the *Direct*) expresses the thing towards which the action of the verb is directed, and the other (called the *Indirect*) expresses the person or persons to whom or for whom the action is done:—

{The master teaches French . . . Direct Object. The master teaches me French . . . Indirect Object. Let me (Indir. Object) see (Dir. Object, Infinitive).

Note.—The Indirect object always comes first, that is, immediately after the verb. If it is not put first, it must have some preposition placed before it:—

The master teaches French to me. They brought an easy chair for me.

In such examples the *me*, which was at first the Indirect object of the verb and in the *Dative* case, has now become the object of the preposition and is in the *Accusative* case.

94. Retained Object.—A verb that takes two objects in the Active voice can usually retain one or other in the Passive. Hence such an object is called the "Retained object":—

Active. The master teaches me French.

Passive. I was taught French by the master.

French was taught me by the master.

Note.—It sometimes happens, however, that the Direct object placed after a Transitive verb in the Active voice cannot be retained after the same verb in the Passive voice.

They brought me an easy chair.

We can say, "An easy chair was brought me" (Indirect object). But we cannot say, "I was brought an easy chair" (Direct object). Whether or no a Direct object can be retained after a verb in the Passive voice is purely a matter of idiom or usage. No rule can be laid down and no reason can be given why a Direct object can be retained after some verbs and not after all.

95. Cognate Object.—An object can be placed after an Intransitive verb, if its meaning is cognate or kindred with that of the verb, that is, implied more or less in the verb itself.

The horse ran a race.

The clock struck one (stroke).

The illness must run its course.

At the time of that battle the river ran blood.

In the last example blood really means "a bloody or blood-stained course," and "course" is the implied Cognate object. We cannot place any outside object after the Intransitive verb "run," that is, any object that has no connection with the meaning of the verb itself:—"The horse ran a wall." This is nonsense.

96. Reflexive Object.—A Reflexive pronoun, placed after an Intransitive verb, and referring to the same person as the subject, is called a Reflexive object. Such objects, however, are not common.

John overslept himself.

This means "John overslept or slept too long for himself." "Himself" is here a kind of Indirect object, because it names the person for whom the action is done.

Note.—A pronoun, which is Reflexive in sense, is not always Reflexive in form :—

They sat them down on the river bank.

Here sat is Intransitive like overslept in the previous example; and them is as Reflexive in sense (though not in form) as himself in the previous example.

Summary.—There are thus five different kinds of objects that can be placed after verbs,—the Direct after a Transitive verb, Active; the Indirect after a Transitive verb, Active; the Retained after a Transitive verb, Passive; the Cognate after an Intransitive verb; the Reflexive after an Intransitive verb.

Observe further that these various objects can be placed not merely after Finite verbs, but after Participles, Gerunds, and Infinitives.

Exercise 16

Point out the object to the verb in each of the following sentences, and say what kind of object it is:—

1. He lived a life of industry, and died the death of the righteous. 2. I was asked a question, which I could not answer. 3. Teach me, O Lord, the way of thy statutes.—Old Test. 4. I was promised that post, but it was given to another. 5. I have fought a good fight; I have kept the faith.—New Test. 6. 0 thou invisible spirit of wine, if thou hast no name to be called by, let us call thee devil !- SHAKESPEARE. 7. They sat them down on the grassy bank of the river. 8. She busied herself with gathering the wild flowers of the forest. 9. He went away gloomy and sad, meditating revenge. 10. He always looked puzzled on being asked an unusual question. 11. The fever kept him ill for two or three weeks before it had run its full course. 12. He was taught reading by one master, and writing by another. 13. Ask me no more questions: I have no desire to answer one of them. 14. Old mother Hubbard she went to the cupboard, to fetch her poor dog a bone. 15. Fare thee well. 16. To save one's country from ruin is an honour that few men have been able to acquire. 17. Pure religion and undefiled before God is this, To visit the fatherless and widows in their affliction, and to keep himself unspotted from the world.-New Test. 18. The wind blew a cold blast from the north.

CHAPTER XVIII.—THE PARSING OF ADJECTIVES

- 97. How to parse Adjectives.—To parse an Adjective you have to show three different things about it:—
- (a) Of what kind it is,—whether Proper, Descriptive, Quantitative, Numeral, Demonstrative, Interrogative, Distributive, or Possessive:—
- (b) In what degree it is,—whether Positive, Comparative, or Superlative:—
- (c) What its use is,—whether an Epithet or Predicative; and if an Epithet, what word it qualifies.

Note 1.—An Adj. is used as an epithet, when it directly qualifies a noun or pronoun; as "A large house."

It is used **predicatively**, when it is part of the predicate and qualifies the subject or object of the verb *indirectly*; as—

This house is large. They made the house large.

Note 2.—In poetry, and sometimes in prose, an adjective can be used to qualify a verb, as if it were an adverb:—

And furious every charger neighed.—CAMPBELL.

Note. 3.—The noun qualified by an adjective is not always expressed. When this occurs, the adjective is said to be used as a noun.

The poor (i.e. poor persons). The middle (i.e. middle part).

Examples

(1) A fine horse has just been bought.

A—Demonstrative adjective (Indefinite article).

Fine—Descriptive adjective, Positive degree, used as an epithet to qualify the noun "horse."

(2) This house is larger than that.

This—Demonstrative adjective, used as an epithet to qualify the noun "house."

Larger—Descriptive adjective, Comparative degree, used predicatively as complement to the verb "is."

That—Demonstrative pronoun, referring to the noun "house."

(3) The three men had each his gun, and the tallest of them seemed young.

The-Demonstrative adjective (Definite article).

Three—Numerical adjective (cardinal), used as an epithet to qualify the noun "men."

Each—Distributive adjective, used as an epithet to qualify the noun "man" understood.

His-Possessive adjective, qualifying the noun "gun."

Tallest—Descriptive adjective, Superlative degree, used as an epithet to qualify the noun "man" understood.

Young—Descriptive adjective, Positive degree, used predicatively as complement to the verb "seemed."

98. A Noun or a Gerund placed before another noun is sometimes used as an adjective; that is, it qualifies the noun as an adjective would do:—

A bathing place; summer heat; drawing room; dining room; winter cold; a gold chain; an apple tart; a Bath bun; an oyster shop; an evening fire; a morning breeze, etc.

When the two nouns are joined by a hyphen, the noun formed by the junction is called a Compound:—

The battle-field; tool-shed; oak-tree; cotton-mill; hand-mill.

Sometimes the two nouns are joined together without any

hyphen:—
Bathroom; eyelid; eyebrow; watchword; moonlight, etc.

CHAPTER XIX.—FINITE VERB AND SUBJECT

99. How to parse Finite Verbs.—The points to be explained in the parsing of a Finite verb are shown in their proper order in the two following tables:—

Kind of Verb.	Conjug.	Voice.	Mood.	Tense. I	Form of Tense.
Transitive Intransitive	Strong Weak Mixed	Active Passive	Indic. Imper. Subjunc.	Future	Indefinite Continuous Perfect Perf. Contin.

Number.	Person.	Agreement.
Singular Plural	First Second Third	Agreeing in Number and Person with its subject or subjects, expressed or understood.

(1) James has been fishing all the morning.

Has been fishing—Intransitive verb, Weak conjugation, Active voice, Indicative mood, Present-Perfect-Continuous tense, having "James" for its subject, and therefore in the Singular number and Third person.

(2) James and I will be promoted next term.

Will be promoted—Transitive verb, Weak conjugation, Passive

voice, Indicative mood, Future tense, having "James and I" for the two subjects, and therefore in the Plural number and First person. (See Rules I and II in § 100).

(3) He worked hard that he might win a prize.

Worked—Intransitive verb, Weak conjugation, Active voice, Indicative mood, Past tense, having "he" for its subject, and therefore in the Singular number and Third person.

Might win—Transitive verb, Strong conjugation, Active voice, Subjunctive mood, Past tense, having "he" for its subject, and therefore in the Singular number and Third person.

(4) You will have got to your house by that time.

Will have got—Transitive verb here used Intransitively, Strong conjugation, Active voice, Indicative mood, Future-Perfect tense, having "you" for its subject, and therefore in the Plural number and Second person.

(5) The jury were puzzled and would have been divided in their opinions, if the judge had not known well how to guide them.

Were puzzled—Transitive verb, Weak conjugation, Passive voice, Indicative mood, Past tense, having "jury" for its subject (a noun that implies more persons than one), and therefore in the Plural number, Third person. (See Rule IV in § 100.)

Would have been divided—Transitive verb, Weak conjugation, Passive voice, Subjunctive mood, Future-Perfect tense, having "jury" for its subject, and therefore in the Plural number, Third person.

Had known—Transitive verb, Strong conjugation, Active voice, Indicative mood, Past-Perfect tense, having "judge" for its subject, and therefore in the Singular number and Third person.

(6) So be it.

Be—Intransitive verb, Subjunctive mood, Present tense, having "it" for its subject, and therefore in the Singular number, Third person.

100. Agreement of Verb with Subject.—The rule relating to the agreement between a Finite verb and its Subject is called a Concord:—

A verb must be in the same number and person as its Subject or Nominative.

The following special rules for working out this general Concord or Agreement should be also noted and observed:—

Rule I.—When two or more singular Subjects are connected by and, the verb is plural:—

Time and tide wait for no man.

Rule II.—When two or more Subjects connected by and differ in person, the verb takes the first person in preference to the second, and the second in preference to the third:—

James and I (=we) have been promoted . (First person.)
James and you (=you) were both absent . (Second person.)
James and John (=they) are great friends . (Third person.)

Rule III.—When two nouns connected by and express a single person or thing or are intended to express a single notion, the Subject is singular in sense, and hence the verb is singular also:—

(1) Truth and honesty is the best policy.

Here the phrase "truth and honesty" expresses a single notion. The two nouns stand for one thing, not for two.

(2) The poet and statesman is dead.

If the article were repeated before "statesman," this would show that two different persons were intended: the verb would then of course be plural:—

The poet and the statesman are dead.

But as the article is given only once, one person (who is both statesman and poet) is intended, and therefore the verb is singular.

Rule IV.—When the Subject is a noun of Multitude, i.e. singular in form but plural in sense, the verb is Plural:—The jury (=men on the jury) were divided in their opinions.

(Here jury is a noun of Multitude . (Plural in sense.)

The jury (Collective noun) consists of twelve (Singular in sense.)

Rule V.—When two or more singular Subjects are connected by either . . . or, neither . . . nor, the verb is Singular:—

Either James or John is to be promoted.

Note.—Thus Rule V is the opposite to Rule I. The conjunction and (in Rule I) unites the sense of the two subjects, and therefore the verb is Plural. But the conjunction or (in Rule V) disunites or separates the sense of the two subjects. It means "one or the other, not both." Hence the verb is Singular.

Rule VI.—When one of the Subjects connected by or, nor, etc., is Singular and the other Plural, the Plural subject should be placed next to the verb so as to make the verb plural:—

Neither the cock nor the hens are in the yard.

Note.—It would sound very harsh, if we said, "Neither the hens nor the cock is in the yard."

Rule VII.—When the Subjects (noun or pronoun) connected by or, nor, etc., are not of the same person, the verb agrees with the Subject mentioned last:—

Either James or I am to get the prize.

But it is better to repeat the verb :-

Either James is to get the prize, or I am.

Rule VIII.—When two or more Singular subjects are connected by as well as, the verb is Singular:—

A box as well as a book has been stolen.

Rule IX.—When the Subjects connected by as well as differ in number or person or both, the verb takes the number and person of the subject that stands first:—

My partners as well as I were at fault. I as well as they am ruined.

Rule X.—When two or more Singular nouns are qualified by a Distributive adjective, the verb is Singular:—

Every leaf, every twig, every drop of water teems with life.

Exercise 17

In the following sentences parse each Finite verb on the method shown in § 99, and according to the rules given in § 100:—

1. He had been gone two hours, before we received notice

that he was to stop. 2. Go, where glory awaits thee. 3. The horse was taken to the stable. 4. The man and his friend walked into the field. 5. I have long been absent from home. 6. Were I in his place, I should pay the debt. 7. He will have walked about three miles, since he left the house. 8. Murder, though it have no tongue, will yet speak. 9. If I were he, 1 should start at once. 10. He would have started at once, if he had known better. 11. The committee were all agreed that A. had done good work. 12. Either Albert or I am to be promoted. 13. The hens as well as the cock have been lost. 14. Youth and experience seldom exist together. 15. Let me speak for once. 16. By the time the clock strikes six, I shall have been working eight full hours. 17. God save the queen; long live the king. 18. Pride and poverty make no one happy. 19. Greater love hath no man than this, that a man lay down his life for his friends.—New Test. 20. No sooner had he got into bed, than he fell asleep. 21. It is I who am asked, not you. 22. Jack and Jill went up the hill. 23. A carriage and pair costs a large sum.

Exercise 18

Correct any errors that you may find in the agreement of Subject and Finite verb:—

1. James with his friends have come to-day. 2. A large number of holiday-makers were present on that day. 3. A boy as well as a man were caught trespassing. 4. Two apples as well as a pear was given me to-day. 5. Neither he nor she were present that day. 6. Either you or your brother are blamed for this, not I. 7. The jury consist of twelve persons. 8. The scene and the foliage is very beautiful. 9. A carriage and pair have just entered the coachman's yard. 10. A man with his dog have just come into the street.

CHAPTER XX.—THE PARSING OF INFINITIVES

101. How to parse Infinitives.—To parse an Infinitive you have to show two different things concerning it:—

(a) Of what form it is,—whether Indefinite, as to see:

or Present-Continuous, as to be seeing; or Perfect, as to have seen; or Perfect-Continuous, as to have been seeing.

(b) What is its use,—whether it is used as a Noun-Infinitive or as a Qualifying Infinitive (see §§ 102, 103).

102. The Noun-Infinitive.—In this capacity the Infinitive does the work of—(a) Subject to a verb, (b) Object to a verb, (c) Complement to a verb, (d) Object to a preposition. Since it does the work of a noun in all the positions which a noun is expected to fill, it is very fitly called the Noun-Infinitive.

(a) Subject to a verb:—

To sleep is necessary to health.

To work hard is the way to success.

(b) Object to a verb:—

We desire to improve.

Note 1.—In the sentence, "He gave me to understand," the Infin. "to understand" is the Direct object of "gave" and "me" is the Indirect.

Note 2.—The "to" is not used after the Auxiliary verbs shall, will, may, do, nor after must, can, dare not, need not. To all of these verbs the Infinitive is the Object:—

I shall go, I did not go, He dare not go, etc.

Here go is the object first to "shall," then to "did," and then to "dare."

(c) Complement to a verb :-

I saw him come. I ordered him to go.

Note.—The student will remember (see § 71) that the "to" is not used after the verbs hear, see, feel, make, let, bid, watch, behold, know, to all of which the Infinitive is used as complement.

- (d) Object to a preposition:—
 - (1) He did nothing but laugh.
 - (2) My plans are about to succeed.

In (1) the Infin. laugh is the object of the preposition but. In (2) the Infin. to succeed (=success) is the object of the preposition about, which signifies nearness or contiguity in time, place, or other circumstance.

- 103. The Qualifying Infinitive. —In this capacity the Infinitive does the work of (a) an adverb to a verb, (b) an adverb to an adjective, (c) an adjective to a noun, or (d) a participle to a noun or pronoun in a future sense.
 - (a) Adverb to a verb :-
 - (1) He came to see the sport.
 - (2) It came to pass.
- In (1) to see qualifies the verb "came," as if it were an adverb. Here the Infinitive denotes a purpose: "He came for the purpose of seeing the sport." In (2) to pass expresses, not a purpose, but a result.
 - (b) Adverb to an adjective :-

Quick to hear and slow to speak.

Here to hear qualifies the adjective "quick," and to speak qualifies "slow." Each Infinitive therefore does the work of an adverb. "Quick for hearing and slow for speaking."

(c) Adjective to a noun, either as an epithet or predicatively (§ 97. Note 1):—

A house to let. This house is to let.

Here to let qualifies the noun "house" as an epithet in the first example, and predicatively in the second. In each case, therefore, it does the work of an adjective.

(d) Participle to a noun or pronoun in a future sense; see § 72, where this use of the Infinitive is explained; see also § 90, (5) Nominative absolute.

Examples

(1) He intended to have seen you to-day.

To have seen—Perfect in form, noun in function, object to the Transitive verb "intended."

(2) I came to see you, but you did not appear.

To see—Indefinite in form, adverb in function, qualifying the verb "came."

Appear—Indefinite in form, noun in function, object to the verb "did."

I The Qualifying Infinitive is also known as the Gerundial Infinitive. But the name "Gerundial" implies or suggests a connection with Gerund, which does not exist. So the name Qualifying is much to be preferred.

Exercise 19

Parse every Infinitive that you can find in the following sentences:—

1. We saw the ship leave the docks at four o'clock. 2. We came to see it start and say good-bye to one of the passengers. 3. We hope to see him back soon. 4. He did not come back in time to spend Christmas with us. 5. We watched the cat steal silently towards the mouse and then suddenly seize it in its claws. 6. I was very much pleased to see you. 7. I will see you again shortly. 8. The boys dare not speak, when the master tells them to be silent. 9. Being quick to forgive and slow to avenge an injury, he made no one dislike him. 10. I shall be glad to see you, whenever you desire to come here. 11. There are many houses to let in this street. 12. That the injustices of the present world will be amended in the world to come is a thing to be hoped for by the good and feared by the evil. 13. Let me see the ship sail by. 14. We must work while it is day; for the night cometh, when no man can work. 15. Make the horse step out a little faster. 16. Did you see that shooting star? 17. To err is human; to forgive divine. 18. I am ashamed to say that he let the man go without paying him. 19. Have you finished all the work that you had to do? 20. I am sorry to find that your feelings have been hurt. 21. I am to blame, not you.

CHAPTER XXI.—THE PARSING OF PARTICIPLES

- 104. How to parse Participles.—To parse a Participle you have to show four different things concerning it:—
- (a) In what form it is,—whether Present, as fading; or Past, as faded; or Perfect, as having faded.
- (b) What kind of verb it is,—whether Transitive or Intransitive.
 - (c) In what voice it is,—whether Active or Passive.
- (d) What the use of the Participle is,—whether Epithet, Predicative, or Absolute.

Note 1.—If the Participle given is part of a tense, it should be parsed as part of the tense, and not as a separate word. Thus in "I have come," we should parse come, not as a separate word, but as part of a Present Perfect tense.

Note 2.—The Epithet and Predicative uses of participles are the same as those of adjectives, which have been explained in Note 1 to § 97. The Absolute use in connection with some noun or pronoun in the Nominative case has been explained in § 90 (5).

Examples

(1) He appeared tired after his work.

Past participle, Transitive verb, Passive voice, used predicatively as complement to the verb "appeared."

(2) Believing himself to be right, he stuck to his opinion.

Present participle, Transitive verb, Active voice, used as an epithet to qualify the pronoun "he."

(3) The sun having risen, we can now set off.

Perfect participle, Intransitive verb, used absolutely with the noun "sun."

Note.—When no noun or pronoun is placed before a participle used absolutely, the participle is practically a preposition. Such a participle is sometimes called an *Impersonal* Absolute.

He plays well, considering his age.

Owing to his lameness he could not walk straight.

Exercise 20

Parse every Participle in the following sentences:—

1. Having finished all the work given him to do, he seemed more pleased with himself than usual. 2. The sun, having set at six o'clock, left us in the evening twilight. 3. The sun having set at six o'clock, we had scarcely enough daylight left to get home. 4. A faded rose is not so pleasing as a blooming daisy. 5. The rose in your hand is more faded than the one in mine. 6. Having been convicted of more than one theft, he left the country. 7. He seemed contented with his lot. 8. A contented mind is a continual feast. 9. It is not enough for a house to be well built; it ought also to be well planned. 10. The trees having cast their leaves, we are now on the verge of winter. 11. The trees, having cast their leaves, look bare.

CHAPTER XXII.—THE PARSING OF GERUNDS

105. Gerund.—A Gerund is a mixture of verb and noun. To parse it you have to show three different things about it in its verb-character, and one thing about it in its noun-character.

(a) In what form it is,—whether Present, as As Verb. (b) What kind of verb it is,—whether used
Transitively or Intransitively.
(c) In what voice it is,—whether Active or Passive.

As Noun. (d) In what case it is,—whether Nominative, Accusative, etc.

Examples

(1) He is fond of swimming in the sea, and was pleased with himself for having swum out far from the shore.

Swimming—(1) as Verb; Present form, Intransitive verb; (2) as Noun; Accusative case after the preposition "of."

Having swum—(1) as Verb; Perfect form, Intransitive verb: (2) as Noun; Accusative case after the preposition "for."

(2) Deceiving others amused him, but he disliked being deceived himself.

Deceiving—(1) as Verb; Present form, Transitive verb, Active voice; (2) as Noun; Nominative case, Subject to the verb "amused."

Being deceived—(1) as Verb; Present form, Transitive verb. Passive voice; (2) as Noun; Accusative case after the verb "disliked."

106. The form ending in -ing may be either (a) followed by the preposition " of "; or (b) used in the plural number. In such cases it is a pure noun, and should be parsed like any other noun (§ 75). It has no verb-character whatever; and hence it is qualified by an adjective, while, in its other uses, the gerund is qualified by an adverb.

(1) The second hearing of the case was postponed.

Gerund, Singular number, Nominative case, Subject to the verb "was postponed."

(2) I am much pleased with my surroundings.

Gerund used as a Common noun, Plural number, Accusative case after the preposition "with."

- 107. Summary of Forms ending in "-ing."—The grammatical uses of such forms may be summed up as follows:—1
 - I. Part of a tense.
 2. Adjective {Epithet Predicative}.
 3. Absolute {With noun or pronoun Without noun or pronoun}
- II. Gerund Proper, noun and verb mixed.
 5. Used as an ordinary noun.
 - 1. Part of tense: I am coming; he has been coming; he will be coming.
 - 2. Adjective: A disappointing result. (Epithet use.)

 The result is disappointing to all of us. (Predic. use.)
 - 3. Absolute: We all set off, the clock striking one. (With noun.)

 Opinions differ regarding this point. (Without

noun.)

(Here regarding, though a participle in origin, is practically a preposition and might be so parsed.)

4. Gerund (noun and verb mixed): I am tired of warning you.

5. Gerund (pure noun): I do not require your warnings.

Exercise 21

Parse every word ending in -ing in the following sentences: -

1. We have been working hard during the whole of the past

¹ It is sometimes said that a verb ending in -ing may be either I a participle (as shown above), or II a gerund (as shown above), or III an inflected form of infinitive. The third is a mistake. The form ending in -ing was never anything else than either a participle or a gerund (verbal noun). It was never an Infinitive at any time in the history of English.

week. 2. It is of no use questioning him regarding this matter. 3. Owing to the long drought, every plant is beginning to fade. 4. Great things sometimes result from small beginnings. 5. I was much pleased on hearing of your success. 6. Seeing is believing. 7. There is some talk of his returning before long. 8. Deepening his voice with the deepening of the darkness, he continued humming a tune. 9. I hope to be returning home at this time to-morrow. 10. The shades of night are falling fast. 11. The journey was soon finished, the one walking and the other riding in turns. 12. The ending of a word is called in grammar an inflection. 13. Do you think of giving a new name to your house, or do you prefer leaving the name as it is ? 14. I am tired of swimming: I have been swimming for the last hour or more.

CHAPTER XXIII.—THE PARSING OF ADVERBS, PREPOSITIONS, AND CONJUNCTIONS

108. How to parse Adverbs.—To parse an adverb you must show four different things concerning it:—

- (a) Of what kind it is,—whether Simple, Relative, or Interrogative.
- (b) If Simple, in what degree of comparison it is,—whether Positive, Comparative, or Superlative.
- (c) What its use is,—whether Attributive or Predicative; and if Attributive, what word it qualifies.

Note.—An adverb is used **attributively**, when it directly qualifies some adjective, verb, preposition, conjunction, or other adverb; ¹ as—

This boy is remarkably clever . . . (Adjective.)
A snake moves silently through the grass . . (Verb.)
His cleverness is decidedly above the average
He is despised merely because he is poor . . (Conjunction.)
He sings unusually well (Adverb.)

An adverb sometimes, but rarely, can be used to qualify a noun; as:— The then King. The down train. The up journey.
In such examples it must be said that the adverb is used as an adjective.

An Adverb is used **predicatively**, when it is part of the predicate, that is, when it is the complement to some verb:—

The results are out. The holidays are over.

Examples

(1) He works more industriously than you.

Simple adverb of the Descriptive class, Comparative degree, used attributively to qualify the verb "works."

(2) I have not seen the house where you live.

Relative adverb qualifying the verb "live" in its own sentence, and having "house" for its antecedent.

(3) When the cat is away, the mice play.

When—Relative adverb qualifying the verb "is" in its own sentence, and joining its own sentence "the cat is away" to the sentence "the mice play."

Away—Simple adverb of Place, used predicatively as complement to the verb "is."

- 109. How to parse Prepositions and Conjunctions.¹—Care must be taken to distinguish prepositions and conjunctions from each other and from adverbs. The way to distinguish them is to ask yourself, What work does the word do in the sentence?
 - (i) I have seen this man before . . . (Adverb.)
- (ii) He stood before the door . . . (Preposition.)
- (iii) The rain fell before we reached home . . (Conjunction.)
 - In (i) before is a Simple adverb of Time qualifying "have seen."
- In (ii) before is a Preposition having "door" for its object.

 In (iii) before is a Conjunction joining its own sentence "we reached home" to the sentence "The rain fell."

In parsing a Conjunction say what words or what sentences it joins together.

Exercise 22

Parse the words printed in Italics in the following sentences:—

1. He walked about the house. 2. He is walking about.

¹ The distinction between Co-ordinating and Subordinating conjunctions does not belong to Parsing, but to Analysis: see below, \$ 116 and \$ 126.

3. The above named book was lost. 4. The sky is above the earth. 5. He was all covered with mud. 6. We walked along the bank of the river. 7. He is going along at a great pace. 8. We must rest before going any farther. 9. Men will reap as they sow. 10. As rain has fallen, the grass will soon look green. 11. He came after a few days. 12. He came a few days after. 13. He will go after he has dined. 14. He stood below me in the class. 15. There is a world below and a world above. 16. You are working better to-day. 17. There is but one man present. 18. Who could have done this but him? 19. He is a man of common-sense, but not learned in books. 20. We could not do anything else. 21. He has some real cause for sorrow; else he would not weep as he does. 22. He has worked hard enough for anything. 23. Whom was this done by? 24. The horse is going by. 25. All except one agreed to this. 26. It was at York that I first saw him. 27. He has been ill for a long time past. 28. He was much missed; for he was a really good man. 29. He was half dead with fear. 30. Come in and take a seat. 31. You will find him in the house. 32. I love Cæsar less than Rome. 33. I saw him once more. 34. I liked him most of all. 35. Neither you nor I can do that. 36. He must needs know the reason of this. 37. Who comes next? 38. He stood next me in class. 39. I can do no more. 40. He fell off the saddle. 41. The robber ran off. 42. I heard of this only yesterday. 43. Take what you like; only keep silence. 44. He is over ten years of age. 45. The holidays are now over. 46. The secret is out. 47. I have not seen him since Monday last. 48. I took this house four weeks since. 49. We must trust you since you say so. 50. The men are all together. 51. Rocks are ahead.

MISCELLANEOUS QUESTIONS SELECTED FROM PAPERS SET AT VARIOUS PUBLIC EXAMINATIONS

The questions have been arranged in the following order:--

- I. Oxford Preliminary Examinations, p. 110.
- II. Cambridge Preliminary Examinations, p. 111.
- III. Central Welsh Board, Junior Examinations, p. 114.
- IV. College of Preceptors, Third Class Papers, p. 116.

- V. Sentences from various different sources, Preliminary, Junior, and Senior, to be corrected or justified, p. 120.
- VI. Examples on the Order of Words, p. 123.
- VII. Examples to show how the same word can be used in different Parts of Speech, p. 124.

I. OXFORD PRELIMINARY EXAMINATIONS

First Specimen Paper

Α

- Parse fully each word in the following passage:
 Southward, from Surrey's pleasant hills, flew these bright warriors forth.
- 2. Make short sentences containing-

Over—(a) as an Adverb, (b) as a Preposition.

Show—(a) as a Noun, (b) as a Verb.

But—(a) as a Preposition, (b) as a Conjunction.

- 3. Write in columns the present tense and past participle of each verb in the following passage:—
 - I laid down the buck, and unslung my double gun, and threw a stick at the nest, when out shot a large pine-martin, and like a squirrel sprang from tree to tree.

В

4. What is a Pronoun? Write down in a column the pronouns in the following sentence, and opposite each state what kind of pronoun it is:—

One of these is mine: are there any that belong to you?

5. Give the Comparative degree of the following adjectives:—red, curious, little, lively.

Second Specimen Paper

A

1. Parse fully the verbs and pronouns in the following sentence:—

Thrice is he armed that hath his quarrel just.

2. Define a Noun. State to what class each noun in the following sentence belongs:—

Farmer John had a good crop of wheat last summer, but it was badly harvested through the laziness of a crowd of reapers.

3. Write down the past tense (1st person sing.) and the past participle of the following verbs:—set, buy, do, spread, arise, lie (down).

B

- 4. Make short sentences in which-
- (a) the verb "to be" shall have the meaning of "to exist."

(b) the verb "to be" shall merely be copulative.1

- (c) the verb "to tell" shall have a direct and an indirect object.
- (d) the verb "to make" shall be used actively with two objects.
- (e) the verb "to make" shall be used passively with two nominatives.
- 5. Write down the Superlative of the following adverbs:—well, fast, boldly, little, much.

II. CAMBRIDGE PRELIMINARY EXAMINATIONS

First Specimen Paper

1. Write a sentence containing at least five different parts of speech. Point out in this sentence an example of each of the five, naming the part of speech to which it belongs.

2. Give the feminines corresponding to governor, lad, mayor, and give the genitive case plural of the feminine forms corresponding to drake, earl, nephew, lord.

State the number of each of the following words:—them, son's, me, men's, men, whose, she, us. State also the case or cases in which each may be.

3. What are the Comparatives and Superlatives of lazy, red, beautiful? cruel, much, grave?

Write short sentences containing the word "that" used (a) as a Demonstrative pronoun, (b) as a Demonstrative adjective, (c) as a Relative pronoun.

What is the meaning of "demonstrative"?

Would you put a or an before aim, heir, help, hour, year ?

4. Parse fully the words in Italics in the following passage:-

¹ Verbs are no longer classified as copulative.

Unbending 'midst the wintry skies, Rears the firm oak his vigorous form, And stern in rugged strength defies The rushing of the storm.

5. Give in two columns the past tense indicative and the past participle of the following verbs:—arise, dwell, do, get, lay, lean, thrive.

Which of these verbs may be used transitively? What is the meaning of "Transitive"?

- 6, What are Subjects in the following sentences?
 - (a) His money being spent, he left the country.
 - (b) There is no help for it.
 - (c) Where is he?
 - (d) Riding is a healthy exercise.
- 7.'Write a short sentence in which by is used as an adverb, and another sentence in which it is used as a preposition. Do the same with the words behind, near, since. Which of these four words can be used as a conjunction? Write a sentence in which it is so used.

Second Specimen Paper

1. Name the parts of speech to which the words in Italics in the following sentence belong:—

She sleeps, nor dreams, but ever dwells A perfect form in perfect rest.

2. Give the feminine forms corresponding to bachelor, lord, sultan, testator.

Write down the genitive cases, singular and plural, of singer, monkey, thief, mistress, he.

3. Form adjectives from worth, south, quarrel, glory, and attach each adjective to a suitable noun.

Give the other degrees of comparison of dim, famous, shy; and of farther, inner, less.

Combine in one sentence the following pair of sentences:—
The tree was cut down. The tree was a poplar.

Do the same with the sentences :--

They did not see the Queen. They went to see the Queen.

4. Parse fully the words in Italies in the following passage:-

I saw thee smile: the sapphire's blaze
Beside thee ceased to shine;
It could not match the living rays
That filled that glance of thine.

5. Give in two columns the first person singular of the past tense indicative and the past participle of the following verbs:—cast, eat, lean, lend, lie (to lie down), swell, weave. Which of these verbs can be used intransitively?

Correct the following where necessary:-

I left the hammer laying on the table. The captive lay in the dungeon. We laid down to rest.

6. Point out the subjects and objects in the following passage:— For you these cherries I protect, To you these plums belong: Sweet is the fruit that you have picked, But sweeter far your song.

7. Write a sentence in which the word but is used as a conjunction, a second in which it is used as a preposition, and a third in which it is used as an adverb.

Third Specimen Paper

1. Give one instance of a Common noun, one of a Proper noun, and one of a Collective noun.

Write down the plurals of fox, ox, cliff, life, key, negro, piano.

2. Give the genitive cases, singular and plural, of empress, lady, woman.

What are the masculine forms corresponding to witch, vixen, hind?

3. Give the comparatives and superlatives of free, hot, neat, well, courteous.

Form adjectives from disaster, two, wheat, and adverbs from gay, holy, other, south, week.

Correct the following, if necessary:-

I know who I like, it is her who gave me this knife.

Whom do you believe him to be?

Let you and I the battle try.

4. Parse fully the words in italics in the following passage:

All along the valley, stream that flashest white,

Deepening thy voice with the deepening of the night,

All along the valley, where thy waters flow, I walked with one I loved two and thirty years ago.

5. Give in two columns the first person singular of the past tense indicative and the past participle of the following verbs:—bite, choose, lie (to lie down), ride, sing, sit, steal, swear, swim.

What are the transitive verbs corresponding to *lie* and *sit*? Give the negative and the interrogative forms of—

The cat purrs. The tide is ebbing. I will speak.

6. Point out the subjects and objects in the following:-

Alas, how light a cause may move Dissension between hearts that love, Hearts that the world in vain had tried, And sorrow but more closely tied!

7. How do you decide whether a word is a preposition or an adverb? Write a sentence containing a word used as an adverb.

Parse the words for and until wherever they occur in the following sentence:—

I will do your work for you until Tuesday or until you return, for I promised to do so.

III. CENTRAL WELSH BOARD, JUNIOR CERTIFICATE EXAMINATIONS

First Specimen Paper

- 1. Give the plural form of the following nouns:—ox, church, wharf, tooth, genius, chief, leaf, brother, penny; and the comparative form of the following adjectives:—holy, fair, tender, little, good, many, old, far.
 - 2. How do we form the Genitive case of the English noun?
- 3. Define (giving two examples in each case) Proper noun, Relative pronoun, Passive voice, Multiple sentence.
- 4. Write sentences illustrating the various uses of the following words:—the, but, as, such, much.
- 5. What tenses and moods occur in the conjugation of the English verb? Which of these are expressed by the help of Auxiliaries?
 - 6. Correct, giving in each case your reason for correction :—
 - (a) He is taller than me.
 - (b) Who were you speaking to?
 - (c) Neither the king nor his minister were at fault.
 - (d) Neither of them were remarkable for precision.

- 7. Tabulate the different forms of the Personal pronoun.
- 8. Parse fully every word in the following sentence:-

Into the street the Piper stept, Smiling first a little smile, As if he knew what magic slept In his quiet pipe the while.

9. Analyse:-

(a) Into the street the Piper stept.

(b) How pregnant sometimes his replies are!

(c) Reading maketh a full man, conference a ready man, and writing an exact man.

Second Specimen Paper

1. How are nouns inflected for the plural? Give some examples of nouns that form the plural irregularly, and also of nouns that change their meaning in the plural.

2. Define, giving in each case an example:—Cognate Object, Antecedent, Verb of Incomplete Predication, Nominative

Absolute. Perfect tense.

3. How are adjectives compared? Give some examples of defective comparison.

4. Mention the various uses of the Infinitive.

5. Show by means of examples the difference between (a) Relative and Interrogative pronoun, (b) Preposition and Conjunction, (c) Transitive and Intransitive verb, (d) Adjective and Adverb, (e) Active and Passive voice.

6. Amend the following phrases and sentences:—

(a) How sourly these apples taste!

- (b) Here is a capital novel, which I am going to sit on the ground and read.
- (c) It is not merely necessary to observe but to meditate.
- (d) However fine a sight the fleet was by day, it was certainly eclipsed by night.
- (e) The powers they possess, but cannot make use of them.
- (f) Colonel Sandys a hot man, and who had more courage than judgment.

(g) There were three alternatives open.

- (h) There was not a shadow of a whisper heard.(i) What do you think of me learning French?
- (k) He is a tall man, like his father was.

- 7. Distinguish between a Strong and a Weak verb. Give the Preterite tense 1 (1st person singular) and Preterite Participle of the following, stating also in each case whether the verb is Strong or Weak:—shake, buy, shut, tell, take, sting, put, catch, ring, feel.
 - 8. Analyse the following passage:-
 - A man who has been brought up among books, and is able to talk of nothing else, is a very indifferent companion, and what we call a pedant. But, methinks, we should enlarge the title, and give it to every one that does not know how to think out of his profession and particular way of life.
 - 9. Parse the words italicised in the above passage.

IV. COLLEGE OF PRECEPTORS, CERTIFICATE EXAMINATIONS, THIRD CLASS

First Specimen Paper

I have just done somewhat for Ned, which he could not do for himself: I have bound up his hand which he had badly cut. Wiping away some natural tears, he must needs say—"I am ashamed, aunt, that you should see me cry; but the worst of it is that all this pain is for no good; whereas when my uncle beats me for misconstruing my Latin, though I cry at the time, all the while I know it is for my advantage."

1. Say what parts of speech the following words are, and give the reason for your answer in each case:—somewhat, Ned,

worst, all, good, whereas, beats, Latin.

2. Parse fully each of the words in the clause—" aunt, that you should see me cry."

3. Give the subjects of could do, had cut, beats, know, and the direct objects of have done, could do, wiping, and misconstruing. Explain what you mean by the terms subject and object.

4. The conjunction that occurs twice in the above passage. What pairs of sentences are connected by it? What sentences are connected by the conjunction though?

1 "Preterite" is another name for Past Indefinite. Pluperfect is a name sometimes used for Past Perfect.

² This assumes the existence of a Potential mood, formed by can or could. This mood, however, is not now generally recognised. Can is regarded as a Principal, not an Auxiliary verb; and the Infinitive following is its object: see § 83 and § 84.

- 5. What are the following words ending in *ing*?—wiping, misconstruing. Which of them can be replaced by a clause and a conjunction? Make the change.
- 6. Point out the words modified by the adverbs badly, away, needs.
- 7. What auxiliary verbs do you find in the given passage? To what principal verbs are they respectively auxiliary? Explain what is meant by an Auxiliary verb.
- 8. Write with proper capitals, stops, inverted commas, etc.:—
 the pass of thermopylæ was favourable to the greeks for the
 persians could not avail themselves of their superior numbers
 xerxes sent messengers to leonidas king of sparta bidding him
 give up his arms he replied come and take them lands were then
 offered to the defenders of the pass on condition that they should
 become allies of the great king but the lacedæmonians answered
 it was their custom to win lands by valour not by treachery.

Second Specimen Paper

- "Friend Sancho," said Don Quixote to him, "I find the approaching night will overtake us ere we can reach Toboso, where I am resolved to pay my vows, receive my benediction, and take my leave of the peerless Dulcinea; for nothing in this world inspires a knight-errant with so much valour as the smiles of his mistress."
- 1. Name the parts of speech to which the following words belong, giving in each case the reason for your answer:—ere, where, peerless, for, knight-errant, as.
- 2. Parse as fully as you can :—" I find the approaching night will overtake us."
- 3. Write down the *subject*, and where possible the *direct object*, of each of the verbs given below. Tabulate your answer thus:—

Verb. Subject. Direct Object.

said

can reach

am resolved

inspires

4. Give, in a tabulated form, the Past Indefinite of the Indicative (first person singular only) and the Perfect Participle of all the verbs in the passage.

5. How do you distinguish between a *Personal* pronoun and a *Relative* pronoun? Write two sentences in illustration.

6. Construct short sentences to show the difference in meaning between the following words, and in each case name the part of speech to which each of these words belongs:—(1) some and sum, (2) vain and vein.

7. Name the different ways in which the subject of a sentence may be enlarged, and write two sentences as examples.

8. In the following passage supply the necessary capital letters and put in the stops and inverted commas where necessary:
—you are mad said the curate starting up astonished is thy master such a wonderful hero as to fight a giant at two thousand leagues distance then they heard don quixote bawling out stay villain since i have thee here thy scimitar shall but little avail thee.

Third Specimen Paper

Bramble took the glass off the top of the compass-box, lifted up the card, and then showed me the needle below, which pointed due north. He also showed me the north point above, and then the other points, and made me repeat them as he touched each with his finger.

1. What determines the part of speech a word is? Point out what each of the following words does in the above passage, and name the part of speech which it is:—up, and, then, he, also, other.

2. Parse fully:—" off the top of the compass-box," and "which pointed due north."

3. Write down all the *direct objects* of verbs in the given passage, and also the *verbs* which govern them, and the *subjects* of those verbs. Arrange your answer in a tabular form thus:—

DIRECT OBJECT. VERB. SUBJECT.

The escape Helped The captain

4. Give the present and the past participles of the verbs took, lifted, showed, pointed, made, touched.

5. Write two sentences, each containing a *Relative* pronoun, a *Personal*, and an *Interrogative* pronoun. Draw a single line under the Relative pronoun, two lines under the Personal pronoun, and three under the Interrogative pronoun.

6. In passing from one form of a word to another, when is the final consonant doubled? Give three instances.

- 7. Correct or justify the following sentences, giving your reasons:—
 - (i) He told me to go and lay down on the bed.
 - (ii) Who are you calling for? Is it me?
 - (iii) Your gold and silver is cankered.
 - (iv) The boys have a dozen tennis balls.
- 8. Write with proper capitals, stops, inverted commas, etc.:—i opened the boxes and to andersons surprise i counted out gold coin to the amount of four hundred pounds not a bad legacy said mr. wilson then you knew of this of course i anwsered i have known it some time ever since the attempt to rob her but what are these papers said the lawyer

Fourth Specimen Paper

Columbus was the first one of the Europeans who set foot in the New World which he had discovered. His men soon followed, and kneeling down they all kissed the ground which they had so long desired to see. They then took solemn possession of the country.

1. Point out what each of the following words does in the above passage, and name the part of speech to which it belongs:

—Columbus, first, on, discovered, soon, solemn.

2. Parse as fully as you can :- "And kneeling down they all

kissed the ground."

3. Write down the subject, and where possible the object, of each of the verbs given below. Tabulate your answer thus:—

VERB.

SUBJECT.

DIRECT OBJECT.

was

set had desired

took

- 4. Make a list of all the pronouns in the passage, and opposite each write what kind of pronoun it is.
- 5. Give the meanings of the following prefixes, and two instances of the use of each:—in, per, dis, re.
 - 6. Write short sentences containing:-

Jump(a) as a noun, (b) as a verb.

Up(a) as an adverb, (b) as a preposition.

That (a) as a pronoun, (b) as a pronoun of another kind.

- 7. State clearly the reasons for the corrections made in the following sentences:—
 - (a) "Neither John nor James were there."—Were should be was.
 - (b) "I am sure it was not him."—Him should be he.
 - (c) "He resembles one of those men who is always hesitating."

 —Is should be are.
- 8. Write with proper capitals, stops, inverted commas, etc.:—
 the traveller made three quick steps towards the jail then turning
 short tell me said he has that unnatural captain sent you nothing
 to relieve your distress call him not unnatural replied the other
 gods blessing be upon him he sent me a great deal of money
 but i made a bad use of it.

V. CORRECT OR JUSTIFY THE FOLLOWING. GIVE THE REASON OF EVERY CORRECTION THAT YOU MAKE

Exercise 23

- (a) 1. Let each see to their own. 2. Nobody can talk like he can. 3. Soldiers are tried by court-martials. 4. Neither he nor John say this. 5. These kind are the best. 6. Who do you think I saw yesterday? 7. Neither he nor I are expected. 8. Time and tide waits for no man. 9. Each of you in their turn will enjoy the benefits to which they are entitled. 10. Every leaf, every twig, every drop of water teem with life. 11. Do you know who you are speaking to? 12. Neither of them seem to have any idea of their ignorance. 13. They, which do their best, are most likely to succeed. (Oxford Junior.)
- (b) 1. Bacon's "Essays" are the most important of these two books. 2. Do you remember my cousin, whom we thought had settled in Australia? There is some talk of him returning. 3. Somebody called; I could not at first tell whom; but afterwards I found out it was her. 4. They had awoke him, as they said, to tell him that the river had overflown its banks. 5. Travelling along the line, the towers of the castle came in sight. 6. If this be him we mean, let him beware. 7. I saw the pickpocket and policeman on opposite sides of the street. 8. Who did you see at the regatta? 9. It is unfair to argue like you do. 10. For ever in this humble cell, | Let you and I, my fair one,

- dwell. 11. The number of failures were very great. 12. My lawyer is a man whom I know is trustworthy. 13. A thousand weary miles now stretch | Between my love and I. (Cambridge Junior.)
- (c) 1. No sound but their own voices were heard. 2. He is a boy whom I think likely to do well. 3. The phenomena of nature is wonderful. 4. Is she older or younger than him? 5. No one saw him leave the house, but me only. 6. Neither of the opponents were inclined to submit. 7. Each of these classes of men has wishes peculiar to itself. 8. When will we start? 9. I saw a young and old man sitting together. 10. She was the worst of the two. 11. They that backbite their neighbours stealthily, take care to rebuke sharply. 12. If I had not broke your stick, you would never have run home. 13. I saw a black and white man walking together. 14. I am neither an ascetic in theory or practice. 15. Of these mistakes none are very serious. 16. I don't know who he has gone with. (Preceptors' Third Class.)
- (d) 1. On the garden seat was his book and pencil. 2. Who can it be from? 3. The ship with all the passengers were destroyed. 4. No one expressed their opinion so clearly as him. 5. At the club dinner the usual loyal toasts were drank first of all. 6. The steam-engine as well as the telegraph were still unknown. 7. He sings better than ever. 8. Stouter hearts than a woman have quailed in this terrible trial. 9. He has appointed as commander nobody knows who. 10. It is not me he injures so much as himself. 11. Having failed in this experiment, no further trial was made. (Preceptors' Third Class.)
- (e) 1. It is sometimes said that the Nile is longer than all the rivers of the eastern and western hemispheres. During the past week it has overflown its right and left banks. 2. Each of the three last were expected to have stopped and voted. 3. Judging from the time taken, the race was rowed quicker than in all previous years. 4. More than one swimming-prize is to be given for boys of thirteen years old. 5. Whom do you think I met to-day? Both your cousins! The oldest had on a new and a most fashionable pair of boots, like you saw Henry wearing yesterday. 6. I don't believe you have got a better bicycle or even as good as me. 7. He must decide between you and I going to him or him coming to us. 8. There goes John with

both his dogs on either side of him. 9. When Nelson was ill, he complained of "the servants letting me lay as if a log, and take no notice." 10. I have now the perfect use of all my limbs except the left arm, which I can hardly tell what is the matter with it. 11. From my shoulder to my fingers' ends are as if half dead. (Cambridge Senior.)

- (f) 1. He carried a jaunty sort of stick. 2. They demanded a fair day's wage for a fair day's work. 3. It is not that offends. 4. Now either spoke as hope or fear impressed | Each their alternate triumph in his breast. 5. Your betters have endured me say my mind. 6. After doing the work, his face brightened. 7. Three parts of him is ours already. 8. The wealth of London is greater than Oxford. 9. This is a dress of my mother's. 10. He said that he will soon be back. 11. Nothing but rough games please the boys. 12. 'Twas Love's mistake who fancied what it feared. 13. She suffers hourly more than me. 14. He comes; nor want nor cold his course delay. (Oxford Senior.)
- (g) 1. You and her will be too late without you start soon. 2. Me and he can manage it without you interfering. 3. Let who will say no. you shall go with Will and I. 4. Each of these cathedrals were founded in the two-hundredth and first year after the death of Alfred. 5. Good order, and not mean savings, produce great profit. 6. The literary and commercial value of a book are not necessarily the same. 7. Neither James nor John were there. 8. I fully approve of your going. 9. Let you and I take our own course. 10. Who are going with? 11. The Palmer (or De Wilton, whom he really was). 12. The idle and industrious men came together. 13. He won't go, I don't believe. 14. If William goes to-morrow, will I go to? 15. He said he will give the book to whoever he pleased. 16. A certain portion of auxiliaries were allotted to each legion. 17. To be sold, the stock of Mr. Smith's left-off business. 18. If I had been there, you would not have attempted to have done that. 19. You know that I am, not less than him, a despiser of the multitude. (Preceptors' Second Class.)
- (h) 1. Whom did you say the man was who spoke to you just now? 2. He ran so fastly up the hill that neither Jean or me could overtake him. 3. Will you allow my brother and I to finish what we have begun? 4. Adversity both teach men to think and to feel. 5. At the bottom of the road lay a stream

to wide to jump. 6. Who do you think was there? 7. Whom are you going with? 8. They gained nothing by it, and neither did you. 9. They walked by two's and three's. 10. It was my own stupid pride prevented me going. 11. We sorrow not as them that have no hope. 12. I think I will be gone by the time you come. 13. I cannot tell if it be wise or no. 14. Land is not thought to be so good a security as formerly. 15. He was one of the noblest men that has appeared in this century. 16. I should have liked to have been shown to-day the full cost of this war. 17. Anybody may go for the key: I care not who. 18. A few hours' consideration are quite enough. 19. This is the man whom I believed rescued the dog. 20. Nelson was greater than any sailor of his time. 21. He cannot run faster than neither me or John. 22. My partner was a much greater gainer than me by this arrangement. 23. I had ought to be punctual. 24. The attack of the enemy upon our left was foiled: they then endeavoured to outflank the Egyptians with the bulk of their forces. 25. Men of greatest learning have spent their time in finding out the dimensions, and even weight, of the planets. (Preceptors' Second Class.)

VI. ON THE ORDER OF WORDS

Exercise 24

The great rule to be observed in fixing the order of words is this:—Things which are to be thought of together must be mentioned together. So a word or phrase should always be placed as close as the context allows to the word or phrase that it is meant to go with.

Thus an adjective or adjective-equivalent must be kept as close as possible to its noun or pronoun; a verb to its object or to its complement; an adverb or adverbequivalent to the word that it is intended to qualify; a preposition to its object; a relative pronoun to its antecedent.

The sense of a sentence very often depends upon the order of the words, as in the following examples:—

Books authorised by teachers as fit for use. Books authorised as fit for use by teachers. Improve, if necessary, the order of words in the following

- (a) 1. The experiment of entrusting lodgers with keys has only failed in a few instances. 2. Ellen went with me too. 3. In thirty-seven wrecks only five lives were fortunately lost. 4. The one was nearly dressed in the same way as the other. 5. She was only allowed to occupy the smaller room. 6. The following verses were written by a young man who has long since been dead for his own amusement. (Oxford, Cambridge, Preceptors'.)
- (b) 1. He was shot by a secretary who was under notice to quit and with whom he was finding fault, fortunately without effect. 2. You have already been informed of the sale of Ford's theatre, where Mr. Lincoln was assassinated, for religious purposes. 3. The Moor, seizing a bolster, full of rage and fury smothers her. 4. Being early killed, I sent a party in search of his mangled body. (London Matriculation.)
- (c) 1. The chair cost ten shillings on which he sat. 2. A gang of robbers entered the house at night armed from head to foot. 3. He repeated those lines after he had read them once with perfect accuracy. 4. They found the house on the top of a hill where they wished to spend the night. 5. The general ordered indignantly the deserters to be shot. 6. An unquestioned man of genius. 7. He cannot be said to have died prematurely whose work was finished, nor does he deserve to be lamented, who died so full of honours (Southey). 8. I never remember to have felt an event more deeply than Horner's death. 9. The death occurred last week in Madrid of Mr. W. Macpherson, formerly British vice-consul at Seville. 10. No one is entitled to form or express an opinion on the relations between Nelson and Lady Hamilton, or on the parentage of Horatio, who has not carefully studied the letters to be found in this invaluable collection.
- VII. CONSTRUCT SHORT SENTENCES OR PHRASES SHOWING HOW THE SAME WORD CAN BE USED IN DIFFERENT PARTS OF SPEECH

A.—(1) Indefinite article; (2) disguised preposition.

After.—(1) adverb; (2) preposition; (3) conjunction;
(4) in composition.

All.—(1) adjective of quantity; (2) adjective of number; (3) noun; (4) adverb.

Any.—(1) adjective; (2) adverb.

As.—(1) Relative pronoun; (2) Relative adverb denoting (a) time, (b) manner, (c) state, (d) extent, (e) reason; (3) in elliptical phrases.

Awake.—(1) verb; (2) adverb.

Back.—(1) noun; (2) adverb; (3) verb; (4) in composition.

Before.—(1) adverb; (2) preposition; (3) conjunction.

Behind.—(1) adverb; (2) preposition.

Better.—(1) adjective; (2) adverb; (3) noun; (4) verb.

Both.—(1) adjective; (2) conjunction.

But.—(1) preposition; (2) adverb; (3) co-ordinating conjunction; (4) subordinating conjunction.

By.—(1) adverb; (2) preposition; (3) in composition.

Calm.—(1) adjective; (2) noun; (3) verb.

Chief, cold, common.—(1) adjective; (2) noun.

Clear, correct, corrupt.—(1) adjective; (2) verb.

Close.—(1) adjective; (2) adverb; (3) noun; (4) verb.

Compact, compound, content.—(1) adjective; (2) noun; (3) verb.

Dainty, dark, dead, deep, due.—(1) adjective; (2) noun.

Damp, desert, double, dread.—(1) adjective; (2) noun; (3) verb.

Direct, dull.—(1) adjective; (2) verb.

Down.—(1) noun; (2) adverb; (3) preposition.

Early.—(1) adjective; (2) adverb.

Either.—(1) adjective; (2) conjunction.

Elect.—(1) verb; (2) adjective; (3) noun.

Elder, English, evil, extreme.—(1) adjective; (2) noun.

Else.—(1) adverb; (2) conjunction.

Empty, equal.—(1) adjective; (2) verb.

Enough.—(1) adverb; (2) adjective; (3) noun.

Faint.—(1) adjective; (2) verb.

Far, fast.—(1) adverb; (2) adjective.

Few.—(1) adjective; (2) noun.

Firm.—(1) adjective; (2) noun.

First.—(1) adjective; (2) adverb.

Fit.—(1) adjective; (2) noun; (3) verb.

For.—(1) preposition; (2) conjunction.

Four.—(1) adjective; (2) noun; (3) in composition.

Further.—(1) adjective; (2) adverb; (3) verb.

Gold, good, Greek.—(1) noun; (2) adjective.

Half.—(1) adjective; (2) noun; (3) adverb.

Hard.—(1) adjective; (2) adverb.

Ill.—(1) adjective; (2) adverb.

Invalid.—(1) adjective; (2) noun.

Late, last, little, less, least.—(1) adjective; (2) adverb. Light (luminous).—(1) adjective; (2) noun; (3) verb.

Long.—(1) adjective : (2) adverb : (3) verb.

Loose.—(1) adjective: (2) verb.

Many.—(1) adjective; (2) noun.

Marble, mean (middle), middle.—(1) noun; (2) adjective.

Might.—(1) verb; (2) noun.

Model.—(1) noun; (2) adjective; (3) verb.

More.—(1) adjective; (2) adverb; (3) noun.

Most.—(1) adjective; (2) adverb; (3) noun.

Narrow.—(1) adjective: (2) verb.

Native, new, novel, nuptial.—(1) adjective; (2) noun.

Near.—(1) adjective; (2) adverb; (3) preposition; (4) verb.

Needs.—(1) verb; (2) adverb; (3) noun.

Neither.—(1) adjective; (2) conjunction.

Next, no.—(1) adjective; (2) adverb.

None.—(1) Negative pronoun; (2) adverb.

Odd.—(1) adjective; (2) noun.

Off, on.—(1) preposition; (2) adverb.

One.—(1) adjective; (2) pronoun.

Only.—(1) adjective; (2) adverb; (3) conjunction.

Open.—(1) adjective; (2) noun; (3) verb.

Other.—(1) adjective; (2) noun.

Over.—(1) preposition; (2) verb.

Own,—(1) adjective; (2) verb.

Past.—(1) adjective; (2) preposition; (3) adverb.

Patent.—(1) adjective; (2) noun; (3) verb.

Perfect.—(1) adjective; (2) verb.

Public.—(1) adjective; (2) noun.

Quack, quiet.—(1) verb; (2) noun; (3) adjective.

Quick.—(1) adjective; (2) noun.

Rapid.—(1) adjective; (2) noun.

Right, rival.—(1) adjective; (2) noun; (3) verb.

Round.—(1) adj.; (2) prep.; (3) adverb; (4) verb; (5) noun.

Salt, set.—(1) adjective; (2) noun; (3) verb.

Save.—(1) verb: (2) preposition.

Since.—(1) preposition: (2) adverb; (3) conjunction.

So.—(1) adverb; (2) conjunction.

Some.—(1) adjective; (2) adverb.

Somewhat.—(1) adverb; (2) roun.

Still.—(1) adjective; (2) adverb; (3) verb.

Such.—(1) adjective; (2) pronoun.

Than.—(1) conjunction; (2) preposition.

That.—(1) adjective; (2) Demonstrative pronoun; (3) Relative pronoun; (4) conjunction.

The.—(1) Definite article: (2) adverb.

Through, to, under, up.—(1) preposition; (2) adverb.

Till.—(1) preposition; (2) conjunction.

Trim.—(1) adjective; (2) noun; (3) verb.

Well.—(1) adverb; (2) conjunction; (3) noun.

What.—(1) Interrogative pronoun; (2) Relative pronoun; (3) adverb.

While.—(1) noun; (2) conjunction.

Yet.—(1) conjunction; (2) adverb.

PART IV.—ANALYSIS, CONVERSION, AND SYN-THESIS OF SENTENCES: SEQUENCE OF TENSES

CHAPTER XXIV.—SENTENCES SIMPLE, MULTIPLE, AND COMPLEX

110. Simple Sentence.—A Simple sentence (Lat. simplex, single-fold) is one that has only one Finite verb expressed or understood.

Subject. property to sell,

Predicate. The merchant, having much caused all his goods to be conveved on camels, there being no railway in that country.

In this sentence there are five different verbs, "having," "to sell," "caused," "to be conveyed," "being." Of these only one, viz. "caused," is finite, as this is the only verb out of the five which has or could have a Subject attached to it. Since there is only one Finite verb, the sentence is Simple.

111. Double or Multiple Sentence.—A double sentence is made up of two, a multiple sentence of more than two, Coordinate clauses. (This definition is not quite complete, but it will suffice for the present. A complete definition is given below in § 131.)

Clauses are said to be Co-ordinate, when one can be separated from the other so that each makes an independent

sentence and gives an independent sense.

The sun rose with power, and the fog dispersed. He called at my house, but I was not at home.

Note.—Observe the difference between **Sentence**, **Clause**, and **Phrase**. (1) A sentence is a combination of words that contains at least one subject and one predicate. (If a subject as a predicate is absent, but implied, the combination, though elliptical, is still a sentence.) (2) A sentence which is part of a larger sentence is called a clause. (3) A phrase is a combination of words that does not contain a predicate either expressed or understood; as "turning to the left" (participial phrase), "on a hill" (adjective or adverb phrase), "because of" (preposition phrase).

112. Complex Sentence.—A Complex sentence consists of a Main clause (i.e. the clause containing the main verb of the sentence) with one or more Subordinate or dependent clauses.

Complex A merchant, who had much property to sell, caused all his goods to be conveyed on camels, as there was no railway in that country.

Simple { A merchant, having much property to sell, caused all his goods to be conveyed on camels, there being no railway in that country.

The two sentences mean precisely the same thing, and both have a Finite verb in common, "caused." But in other respects they are very different. In the latter there is but one Finite verb, "caused," and therefore the sentence is Simple. In the former, besides the Finite verb "caused," there are two more Finite verbs, "had" and "was," and therefore the sentence must be either Complex or Double. Which is it?

It is not Double, but Complex, because—(1) the clause "who had much property to sell" is connected with the noun merchant, which it qualifies as an adjective would do; and (2) the clause "as there was no railway in that country" is connected with the verb caused, which it qualifies as an adverb would do. Neither of these clauses can stand alone. So there is one Main or Containing clause and two Subordinate or Contained clauses.

- 113. There are three kinds of Subordinate clauses—the Noun-clause, the Adjective-clause, and the Adverb-clause; and these are defined as follows :-
- I A Noun-clause is one which does the work of a noun in relation to some word in some other clause.
- II. An Adjective-clause is one which does the work of an adjective in relation to some word in some other clause.
- III. An Adverb-clause is one which does the work of an adverb in relation to some word in some other clause.

Note.—The same clause may be a Noun-clause in one context, an Adjective-clause in another, and an Adverb-clause in another. Where Moses was buried is still unknown.

-Noun-clause, subject to the verb "is."

No one has seen the place where Moses was buried.

-Adj.-clause, qualifying the noun "place."

Without knowing it the Arabs encamped where Moses was buried. -Adverb-clause qualifying the verb "encamped."

I. The Noun-clause

114. A Noun-clause is subject to all the liabilities and duties of a noun proper. It may therefore be the subject to a verb, the object to a verb, the object to a preposition, the complement of a verb, or in apposition with a noun:-

That he will come back soon is certain . Subj. to verb. I shall be glad to know when you will return . Obj. to verb. This will sell for what it is worth . Obj. to prep. This is exactly what I expected . Compl. to verb. The rumour that he is sick is false . App. to noun.

Note 1.—From the above examples it will be seen that a Noun-clause can be introduced either by the Conjunction "that" or by a Relative pronoun or by a Relative adverb.

Note 2.—A clause containing the very words used by a speaker is not to be regarded as a Noun-clause but should be treated as a single word or phrase :-

All that he said was "I have seen you before."

Here the italicised clause is the complement to the verb "was." The whole sentence is regarded as a simple sentence.

Exercise 25

Pick out the Noun-clause or clauses in each of the following, and say whether it is the Subject to some verb, or the Object to some verb, or the Object to some preposition, or the Complement to some verb, or in Apposition to some noun expressed. Supply the Conjunction "that" whenever it has been left out :-

- 1. No one knows when he will come, or whether he will come at all, or whether he is even alive.
 - 2. How this came to pass is not known to any one.
 - 3. What is sauce for the goose is sauce for the gander.
 - 4. It is quite evident rain will fall to-day.
- 5. The Equator shows where days and nights are of equal iength.
 - 6. What is one man's meat is another man's poison.
 - 7. You must know that the air is never quite at rest.
 - 8. I think I shall never clearly understand this.
 - 9. We heard the school would open in ten days' time.
- 10. The name "Volcano" indicates the belief of the ancient Greeks, that the burning hills of the Mediterranean were the workshops of the divine blacksmith, Vulcan.
 - 11. Even a feather shows which way the wind is blowing.
 - 12. Whatever faculty man has is improved by use.
 - 13. The fool hath said in his heart, "There is no God."
 - 14. "Know thyself," was the advice given us by a Greek sage.
 - 15. He did not know that his father had been shot.
- 16. The fact that you have not signed your name to a letter shows that you lack moral courage.
- 17. It will be easily understood how useful even the simplest weapons were to the first dwellers on the earth.
- 18. The question first occurring to the mind of a savage is how is fire to be made.
- 19. Common sense soon taught him that fire could be produced by rubbing two sticks together.
- 20. In chipping their flint weapons men must have seen that fire occasionally flashed out.
- 21. We learn from travellers that savages can produce fire in a few seconds.
 - 22. He shouted out to the thief, "Leave this house."
 - 23. We cannot rely on what he says.

- 24. It is quite evident you have made a mistake.
- 25. It was very unfortunate that you were taken ill.
- 26. He was a man of fine character except that he was rather timid.

II. Adjective-clause

115. An Adjective-clause has but one function, viz. to qualify some noun or pronoun belonging to some other clause. In doing this it simply does the work of an adjective proper. An Adjective-clause is introduced by a Relative pronoun or by a Relative adverb. The noun or pronoun that stands as antecedent to the Relative pronoun or Relative adverb, is the word (§ 113, II) qualified by the Adjective-clause.

A man who has just come inquired after you.

This is not the book that I chose.

This is not such a horse as I should have bought.

We found it in the place where we had left it.

Note.—The Relative pronoun (when the case would be Accusative) is sometimes left out. (It is never left out when the case is either Nominative or Genitive.)

The food (that or which) he needed was sent.

Exercise 26

Pick out the Adjective-clause or clauses in each of the following examples, and point out the noun or pronoun qualified by it in some other clause. If the Relative pronoun has been omitted anywhere, supply it:—

- 1. Man has the power of making instruments, which bring into view stars, whose light has taken a thousand years to reach the earth.
- 2. The first thing that man needed was some sharp-edged tool.
- 3. The exact time when the theft was committed was never found out.
- 4. The man by whom the theft was committed has been caught.
 - 5. The house we lived in has fallen down.
 - 6. This is the same story that I heard ten years ago.

- 7. It's an ill wind that blows no one any good.
- 8. This is not such a book as I should have chosen.
- 9. He made his living by the presents he received from the men he served.
 - 10. All that glitters is not gold.
- 11. In ponds, from which but a week before the wind blew clouds of dust, men now catch the re-animated fish.
- 12. A river is joined at places by tributaries that swell its waters.
- 13. Of what use is a knowledge of books to him who fails to practise virtue ? $\,$
 - 14. Fortune selects him for her lord, who reflects before acting.
- 15. Springs are fed by rain, which has percolated through the rocks or soil.
- 16. Nuncoomar prepared to die with that quiet fortitude with which the Bengalee, so backward, as a rule, in personal conflict, often encounters calamities for which there is no remedy.
 - 17. I have seen the house where Shakespeare was born.
 - 18. The plan you acted on has answered well.
 - 19. They accepted every plan we proposed.
 - 20. Surely the story you are telling me is not true.
 - 21. Thrice is he armed that hath his quarrel just.
 - 22. The night is long that never finds the day.

III. The Adverb-clause

116. An Adverb-clause does the work of an adverb to some verb, adjective, or adverb belonging to some other clause.

Those conjunctions which are used for introducing an adverb-clause are called Subordinating.

	0	
Main Clause.	$Adverb ext{-}Clause.$	Adverbial Relation.
He will succeed .	because he works	
	hard	Reason or Cause.
He worked so hard	that he was taken ill	Result or Effect.
He took medicine	that he might get	
	well	Purpose.
I will do this .	if I am allowed .	Condition.
He is honest .	although he is poor	Concession or Contrast.
He likes you more	than (he likes) me.	Commanicon
He likes you .	as much as I do . S	Comparison.

134 ANALYSIS AND SYNTHESIS OF SENTENCES FART IV

Main Clause. Adverb-Clause. Adverbiai Relation.

The pain ceased . *when the dentist

came in . . . Time.

Fools rush in . *where angels fear to

tread . . Place.

Note.—Those conjunctions which are marked with an asterisk, namely when, where, are also known as Relative or Conjunctive adverbs. See § 59. To the same class belong the words how, why, whether, whither.

117. After the conjunctions though, when, unless, till, if, whether . . . or, and while, the Predicate-verb "to be" in some finite form is often understood. This must be supplied in the Analysis.

Though (he was) much alarmed, he did not lose all hope. He sprained his foot, while (he was) walking in the dark. His opinion, whether (it is) right or wrong, does not concern me.

118. When an adverb-clause is introduced by "than," its Predicate-Verb is sometimes not expressed; it must therefore be borrowed from the clause to which it is sub-ordinate:—

He loves you better than (he loves) me. He loves you better than I (love you).

Exercise 27

Pick out the Adverb-clause or clauses in the following. Show what word or phrase is qualified by every such clause, and what Adverbial relation is denoted thereby:—

- 1. He will succeed, because he has worked hard.
- 2. Men engage in some work, that they may earn a living.
- 3. He threatened to beat him, unless he confessed.
- 4. He was always honest, although he was poor.
- 5. This is not true, so far as I can tell.
- 6. He likes you as much as I do.
- 7. He tried for a long time before he succeeded.
- 8. Let us go to bed, as it is now late.
- 9. He walked with care, lest he should stumble.

- 10. I agree to this, provided you sign your name.
- 11. Though he punish me, yet will I trust in him.
- 12. He returned home, after he had finished the work.
- 13. Prove a friend, before you trust him.
- 14. When the cat's away, the mice play.
- 15. He persevered so steadily, that he succeeded at last.
- 16. I will let off this man, who has been well punished already.
- 17. He sees very well, considering that he is sixty years of age.
- 18. I gave him a prize, that he might work harder next year.
- 19. They deserted their former associate, who had become poor and unfortunate.
 - 20. As the tree falls, so will it lie.
 - 21. Ever since we left the house, it has not ceased raining.
- 22. I should be glad to lend you that money, if I had as much in my own pocket.
 - 23. Murder, though it have no tongue, will yet speak.
- 24. Unless you leave the house at once, I will send for a policeman.
- 25. A jackal, while prowling about the suburbs of a town, slipped into an indigo tank; and not being able to get out he laid himself down, so that he might be taken for dead.
- 26. Ambassadors were sent from Sparta, who should sue for peace.

CHAPTER XXV.—THE METHOD OF ANALYSIS

119. Form of Analysis.—The following form will be sufficient for the purposes of this chapter. The fourth example is a Complex sentence; the other three are Simple sentences:—

A man convinced against his will is of the same opinion still.

He made himself mean and of no reputation.

The second master or the school has been teaching my sons Euclid since Thursday last.

Whom the gods love die young.

I. So	BJECT.	II. PREDICATE.					
Nominative	Enlarge-	Finite	Completion of 1	Extension			
or Equivalent.	ment of Nominative.	Verb.	Object. (1) Direct or (2) Indirect.	Comple- ment.	of Finite Verb.		
1	2	3	4	5	6		
man	(1) A (2) convinced against his will	is	***	of the same opinion	still.		
He	***	made	himself	mean and of no reputation.			
master	(1) The (2) second (3) of the school	has been teaching	(1) Direct Euclid (2) Indirect my sons	•••	since Thursday last.		
Whom the gods love	•••	die	•••	young.			

120. Nominative or its equivalent: see heading to col. 1. This is the chief part of the Subject, and when there is no enlargement, it is the only part. It is this that fixes the number and person of the Finite verb. Its most typical form is that of a noun or pronoun in the Nominative case. This is sometimes called the Subject-word, so as to distinguish it from what is called the Enlargement.

The following is a list of the various forms in which the Subject-word or its equivalent can be expressed. There is no need to commit this list of forms to memory. They are enumerated to show what the student may expect to find.

- (1) Noun.—A ship went out to sea yesterday.
- (2) Adj. used as Noun.—The brave are always respected.
- (3) Pronoun.—He (some one previously named) has gone.
- (4) Noun-Infinitive.—To walk regularly is good for health.
- (5) Gerund.—Reading is good for the mind.

- (6) Noun-phrase.—How to do this is a difficult question.
- (7) Noun-clause.—Whom the gods love die young.

Note 1.—Sometimes a sentence begins with "it," and the Subject is placed after the verb: "It is easy to do this." Here the "it" is redundant, and may be left out in the analysis:—"To do this is easy."

Note 2.—When the Finite verb is in the Imperative mood, the Nominative is understood, as, go! Here go is the Finite verb, and thou or you is the implied Nominative.

121. Enlargement: see heading to col. 2. The most typical form is an Adjective. We call this "enlargement," because an adjective, according to the definition given, is a word that adds to or enlarges the meaning of a noun or pronoun.

The following is a list of the various forms in which an "enlargement" can be expressed. The list is long, but there is no need to commit it to memory.

- (1) Adjective.—Just men deserve to prosper.
- (2) Participle.—A fertilising shower fell to-day.
- (3) Qualifying Infin.—Water to drink is scarce in this place.
- (4) Noun in the Genitive or Possessive Adj.—Your teacher has come.
- (5) Noun used as Adj. (§ 98).—The village school opens to-day.
- (6) Gerund used as Adj.—Drinking water is scarce here.
- (7) Prep. with object.—A man of virtue does not tell lies.
- (8) Adverb with Def. article. The then king died suddenly.
- (9) Noun in Apposition.—Charles, my son, has come.
- (10) Noun-clause in Appos.—The rumour that he was dead is false.
- (11) Adjective-clause.—The house in which we live has been sold.
- 122. Finite verb: see heading to col. 3. This is the chief part of the predicate, and, when the verb is Intransitive and requires no Complement, it can be the only part; as "Hogs grunt."

If the tense or mood of the Finite verb is formed, not by inflection, but by the help of one or more of the six Auxiliary verbs (see § 79), remember that the Auxiliary verb or verbs and the Principal verb together make up the "Finite verb," and must be mentioned together in column 3.

Subject.	Finite Verb.	Object.
I	have been examining	the pictures.

But if the previous verb is not Auxiliary, as "will," for instance, when it occurs in the first person of the Future tense (§ 80), in such a sentence will alone makes the Finite verb, and the Noun-Infinitive that follows is its Object:-

Subject.	Finite Verb.	Object.
I	will (=I intend)	see him to-morrow. (=to see him, etc.)

- 123. Object. Direct or Indirect: see col. 4. The different forms in which a Direct object can be expressed are the same as those in which the Nominative can be expressed (§ 120). On Direct and Indirect see § 93.
 - (1) Noun.—The snake bit the man.
 - (2) Adi. used as Noun.—He satisfied the public.
 - (3) Pronoun.—My friend will not deceive me.
 - (4) Noun Infinitive.—He deserves to succeed.
 - (5) Gerund.—He likes riding.
 - (6) Noun-phrase.—We did not know how to do it.
 (7) Noun-clause.—We do not know who he is.

There are only two forms in which an Indirect object can be expressed, viz. a noun or some personal pronoun:-

He gave James a book . (Trans, verb.) He overslept himself . (Intrans. verb.)

124. Complement: see heading to col. 5. The following are the various forms in which a Complement can be expressed. The student will no doubt remember from what he has learnt in § 63 that a verb followed by a Complement may be either Transitive or Intransitive, the Complement in the former case being objective, in the latter subjective.

The various forms of Complement should not be committed to memory. They are given merely to show the

student what he may expect to find.

/T\	Noun	∫The citizens made him their king	(Obj.)
(1) Noun	моиц	That beggar turned out a thief	(Subj.)
(2)	Poss. Pro. or	She made A's quarrel her own	(Obj.)
. ,	Gen. Noun	This book is mine, not James's	(Subj.)
(9)	Adjoctivo	The judge set the prisoner free	(Obj.)
(3)	Adjective	The prisoner has been set free	(Subj.)
(4)	Dorticinlo	They found her weeping .	(Obj.)
(4)	Participle	He seemed much pleased .	(Subj.)
(5)	Prep. with	(I prefer a dog to a cat	(Obj.)
	object	He is in a sad plight	(Subj.)
(6)	Qualifying	(I like a thief to be punished .	(Obj.)
, , -	Infinitive	This house is to let	(Subj.)
(7)	Advanh	That noise sent him asleep .	(Obj.)
(1)	Adverb	The man has fallen asleep .	(Subj.)
(8) Noun-clas	Norm clores	(We have made him what he is	(Obj.)
	Noun-clause	The result is what we expected	(Subi.)

125. Extension: see heading to col. 6. The most typical form is an Adverb. We call this "extension," because an adverb, according to the definition given, is a word that adds to or extends the meaning of the word with which it is connected.

Two points should be noticed: (1) In the analysis of sentences (not in parsing, which is a different kind of operation), extension applies only to the Finite verb of its own clause: if an adverb or adverb-equivalent belongs to any part of a sentence except the Finite verb, it must not be placed in column 6. (2) "Extension" means the same thing as "enlargement." But as one relates to the Finite verb, and the other to the Nominative or its equivalent, it is convenient in analysing sentences to give tham separate names.

Enlargement and Extension are sometimes called by the name of Adjunct, the former being of course adjectival, the latter adverbial.

(1) Adverb.—He slept soundly.

(2) Prep. with object.—He slept for six hours.

(3) Qualifying Infin.—He came to see the horse.

(4) Adverbial accusative.—Bind him hand and foot.

(5) Absolute phrase.—We all set off, he remaining behind.

(6) Adverb-clause.—We all set off, while he remained behind.

Note.—The student is reminded that the adverb there, in such a context as that described in § 40, (e) Place is merely introductory, and has no adverbial force. When it is so used, it must not be entered in the Extension-column. It must be simply left out.

Analyse each of the following sentences, using the model given in § 119, and say whether it is Simple of Complex.

1. He was the only son left to his widowed mother.

2. The sun is darting its rays from the edge of that cloud.

3. The king himself was willing to surrender.

4. The firm sent him out on a voyage of discovery.

5. Who steals my purse steals trash.

6. He deserves all the success that he can get.

7. The earnest endeavour of the Czar was to secure peace.

8. He called them up to explain to them his decision.

9. What to say or do at such a time was a puzzle.

10. Sir Isaac Newton explained the ebb and flow of the tides

11. He that hath ears to hear, let him hear.

12. This is what they call a very modest request.

13. The thief was ordered to be locked up.

14. The night being now far spent, we must go no further.

15. Thy father and I sought thee sorrowing.

16. It is easy to be wise after the event.

17. Whatever he says is right in his own opinion.

18. I cannot foresee what the consequences will be.

19. They sat themselves down on the bank to rest.

20. Fare thee well !-Byron.

21. Why is there so much wailing on board your ship?

22. They found the soldiers encamped on Salisbury Plain.

23. There are very few houses to let in this town.

- 24. They questioned him eagerly about the voyage.
- 25. It is never too late to mend.

CHAP. XXV

- 26. The righteous shall be had in everlasting remembrance.
- 27. He gave his eldest son the first choice.
- 28. Praising a man is not always to his benefit.
- 29. He told me with much sorrow what he had done.
- 30. I hope soon to take up the study of history.
- 31. He who complies against his will Is of the same opinion still.
- 32. Being so far from her own country, she begged me to take her back in my ship.
 - 33. The above remarks are well worthy of attention.
 - 34. I prefer riding a bicycle to riding a horse.
 - 35. The old woman told him the sad story weeping.
 - 36. One day he went to work in the garden.
 - 37. His father died when he was ten years old.
 - 38. He failed to fulfil his engagement punctually.
 - 39. To place pleasure before duty is the mark of a fool.
 - 40. I never knew any one so difficult to manage.
 - 41. What puzzles me most is his quickness of hand.
- 42. My friend the carpenter's health has improved since yesterday.
 - 43. The life of a hunter has no attractions for me.
 - 44. He told me how, when, and where to find the thief.
 - 45. I am not able to satisfy your curiosity.
 - 46. Shortly after, he fitted out another ship for himself.
 - 47. Youth and experience seldom exist together.
 - 48. Digging is a very healthy form of exercise.
 - 49. His jealousy for the honour of his calling is commendable.
 - 50. How to answer such a question is beyond me.
 - 51. I will tell you when I feel better.
 - 52. I begin to feel better already.
 - 53. The hope that he will soon recover is groundless.
 - 54. That tree is above a hundred feet high.
 - 55. I cannot satisfy your curiosity.
 - 56. He walked ten miles without once sitting down.
 - 57. What you have still to learn is perseverance.
 - 58. The poor are always amongst us.
 - 59. He ought not to have left his friend in the lurch.
 - 60. How much do these poor men owe you?
 - 61. The sailors overslept themselves next morning.

142 ANALYSIS AND SYNTHESIS OF SENTENCES PART IV

- 62. A thief should not go unpunished.
- 63. We were afloat on the river by 4 o'clock.
- 64. The result that we had so long waited for is out at last.
- 65. Though all his friends deserted him, he stood firm.
- 66. Why are all these men in such a hurry?
- 67. The innocent often suffer for the guilty.
- 68. Many of us had no sleep last night.
- 69. My son has learnt how to ride a bicycle.
- 70. The proof of the pudding is in the eating.
- 71. You cannot make a silk purse out of a sow's ear.
- 72. Two hundred workmen have gone on strike.
- 73. What you offer to do is not what I want.
- 74. They appointed him trustee of the estate.
- 75. The ship having anchored, we can go ashore.
- 76. Alexander the Great, the son of Philip, conquered the king of Persia.
 - 77. A man to carry my box must be sent for.
 - 78. How he could have made such a mistake is a mystery.
 - 79. There is no happiness without health.
 - 80. A resting place could not be found.
 - 81. What has made him so down-hearted is unknown to us.
 - 82. To work and rest alternately is the common lot of man.
 - 83. He loved nothing but vain and foolish pursuits.
 - 84. He does not deserve to be more liberally treated.
 - 85. Jonathan, the friend of David, refused the kingdom.
 - 86. The excuse he made was not accepted.
 - 87. God's ways are different from ours.
 - 88. All men think all men mortal but themselves.
 - 89. Those days have passed never to return.
 - 90. However much you may try you will not deceive me.
 - 91. He went away meditating on what he had heard.
 - 92. To start in business without capital is almost impossible.
 - 93. The firm have taken me into partnership.
- 94. On the completion of his schooling he was sent out to one of the colonies.
- 95. The last voyage of Sir Walter Raleigh was to the Orinoco river.
 - 96. What we have seen is not what we expected.
 - 97. The evil which men do lives after them.
 - 98. The good is oft interred with their bones.

CHAPTER XXVI.—DOUBLE AND MULTIPLE SENTENCES

126. A Double sentence is one made up of two, a Multiple sentence of more than two Co-ordinate (that is, co-equal or independent) clauses. See § 111.

Those conjunctions which are used for binding together the different clauses, of which a Multiple sentence is made

up, are called Co-ordinating.

Co-ordinating conjunctions are distinguished into-

(1) Cumulative (adding);

(2) Alternative (offering a choice);

- (3) Adversative (expressing a contrast or a difference);
- (4) Illative (drawing an inference).

The following examples will suffice :-

- (1) The sun rose with power, and the fog dispersed (Cumulative.)
- (2) Either he must leave the house or I (must leave the house) (Alternative.)
- (3) He called at my house, but I did not see him . (Adversative.)
- (4) He came back tired; for he had walked all day (Illative.)
- 127. Co-ordinate clauses can also be joined together by a Relative pronoun or Relative adverb, provided it is used in a parenthetical or merely continuative sense, and not in a restrictive or qualifying sense.

He met John, who was in London at that time (Contin.)
He met the man with whom he had made an appointment
(Restrict.)

- 128. Contracted Sentences.—Double and multiple sentences often appear in a contracted or shortened form, so as to avoid the needless repetition of the same word:—
- (a) When there are two Finite verbs to the same Nominative, the Nominative is not usually mentioned more than once, but it must be repeated in the Analysis:—
 - (1) The sun rose and (the sun) filled the sky with light.
 - (2) He called at my house, but (he) left soon after.

- (b) When there are two Nominatives to the same Finite verb, the Finite verb is not usually mentioned more than once, but it must usually be repeated in the analysis:—
 - (1) He as well as you is guilty (=He is guilty as well as you are guilty).

(2) Either this man sinned or his parents (sinned).

(3) He is poor, but (he is) honest.

(4) He is diligent, and therefore (he is) prosperous.

(c) In such sentences as the following, however, it is obvious that the Finite verb cannot be mentioned more than once:—

Youth and experience are seldom seen together.

Time and tide wait for no man.

(d) In such sentences as the following, two Nominatives are combined to express a simple idea, and hence the verb must not be repeated:—

Truth-and-honesty is the best policy. Bread-and-butter is one of the best of diets.

129. Omission of the Conjunction "and."—The "and" can be left out, when the aim of the writer is to give a string of sentences, all bearing upon one central fact. Only the last sentence or the last verb should have "and" prefixed to it in such a case.

The uses and power of steam have been thus described, one single word standing as subject to no less than twenty-six Finite verbs:—

What will not the steam-engine do? It propels, elevates, lowers, pumps, drains, pulls, drives, blasts, digs, cuts, saws, planes, bores, blows, forges, hammers, files, polishes, rivets, cards, spins, winds, weaves, coins, prints, and does more things than I can think of or enumerate.

Examples of multiple sentences analysed

- (1) His greatest enemy as well as his best friends declared him to be innocent of the fault laid to his charge.
- (2) Either you or your son will sign his name at once on that paper.

(3) He, not I, is certainly the author of that plan.

II. PREDICATE.	Extension	Finite Verb.	repeatedly.	repeatedly.	(a) at once (b) on that	paper. (a) at once (b) on that paper.	certainly.	not.
	Completion of Finite Verb.	Complement.	to be innocent of the fault laid to his charge	to be innocent of the fault, etc.	nil	Til.	the author of that plan	the author of that plan
II.	Completion	Object.	him	him	your name	his name	nil	nil
	Finite Verb.		declared	declared	will sign	willsign	1.8	(am)
ECT.	Nominative Enlargement or Of Equivalent, Nominative.		his greatest	his best	nil	nil	nil	nil
I. SUBJECT.			enemy	friends	noń	your son	Не	I
	Connective.		: .	as well as	cither	or	:	nil
	The Clauses.		His greatest enemy repeatedly declared him to be innocent of the	fault, etc. His best friends declared him to be innocent of the fault, etc.	You will sign your name at once on	that paper. Your son will sign his name at once on that paper.	He is certainly the author of that	plan. I am not the author of that plan.

Exercise 28.—Double and Multiple sentences to be analysed

First write out each simple sentence in full (supplying all the omitted words), and then analyse according to the model:—

1. The Lord knoweth the way of the righteous, but the way of the ungodly shall perish.

2. Little Bo-peep has lost her sheep, and can't tell where to

find them.

3. She found them indeed, but it made her heart bleed; for they had left their tails behind them.

4. The hornet is our declared enemy, and a very troublesome one it is; however, it is well to make its acquaintance; for by doing so we shall be forced to admire it, and even to admire the instrument used by it for wounding us.

5. The life of some insects is brief, but very active; the female

lives for two or three weeks, lays her eggs, and dies.

6. In wet weather the water rises and floats the eggs of the mosquito, producing an abundant harvest; whereas in dry seasons many eggs fail to reach the water, and so dry up and perish.

7. The barbers of Singapore have to shave heads and clean ears; for which latter operation they have a great array of

tweezers, picks, and brushes.

- 8. Others carry a portable cooking-apparatus and serve up a meal of fish, rice, and vegetables for two or three halfpence; while porters and boatmen waiting to be hired are seen on every side.
- 9. In this way the spider lived in a precarious state for more than a week, and nature seemed to have fitted it for such a life; otherwise it could not have subsisted upon a single fly for so long a time.

10. Howard was then led to inquire into the condition of more distant jails; for which purpose he visited every large jail in

England, and many of those in Scotland and Ireland.

11. At Venice he went with the greatest cheerfulness into the sick-house, where he remained as usual for forty days, and thus exposed his life for the sake of his fellow-creatures.

12. The diver, on descending into the water, seizes the rope with the toes of his right foot, and takes hold of the bag with those of his left; nor does he expect to remain under water for less than two minutes.

13. The astrologers promise success to the divers; for they expect a liberal gift of pearls as a reward for the happy sense of confidence imparted by them to those men.

14. Sir Ralph the Rover tore his hair,
And beat his breast in his despair;
The waves rush in on every side,
And the ship sinks down beneath the

And the ship sinks down beneath the tide.

15. We had a boat at our stern just before the storm, but she

was staved by dashing against the ship's rudder.

16. The ranger in his couch lay warm
And heard him plead in vain;
But oft amid December's storm
He'll hear that voice again.

CHAPTER XXVII.—ANALYSIS OF COMPLEX AND MIXED SENTENCES

- 130. Complex Sentences. In complex sentences it often happens that one Subordinate clause is dependent on another Subordinate clause. To show how this works it will be best to give an example:—
- (1) The unfortunate man had not long lain in the cavern (a) before he heard a dreadful noise, (b) which seemed to be the roar of some wild beast, and frightened him very much.
- (2) A merchant, who had much property to sell, caused all his goods to be conveyed on camels, as there was no railway in that country.

In sentence (1) the clause "before he heard a dreadful noise" is an adverb-clause qualifying the Finite verb "had lain," which occurs in the Main clause: it is therefore Subordinate to the Main clause in the first degree, as indicated by a single line drawn under it. In the same sentence the clauses "which seemed to be the roar of some wild beast, and frightened him very much," are adjective-clauses qualifying the noun "noise," which occurs in a Subordinate clause: they are therefore Subordinate to the

148 ANALYSIS AND SYNTHESIS OF SENTENCES PART IV

Main clause in the second degree, as indicated by the two lines drawn under them.

Now take sentence (2). The clause "who had much property to sell" is an adjective-clause qualifying the noun "merchant," which occurs in the Main clause. It is therefore Subordinate to the Main clause in the first degree, as indicated by the single line drawn under it. In the same sentence the clause "as there was no railway in that country," is an adverb-clause qualifying the Finite verb "caused," which occurs in the Main clause. It is therefore Subordinate to the Main clause in the first degree, as indicated by the single line drawn under it.

The two sentences may be analysed in the following form:—

II, PREDIOATE.	Extension of Finite Verb.		(1) not long (2) in the cavem (3) before he heard, etc.	:		very much	as there was no railway, etc.	;	in that country.
	Completion of Finite Verb.	Complement.	•	•	to be the roar of some wild beast	:	to be conveyed on camels,		
		Object. (2) Indirect. Complement.		a dreadful noise, which, etc.		him	all his goods	much property to sell	*
	Finite Verb.		had lain	heard	seemed	fright- ened	caused	had	was
I. Subject.	Enlargement of Nominative.		(2) unfortunate	:	•	:-	(2) who had much property, etc.	:	ou
I. SI	Nomina- tive or Equiva- valent.		man	he	which	(which)	merchant	who	railway
	Con-		:	before	which	and	:	who	88
Kind of Clause.		Main clause.	Advclause qualifying "had lain."	AdjClause qualifying noise " in (a).	Co-ordinate with clause (b).	Main clause.	Adjclause qualifying "merchant."	Advclause qualifying caused.	
Clause,		(1) The unfortunate man had not lain long in the cavern	(a) before he heard a dreadful noise	(b) which seemed to be the roar of some wild beast	and frightened him very much.	(2) A merchant caused all his goods to be conveyed on camels,	who had much property to sell	as there was no rallway in that country.	

131. Multiple Sentence defined.—We often meet with a sentence which is neither entirely Multiple nor entirely Complex, but a mixture of both. The following is an example:—

What is obvious is not always known, and what is known is not always present to those who need it.

The sentence as a whole is Double, the two main parts being combined co-ordinately by "and." But each part taken separately is a complex sentence, the first having one subordinate clause, and the second two.

A Multiple sentence, then, is one that is made up of two or more Co-ordinate sentences, any of which taken by itself may be either Simple or Complex. (This definition supersedes that given in § 111.)

Exercise 29

Miscellaneous sentences to be analysed

- 1. Blessed is the man that walketh not in the counsel of the wicked, nor standeth in the way of sinners, nor sitteth in the seat of the scornful.—Psalm i. 1.
- 2. Nothing can describe the confusion of thought which I felt when I sank into the water.—Robinson Crusoe.
- 3. At four o'clock p.m. we reached York, which is a fine old town dating back to the time of the Romans, though they called it by a different name that I cannot now remember.
- 4. If you put the end of an iron rod in the fire and hold it there, you not only heat the end, but the whole of the rod up to the end that you hold in your hand.—TYNDALL.
- 5. The elections proved that since the spring the distrust and hatred with which this Government was regarded had made fearful progress.—Macaulay.
- 6. These men, than whom I have never known men more unwilling, have suddenly left me, merely because I asked them to work a little overtime on account of certain orders that I unexpectedly received this morning from the Admiralty.

- 7. Sir Isaac Newton, after deep meditation, discovered that there is a law in nature called attraction, by virtue of which every particle of matter in the world draws towards itself every other particle of matter with a force that is proportionate to its mass and distance.—Evenings at Home.
- 8. Everywhere there is a class of men who cling with fondness to whatever is ancient.
 - 9. When she I loved was strong and gay
 And like a rose in June,
 I to her cottage bent my way
 Beneath the evening moon.

WORDSWORTH.

- 10. After his schooling was finished, his father desiring him to be a merchant like himself, gave him a ship freighted with various sorts of merchandise, so that he might go and trade about the world, and become a help to his parents who were now advanced in age.
 - I heard a thousand blended notes,
 While in a grove I sat reclined
 In that sweet mood when pleasant thoughts
 Bring sad thoughts to the mind.

WORDSWORTH.

- 12. Content is a pearl of great price, and whoever procures it at the expense of ten thousand desires, makes a good purchase.
- 13. The rocks that first meet the eye of the traveller, as he enters the Suez Canal, are a part of the breakwater that extends out into the sea for two miles on either side of the canal.
- 14. This poor widow hath cast in more than they all: for they cast in of their abundance; but she of her want hath cast in all that she had, even all her living.—New Test.
- 15. Air, when it is heated, expands, or in other words the particles of which it is composed are driven farther and farther apart from one another; and so the air being less dense, less compact, or less solid, becomes proportionately lighter.
 - 16. Our deeds shall travel with us from afar, And what we have been makes us what we are.

G. ELIOT.

17. Foul deeds will rise,
Though all the earth o'erwhelm them, to men's eyes.
Shakespeare.

18. An anonymous letter signifies that the writer lacks moral courage to affix his name, and either cannot or dare not face the contents.

19. Just so we have heard a baby, mounted on the shoulders of its father, cry out, "How much taller I am than papa!"

20. I like a rascal to be punished, when I am quite sure that his guilt has been proved before a jury who had no prejudice

against him, before they began hearing his case.

21. The electricity of the air stimulates the vegetation of the trees, and scarcely a week passes before the plants are covered with the larvæ of butterflies, the forest is murmuring with the hum of insects, and the air is harmonious with the voices of birds.—Tennent's Ceylon.

22. As a goddess she had whims and fancies of her own; and one of these was that no woman was permitted to touch the verge of her mountain or pluck the berries of a certain bush that

grew upon the sides. - Volcano of the Hawaians.

23. I shun a friend who pronounces my actions to be good when they are bad; but I like a simple and sincere friend, who holds my faults as he would a looking-glass before my face, and compels me to see them.

24. He that bullies those who are not in a position to resist him may be a snob, but cannot be a gentleman.—SMILES.

25. When the eggs have been transformed into the state of larva or caterpillar, they change their skin three times in the course of two or three weeks, each change being preceded by a period of repose and succeeded by one of activity and voracity.

26. Every one who is not blind has seen a butterfly,—that light and happy insect, which flies from flower to flower in fields and gardens, adding brightness and beauty wherever it goes.

27. A time there was, ere England's griefs began,
When every rood of ground maintained its man.

GOLDSMITH.

CHAPTER XXVIII.—CONVERSION OF SENTENCES

132. From Simple to Multiple.—Simple sentences can be converted into Double or Multiple sentences, by expanding words or phrases into Co-ordinate clauses.

The student must take note that in this and all other processes of conversion the change must be merely one of form or structure, and that there must be no change of meaning.

(Simple. Besides making a promise, he kept it.

Double. He not only made a promise, but also kept it.

Simple. He must confess his fault to escape being fined. Double. He must confess his fault, or he will be fined.

[Simple. Notwithstanding his sorrow, he is hopeful.

Double. He is sorrowful, but yet hopeful.

Simple. Owing to bad health, he could not work.

Double. He was in bad health, and therefore he could not work.

Exercise 30

Convert from Simple to Double or Multiple :-

1. Seeing a bear coming, he fled.

- 2. Besides myself, every one else declares him to be guilty.
- 3. Before retiring, he must first serve twenty-five years.
- 4. After making a great effort, he at last gained his end.5. In addition to advising them, he helped them liberally.
- 6. The agreement having been signed, all were satisfied.
- 7. Drawing his sword, he rushed at the enemy.
- 8. The judge believes with me in his innocence.
- 9. The sun having risen, the fog dispersed.
- 10. He will be dismissed in the event of his doing such a thing again.
 - 11. You must take rest, on pain of losing your health.

12. He fled away, to escape being killed.

13. He escaped punishment by confessing his fault.

14. Approach a step nearer at peril of your life.

15. You must walk two hours a day to preserve your health.

16. For all his riches he is not contented.

- 17. Notwithstanding all his efforts, he failed to gain his end.
- 18. In spite of the opposition of all men, he never swerved.
- 19. In spite of our search, we could not find the book.
- 20. He had every qualification for success, except quickness of understanding and decision of character.
 - 21. He hated every one but himself.
 - 22. He persevered, in spite of all men being against him.

23. He stuck to his point against every one.

24. Notwithstanding his recent failure, he is still hopeful.

25. He was honoured in virtue of his wealth.

- 26. He worked night and day, being desirous to excel.
- 27. He was taken ill through grief at the loss of his son.
- 28. By means of his great wealth, he was able to build himself a fine house.
 - 29. He spoke the truth from fear of the disgrace of falsehood.
- 30. The letter, having been addressed to the wrong house, never reached me.
- 31. To our great disappointment, we failed to carry out our purpose.
 - 32. To add to his difficulties, he lost his health.
 - 33. The fog being very dense, we were forced to halt.
- 34. St. Paul continued preaching at Rome, no man forbidding him.
- 133. From Multiple to Simple.—Multiple sentences can be converted to Simple sentences by the methods shown below:—
 - (a) By substituting a Participle for a Finite verb:—

 Double. The sun rose, and the fog dispersed.

Simple. The sun having risen, the fog dispersed.

- (b) By substituting a Preposition, etc., for a clause :—
 Double. He not only made a promise, but kept it.
 Simple. Besides making a promise, he kept it.
- (c) By substituting a Gerundial or Qualifying Infinitive for a clause :—

Double. He must confess his fault or he will be fined.

Simple. He must confess his fault to escape being fined.

Exercise 31

Convert from Multiple to Simple:—

- 1. An ass accidentally found a lion's skin, and put it on to frighten the other beasts.
- 2. He was fatigued with walking, and so he sat down to take a little rest.
 - 3. Turn to the left and you will find the house of your friend.

- 4. Not only the tank, but even a part of the river was frozen over with ice.
- 5. The judge, as well as the jury, believed the prisoner to be guilty.
- 6. You must work hard the whole term, and then you will get promotion.
- 7. He was the son of poor parents, and therefore he had to encounter many trials and difficulties at the outset of his career.
- 8. He was a poor man, and yet he was of an independent spirit at all times.
- 9. I advised him to make the best use of his time, but he paid no heed.
 - 10. He was much frightened, but not much hurt.
- 11. Every effort was made to check the spread of cholera; yet a large number of persons died.
- 12. He was well fitted for that post by character and attainments: only he was rather too young and inexperienced.
- 13. He did his best to be punctual, but still he was occasionally behind time.
 - 14. He is well versed in books, but wanting in common sense.
 - 15. You must work hard, or you will not get promotion.
- 16. Give us some clear proofs of your assertion, otherwise no one will believe you.
- 17. A certain fowler fixed his net on the ground, and scattered a great many grains of rice about it.
- 18. The pigeons flew down to pick up the rice grains; for they were all hungry.
- 19. The old man frequently begged his sons to live together in peace, but he was disregarded.
- 134. From Simple to Complex.—Simple sentences can be converted to complex ones, by expanding words or phrases into subordinate clauses.

(a) Noun-clause

Simple, I am certain of giving you satisfaction.

Complex. I am certain that I shall give you satisfaction.

(b) Adjective-clause

Simple. He paid off his father's debts.

Complex. He paid off the debts which his father had contracted.

(c) Adverb-Clause

Simple. On reaching the age of manhood you will have to work for your living.

Complex. { As soon as you have reached the age of manhood, you will have to work for your living.

Exercise 32

Convert from Simple Sentence to Complex :-

- 1. I was glad to hear of your having succeeded so well.
- 2. He is generally believed to have died of poison.
- 3. No one can tell the time of his coming.
- 4. He shouted to his neighbours to come to his help.
- 5. We can place no confidence in any of his words.
- 6. The usefulness of even the simplest weapons to men in the savage state will easily be understood.
 - 7. We must hope for better times.
 - 8. Tell me the time and place of your birth.
 - 9. The verdict of the judge was in favour of the accused.
 - 10. Our present house suits us exactly.
- 11. This rule, the source of all our troubles, is disliked by every one.
 - 12. The diamond-field is not far from here.
- 13. He and his friends entered into a partnership binding themselves to incur equal risks.
 - 14. Their explanation cannot be true.
- 15. The king took refuge in the fortress, being determined to make a last attempt in that place to save his kingdom.
 - 16. He was a man of irreproachable conduct.
 - 17. The snow-line in India is about 20,000 feet high.
 - 18. The troubles besetting him on all sides did not daunt him.
 - 19. In the absence of any other helper, we must accept his aid.
- 20. The two chief points having been gained, success is now certain.
 - 21. The problem was too difficult to be solved.
 - 22. He worked very well, to the astonishment of every one.
 - 23. Every precaution was taken against the failure of the plan.
 - 24. They proceeded very cautiously for fear of being caught. 25. He started by night to escape being seen by any one.
- 26. He would be very thankful to be relieved of all this trouble.

- 27. With or without his leave, I shall leave the room.
- 28. Notwithstanding the heat of the sun we must go out.
- 29. In spite of all his riches, he is never contented.
- 135. From Complex to Simple. Complex sentences can be converted to Simple sentences by the following methods.

I. Noun-clause

(a) By substituting a noun for the Noun-clause introduced by the Conjunction "that":—

Complex. It is to be regretted that he died so young. Simple. His death so early in life is to be regretted.

(b) By substituting a noun for the Noun-clause introduced by a Relative adverb:—

 $\begin{array}{ll} \textit{Complex.} & \textit{Tell me when and where you were born.} \\ \textit{Simple.} & \textit{Tell me the time and place of your birth.} \end{array}$

(c) By substituting a noun for the Noun-clause introduced by a Relative pronoun:—

Complex. We need not disbelieve what he said. Simple. We need not disbelieve his word.

Exercise 33

- 1. What he spoke on that occasion was unworthy a man of his age and experience.
- 2. That the rose is the sweetest and most beautiful of flowers is admitted by almost every one.
- 3. They are now ready to confess that the charge against my friend was groundless.
- 4. Even his friends admitted that what his enemies complained of was just and reasonable.
- 5. What we have learnt already is a step towards learning what we do not at present know.
- 6. They admit that Milton was a great poet, but deny that he was a good man.
- 7. What seemed most strange in the battle of Plassey was that the Nawab's immense army should have been defeated by so small a force, and that the victory on the English side should have been so decisive.

8. I should like to be informed what character in English history you most admire.

9. I will now be bold enough to confess what my heart desires

and how I shall obtain it.

10. From what you have read in this book, you have become acquainted with the state in which the Saxons were living, when the Normans arrived under William the Conqueror.

11. You will easily understand from what you have been told

how much this book has displeased me by its bad teaching.

II. Adjective-clause

(a) By using some adjective or participle:—
Complex. Such pupils as work hard are likely to win a prize.

Simple. Hard-working pupils are likely to win a prize.

(b) By using a noun in the Genitive or a Poss. Adj.:—
Complex. They soon forgot the labours they had endured.
Simple. They soon forgot their past labours.

(c) By using a noun in apposition:—

Complex. This rule, from which all our troubles have come, is much disliked.

Simple. This rule, the source of all our troubles, is much disliked.

(d) By using a Preposition with its object:—

Complex. The benefits that he derived from his early training were soon lost.

Simple. The benefits of his early training were soon lost.

(e) By using a Gerundial Infinitive:—

Complex. I have no money that I can spare.

Simple. I have no money to spare.

(f) By using a Compound noun:—

Complex. That is the place where my father was buried.

Simple. That was my father's burial-place.

Exercise 34

1. The explanation he gave was not to the point.

2. The year in which the school was opened was 1884.

3. Let us take a walk into the grove that adjoins my father's house.

- 4. The army that Hannibal led against Rome was the most formidable that the Romans had up to that time encountered.
- 5. He was not fully aware of the extent of the dangers by which he was surrounded.
- 6. Mary Queen of Scots was the most unfortunate of all the sovereigns of that part of the century in which she lived.
- 7. The whole plan was upset by the course which affairs took after the 24th of May.
- 8. We decided on building a cottage in the vale that is watered by a streamlet which flows from a perennial fountain.
- 9. The people of Israel mourned in the land to which they had been taken captive.
- 10. The temple of Solomon was built on the site which David had taken from the Jebusites who were its former masters.
- 11. There was no rope whereby the boat might be tied to the civer's bank.
- 12. The intelligence that the lower animals display in the search for food and in the preservation of their young is something very different from what is called a blind instinct.
- 13. You are not the kind of man who would tell an untruth for the sake of an advantage that would be merely temporary.
- 14. This is a rule that must not be violated by any one, and admits of no variation.

III. Adverb-clause

- (a) By using a preposition with gerund:—
 Complex. The boy was pleased that he had won a prize.
 Simple. The boy was pleased at having won a prize.
- (b) By using a participle:—
 Complex. As the main point has been gained, success is certain.
 Simple. The main point having been gained, success is certain.
- (c) By using a Gerundial (or Qualifying) Infinitive:—
 Complex. They were surprised, when they heard him confess.
 Simple. They were surprised to hear him confess.

Exercise 25

1. He drew the plan of the building more skilfully than any one else could have done it.

2. They were much alarmed, when they saw that their position was hopeless.

3. The king or queen cannot impose taxes, unless Parlia-

ment consents or approves.

- 4. If a man puts on the appearance of honesty, he can sometimes pass for honest.
- 5. Though he is a man of years and experience, he is still apt to be imprudent and thoughtless when some sudden emergency occurs.
- 6. The speaker declared he had changed his mind on that subject, so that the audience were much surprised and distressed.
 - -7. As the sun has set, we had better start for home.
 - 8. These men suspect that I am a swindler.
- 9. When the fire was put out and the inmates of the house rescued, the firemen removed the pumps, so that they might take a little rest.
- 10. As the judge has already decided the case, further defence is useless.
- 11. His mother will be much consoled, when she sees that her son has escaped from so many dangers.
- 12. I should be indeed sorry, if I were the cause of your ruin or stood in the way of your advancement.
- 13. He spoke so rapidly that we could not clearly understand him.
- 14. There is no branch of knowledge so difficult that it cannot be conquered by perseverance.
- 15. The rope in your hand is so long, that it will touch the bottom of the well, if a stone is tied to the end of it.
- 16. He was not so courageous, that he was willing to ride that spirited horse.
- 17. The moment I saw how industriously and patiently he worked, I decided that I would secretly give him some pecuniary help that very day.
- 18. He made such an excellent speech in defence of his friend, that every one admired and respected him.
- 136. From Double to Complex.—In a Double sentence the second of two co-ordinate clauses is the one that completes the sense, and is therefore the more important of the two.

Hence it follows that in transforming a Double

sentence to a Complex one, the second must be made the Main or Containing clause, and the first the Subordinate or Contained clause.

f Double. Speak the truth, and you need have no fear.

Complex. If you speak the truth, you need have no fear. Double. Leave this room, or I will compel you to do so.

Complex. Unless you leave this room, I will compel you to

do so.

Double. He was a poor man, but he was always honest.

Complex. Although he was poor, he was always honest.

Double. He was very tired, and therefore he fell sound

asleep.

Complex. He fell sound asleep, because he was very tired.

Exercise 36

Convert from Double to Complex :-

- 1. Hand over the prisoner to me, and I will examine him.
- 2. Take care of the pence, and the pounds will take care of themselves.
 - 3. Only hold your tongue, and you can hold anything else.
 - 4. He stands up to speak, and every one is at once silent.
 - 5. Is any man sick? let the elders pray for him.—New Test.
- 6. I go to this place and that, and the same thought pursues me everywhere.
 - 7. He confessed his fault, or he would have been punished.
 - 8. Sign your name, or I shall not agree to this.
 - 9. You must be careful of your money, or you will soon lose it.
 - 10. Conquer thy desires, or they will conquer thee.
 - 11. He is sixty years old, and yet he still has good sight.
 - 12. Murder has no tongue, but it will some day speak.
 - 13. All men were against him; nevertheless he persevered.
 - 14. He might be ever so rich; yet he was greedy for more.
 - 15. Go wherever you like, only you must not stay here.
 - 16. In the discharge of duty he was a strict, but just man.
- 17. I thoroughly dislike that man, and therefore I cannot admire him.
 - 18. It is now late; so we had better go to bed.
- 19. My son's health was bad last year, and hence he was not promoted at the end of the term.

- 20. Food is raised by agriculture, which is therefore the foundation of all wealth.
- 21. My son has never done such a thing before: he should therefore be pardoned.
- 137. From Complex to Double.—In a Complex sentence the Main or Containing clause is, as its name implies, of more importance than the Subordinate or Contained clause.

Hence it follows that in transforming a Complex sentence to Double, the Main clause must be placed last, and the Subordinate (which now becomes a Co-ordinate) clause must be placed first.

Complex. I am certain that he will not recover.

Double. He will not recover, and of this I am certain.

(Complex. I have found the sheep that I had lost.

Double. I had lost a sheep, but I have found it again.

(Complex. He is more a fool than a knave.

Double. He is something of a knave, but still more a feel.

Exercise 37

Convert from Complex to Double and Multiple :-

- 1. You may keep this book, since you have earned it as a prize.
- 2. He will pay off all his debts in time, if only his creditors will have patience.
 - 3. The enemy fled as soon as our guns came in sight.
- 4. Every man howled with pain, as he took his turn of the lash.
- 5. When you have worked out this sum, you may go out to play.
- 6. Could I but see that wonderful object, I would believe in its existence.
 - 7. As soon as the trumpet sounded, the battle commenced.
- 8. He left for home yesterday as soon as he received that letter.
- 9. We selected this boy as the best in the class, after we had examined all of them.
 - 10. He could do this, if he tried.
- 11. If our king should be slain on the battlefield, we still have his son to lead us against our enemies.

CHAPTER XXIX CERTIFICATE OF CHATSECAS

THE COURT COURSE CONTINUES OF COMMENSAGE OF CONTINUES CO

Synthesis is useful as an aid to composition, Analysis as an

aid to parsing.

The three short sentences given below may be combined in such a way as to produce one longer sentence, and the sentence thus produced may be either Complex, Multiple, or Simple, and this without any difference of meaning:—

The followers of the Viceroy had often praised him to his face. They hated him for his cruelties and vices.

They deserted him in the hour of need.

- (a) Out of these three sentences a Complex sentence might be formed as follows:—
 - The followers of the Viceroy hated him so much for his cruelties and vices, that, though they had often praised him to his face, they deserted him in the hour of need.
- (b) A Double sentence can be easily formed out of the same materials:—
 - The followers of the Viceroy had often praised him to his face, but out of hatred for his cruelties and vices they deserted him in the hour of need.
 - (c) A Simple sentence can be formed quite as easily:—
 - The Viceroy, hated for his cruelty and vices, but often praised to his face, was deserted by his followers in the hour of need.

If the number of little sentences is too large to make only one sentence, the student will have to bind them together into a paragraph which shall consist of several sentences fewer, but longer, than the original ones; and the sentences so formed may be Complex, Multiple, or Simple according to the convenience of the writer or the demands of the examiner.

In combining a string of short sentences into a single sentence, the writer must take care that the sentence so produced involves no violation of Unity. It must in other words express one main idea, and not more than one.

Exercise 38

Combination of short sentences into one or more longer sentences

1. Combine the following sentences into a single sentence without using and or but:—

A lion was proud of his strength.

He despised the weakness of the mouse.

He was caught in a net.

He could not escape from the net.

He was set free by the exertions of the mouse.

Camb. Junior, July 1909.

2. Combine the following sentences into one complex sentence:—

Once an oarsman was rowing by himself.

He did not look behind him.

He met another boat.

He crashed into it.

He was upset.—Camb. Junior, December 1911.

3. Express in a single complex sentence the sense of the following sentences:—

A fox saw a crow sitting on a tree with a piece of cheese in his mouth.

The fox praised the crow's singing.

The crow was pleased by the flattery.

The crow began to sing.

The crow dropped the cheese.

Camb. Junior, December 1908.

4. Express in one or more complex sentences the sense of the following sentences:—

A dog was running away with a piece of meat.

He passed some deep still water.

He saw there the reflected image of the meat.

He dropped the meat into the deep water.

He snatched in vain at the shadow.

Camb. Junior, July 1908.

5. Express in a single sentence the sense of the following sentences:—

The train ran down the incline.

The train attained great speed.

The train turned a sharp curve at the bottom.

The train oscillated under the influence of the brakes.

The train threw all the passengers into a panic.

Camb. Junior, December 1907.

6. Express in a single complex sentence the sense of the following sentences:—

A famished traveller was toiling over the desert.

He found a bag.

He was highly delighted.

He opened the bag.

He found nothing but pearls.

Camb. Junior, July 1907.

7. Express in a single complex sentence the sense of the following sentences. (If you cannot include all the sentences, include as many as you can.)

A half-starved mouse managed to creep into a basket of corn.

The mouse rejoiced in his good fortune.

The mouse fed greedily on the corn.

The mouse tried to get out of the basket.

The mouse found that his body was now too big to pass through the hole.

Camb. Junior, December 1906.

8. Combine the following statements into one complex sentence:—

Sensibility of principle is gone.

It felt a stain like a wound.

It inspired courage.

It mitigated ferocity.

· It ennobled whatever it touched.

Vice lost half its evil under it.

Central Welsh Board, 1914.

9. Combine the following statements into one complex sentence:—

The Italians enjoyed the present blessings of ease and tranquillity.

They were rich.

They were polite.

They were lovers of pleasure.

They did not suffer their pleasing dreams to be interrupted by the memory of their old freedom.

Central Welsh Board, 1913.

- 10. Combine the following sentences into one complex sentence:—
 - I have seen a bird rising from his bed of grass and soaring upward, singing as he rises. The poor bird was driven back with the loud sighings of an eastern wind. His movements were made irregular and inconstant. He descended more at every breath of the tempest than he could recover by the motion of his wings.—Central Welsh Board, 1912.

Exercise 39

Combine into any kind of sentence, Simple, Complex, or Multiple, that you find most convenient. It does not matter which kind of sentence you select, so long as the sentence produced by the combination is smooth and idiomatic.

- 1. The supply of pasture often runs short. The nomads of Tartary then shift their abode. They search for new pastures elsewhere.
- 2. Richard I., the king of England, was seized with remorse. He had rebelled against his father. The father at that time was an old man. He was much attached to all his sons.
- 3. I am very sorry to see him so changed. He has lost all hope. He has given up work. He worked hard last year. He has excellent abilities.
- 4. He is attacked unjustly. He is blamed for serious faults. He has not been guilty of such faults. He feels for this reason very much hurt.
- 5. The crown-prince cannot increase his forces. He must first raise the money. He cannot pay his men without this. He cannot without this induce them to fight cheerfully for his cause.

6. You may still perhaps succeed in your object. You must persevere steadily. Success is impossible without this.

7. They adopted very decisive measures. They wished to

put an end to all further difficulties.

- 8. He was armed with a coat of mail. Hence the blows of his assailants had no effect. The blows fell thickly upon him.
- 9. The authors of this outbreak are disappearing. They are melting away. A mist in the same way melts before the sun. Clouds in the same way are dispersed by wind. Leaves in the same way are scattered by a breeze.
- 10. The people were not ill-prepared for war. Every man had been trained to arms once in his life. That was the law of the country. That law was always faithfully observed.
- 11. The lion was let out of its cage for the amusement of the spectators. It did not run at Androcles to devour him. It came up quietly. It fawned upon him. A dog fawns in the same way upon its master. It licked his hand. He had been kind to it in the forest. It remembered this.
- 12. I walked with him to the sea-shore. The wind at that time was sighing mournfully around us. It seemed to sympathise in our sorrow at his leaving us so soon.
- 13. They had now finished their meal. They at once resumed their journey. They walked another ten miles. They then stopped and rested.
- 14. The heretics could not be convinced of their error. Hence attempts were made to compel them to recant. The means used were fire and sword. All such attempts failed. The heretics remained obdurate as before.
- 15. There is no longer any fear of invasion. The army may be reduced. The ships may return into port. The sailors may go back to their homes. They may take a holiday.
- 16. The wind was strong. It drove the ship ashore. The ship struck into the sand. It remained fixed there for several days.
- 17. The town of Upsala is looked upon as an historic centre. Of this there is no doubt. Here the sanctuaries of paganism once flourished. Many monuments of them still survive within and around the modern town.
- 18. For an hour he continued telling them stories of absorbing interest. They all had the element of mystery. All of them dealt with crimes. The crimes thus dealt with were atrocious. They were equally inexplicable.

19. The next two months were most pleasantly spent in this lovely island. During that time we made many friends amongst the planters. We also enjoyed their hospitality. They are noted for being hospitable.

20. Henceforth Axel's progress in his studies was surprising. In comparison with other boys he could devote little time to them. Considering this fact his progress was indeed surprising.

- 21. Mr. Merriman left the cottage. He crossed the river. He returned almost immediately. He was accompanied by five Dyaks. He had met them in the Chinese quarter. They had arrived there with a boatload of commodities collected from the jungle.
- 22. In former times there was a peculiar class of persons. They were called knights-errant. They were clad in coats of mail. They rode about singly. One object was to fight with each other at tournaments. The other object was to redress the wrongs of strangers. Such strangers sought their assistance.

CHAPTER XXX.—SEQUENCE OF TENSES: DIRECT AND INDIRECT SPEECH

138. Sequence of Tenses.—There are two main rules:—Rule I. A Past tense in the Main clause must be followed by a Past tense in the Subordinate clause:—

He would come, if you wished it. He succeeded, because he worked hard. He worked hard, that he might succeed.

Exceptions to Rule I.—(1) If the Subordinate clause expresses some universal or habitual fact, its verb remains in the Present tense:—

Main. Subordinate.

They did not know, that the earth moves round the sun.

I was glad to hear, that he is a man to be relied on.

(2) If the Subordinate clause is introduced by "than" or by "as much as," its verb can be in any tense that suits the sense:—

Main.

He liked you more He liked you as much Subordinate.

than he likes or will like me. as he likes or will like me.

(3) If the Subordinate clause is an Adjective clause, its verb may be in any tense that suits the sense. In fact Rule I. has no connection whatever with Adjective clauses, but applies only to Noun clauses and to Adverb clauses.

Main.

Subordinate.

He did not see the event,

that he has described so well in the pamphlet which I was reading yesterday and which I shall read again to-morrow.

Rule II. A Present or Future tense in the Main clause can be followed by any tense whatever in the Subordinate clause:—

I know that he was angry.

I shall soon get the letter that he posted yesterday.

Exercise 40

(a) Correct or justify the following tenses (italicised):—

1. I was informed that he had been reading a book. 2. He did not say when he will come. 3. No one knew whether he intended to come or not. 4. He concealed from me what his plans are. 5. I fear that you were displeased with me yesterday. 6. I shall soon find out why you were so displeased. 7. His face was so changed that I do not know him again. 8. The teacher gave me a prize that I may work hard next year. 9. The teacher has given me a prize that I may work hard next year. 10. You will be pleased to hear that I have won a prize. 11. He asked me why I wish to go away so soon. 12. No one understood how he can do so much work. 13. He had come that he might help me to finish the task. 14. You did not tell me when you intend to return home. 15. I was sorry to find that I have displeased you. 16. I hope that you will pardon me soon. 17. I did not know why you give me this order. 18. We shall soon know what progress he has made. 19. We heard to-day what progress he has made. 20. You never told us that honesty was the best policy.

- (b) Supply the tense and voice of the verbs enclosed in brackets.
- 1. I hope that you (return) soon. 2. If you (foresee) the consequences of idleness, you (be) more industrious than you were last term. 3. He tried how many miles he (can) walk in an hour. 4. He (go) away for a change, as soon as the holidays begin. 5. He not (go) away till the work of the term was over. 6. The oxen (low) so loud, that the thieves (can) not prevent us from finding out the place where they had hidden them. 7. He is so disappointed with the result that he (decide) to give up all further trial. 8. I went to his house that I (see) him and tell him all that (happen). 9. It was very unlikely that he (reach) home before six o'clock p.m. 10. There was a rumour that he (perish) in the fire, which (break) out in the village yesterday. 11. I am sorry that you (keep) waiting so long last night. 12. I signed my name on the understanding that you (keep) your engagement with me; but I am sorry to see that you not (do) so. 13. Your son has turned out more industrious than I (expect) he (will). 14. To-morrow you (do) what I (do) to-day, and to-day you (do) what I (do) yesterday. 15. We never (see) such fine batting before, and perhaps we never (see) the like again. Though he (gain) one prize already, he is willing to begin working for another. 17. The tradesman's voice trembled so much that my suspicions (arouse). 18. I gave him no answer lest I (make) him more angry than ever. 19. The more money he made, the more he (want). 20. Though he is a poor man, he never (resort) to anything dishonest. 21. He came upon me as suddenly as if he (drop) from the sky. 22. I hope you (make) up your mind that such a thing never (happen) again. 23. It made no difference to him how we (carry) on our business; for he (be) not one of our partners, and we (will) not take him into partnership, if he (ask) us.
- 139. Direct and Indirect Speech.—A speech is said to be in *Direct* Narration, when the very words used by the speaker are repeated without any change; in *Indirect*, when the words are given with some change of construction.

In Indirect Narration the verbs are bound by the same rules as those given in § 138 for the Sequence of Tenses.

Thus by Rule I, when the reporting or principal verb is in the Past tense, the Present tense in the reported speech

must be changed into its corresponding Past form. Thus we change—

Shall	into	should	See	into	8aw	
Will	,,	would	Is seeing	99	was	seeing
May	:,	might	Has seen	99	had	seen
Can	,,	could	Has been see	ing "	had	been seeing

Observe also that when the Present tense is changed into the Past by Rule I, an adjective or adverb expressing nearness is similarly changed into one expressing distance. Thus we change:—

Now	into	then	To-day	into	that day
This or these	,,,	that or those	To-morrow	,,	next day
Hither	,,	thither	Yesterday	,,	the previous day
Here	,,	there	Last night		the previous night
Hence	99	thence	Ago		before
Thus		80			•

Direct.—"What is this strange outcry?" said Socrates; "I sent the women away mainly in order that they might not offend in this way; for I have heard that a man should die in peace. Be quiet then and have patience."

Indirect.—Socrates inquired of them what that strange outcry was. He reminded them that he had sent the women away mainly in order that they might not offend in that way; for he had heard that a man should die in peace. He begged them therefore to be quiet and have patience.

Exercise 41

- (a) Convert from Direct to Indirect:
- 1. He said, "I have been very ill, but am now better."
- 2. Pilate replied to the Jews, "What I have written, I have written."
 - 3. He said to me, "You are guilty, and I am innocent."
- 4. They said, "The boy is hiding in the place where we left him."
- 5. They said, "The boy will soon be found; and we will bring him."
- 6. "What do you mean?" asked the man; "how can a rope be used for binding flour?" "A rope may be used for anything," said the other, "when I do not wish to lend it."

- 7. A rich man once said to his poorer brother, "Why do you not enter the service of the king, so that you may be relieved of the baseness of labour?"
- 8. Finding no remedy, he said to himself, "It is better to die than to live in such misery as I am compelled to suffer from a master who treats me and always has treated me so unkindly."
- 9. And they said one to another, "We are verily guilty concerning our brother, in that we saw the anguish of his soul, when he besought us, and we would not hear: therefore is this distress come upon us."—Old Testament.
- 10. The violent man said, "What violence have I done? What anger have I been guilty of?" Then the others laughed and said to him, "Why should we speak? You have given us ocular proof of your violent temper."
- 11. The robber said to Alexander, "I am thy captive: I must hear what thou art pleased to say, and endure what thou art pleased to inflict. But my soul is unconquered; and if I reply at all to thy reproaches, I will reply to thee like a free man."
 - 12. "You are old, Father William," the young man cried, "The locks that are left you are grey;

You are hale, Father William, a hale old man;

Now tell me the reason, I pray."

- 13. "I am sorry indeed," replied the king, "that my vessel is already chosen; and I cannot therefore sail with the son of the man who served my father."—DICKENS.
- 14. He cried to them in agony, "Row back at any risk! I cannot bear to leave her behind to be drowned."—DICKENS.
- 15. He made a promise to the king's surgeon, saying:—" Bleed the king to death with this lancet, and I will give you a thousand pieces of gold; and when I ascend the throne, you shall be my chief minister."

(b) Convert from Indirect to Direct:—

- 1. My brother told me that he had been reading all day.
- 2. My father told me that I was wrong and would be fined.
- 3. I replied that if my fault was proved I would pay the fine.
- 4. I admitted that I had acted foolishly in what I had done.
- 5. Damon, before his execution, requested but one favour from Dionysius, which was that he might be permitted to visit his wife and children, who were at that time a considerable

distance from him, and he promised faithfully to return on the day appointed.

6. This Dionysius refused to grant, unless some person could be found who would consent to suffer death in his stead, if he did not perform his promise and return by the appointed time.

7. In a short speech Pythias told the surrounding multitude that his dear friend, Damon, would soon arrive; but he hoped not before his own death had saved a life so dear as Damon's was to his family, his friends, and his country.

8. He sent his compliments to Francis, Clavering, and Monson, and charged them to protect Raja Guru Das, who was about to

become the head of the Brahmins of Bengal.

9. The governor of the town then called out with a loud voice, and ordered Androcles to explain to them how a savage and hungry lion could thus in a moment have forgotten its innate disposition, and be converted all of a sudden into a harmless animal.

10. Androcles then explained to them that that very lion, which was standing before them, had been his friend and partner in the woods, and had for that reason spared his life, as they then saw.

11. Socrates then suggested to Glaucon that the entire abolition of the guards which he (Glaucon) recommended could not remedy the evils which he desired to remove, and he inquired of Glaucon whether he knew by personal examination that the guards did their work as badly as he imagined.

12. When he reached home, his father asked him where his ship was and what had become of his merchandise. The son in reply told him what had happened,—how he had given up his vessel with its cargo, and had taken in exchange the slaves and set them free, and how he had consented to take this girl back with him and make her his wife.

13. When they asked Thales what thing in the world was more universal than anything else, he replied that Hope was the most universal thing, because Hope remained with those who had nothing else left.

14. When Solon and Periander were sitting together over their cups, Periander, finding that Solon was more silent than usual, asked him whether he was silent for want of words or because he was a fool. Solon told him in reply that no fool could be silent over his cups.

PART V.—ANALYSIS AND DERIVATION OF WORDS: SOUNDS AND SPELLINGS

CHAPTER XXXI.—COMPOUND WORDS

- 140. Simple or Primary Words.—A word that is not combined with any other word or syllable is called a Simple or Primary word; such as buy, walk, come (verbs); bench, fire, name (nouns); hot, cold, stiff (adjectives); well, ill, much (adverbs); in, by, with (prepositions); he, she, it (pronouns); and, but, for (conjunctions).
- 141. Compounds, Derivatives. Most of our words, however, are not Simple, but are either Compounds or Derivatives.

When one word is added to another, the combination is called a Compound; as man-kind, oil-lamp, low-lands, mid-ship-man.

When a particle (i.e. a syllable which does not make a complete word, or is not now used as one) is added to a word, the combination is called a **Derivative**; as man-ly,

good-ness.

If one Simple word is formed from another by means of some internal change, as graze from grass, bleed from blood, this is called a **Primary** Derivative; but a Derivative formed by adding a particle to the beginning or the end of a word, or both, as "man-ly," "un-man-ly," "un-man-li-ness," is called **Secondary**.

142. Compounds.—Such words fall into six main classes:—

(1) NOUN Compounds

- (1) Adjective + Noun: blue-bell, mid-day, sweet-heart, nobleman.
- (2) Participle + Noun: finishing-stroke, loving-kindness, humming-bird.

Note.—Sometimes the final -ing of the present participle is not used, as in screech-owl (for screeching-owl), mock-bird (for mocking-bird), glow-worm (for glowing-worm).

(3) Noun + Noun: noon-tide, plough-man, sports-man, railroad, pen-wiper, way-farer, snake-charmer, snake-charming.

Note.—In sportsman the noun sports is Genitive=sport's. Cf. salesman, oarsman, tradesman, kinsman, statesman, beeswax, Wednes-day (for Wodenes-day, the day of Woden).

In some compounds of this class the apostrophe has been retained, as in the following: stone's throw, land's-end, king's-bench, cat's-paw, heart's-ease.

- (4) Gerund + Noun: cooking-stove, looking-glass, drinking-water.
 - (5) Pronoun + Noun: he-goat, she-goat, my-self, our-selves.
 - (6) Verb + Noun: tell-tale, dare-devil, pick-pocket, break-fast.
- (7) Verb + Adverb: break-down, stand-still, draw-back, gobetween.
 - (8) Adverb + Verb: out-come, off-spring, in-come, up-start.
- (9) Adverb + Noun: by-path, after-life, up-land, in-land, over-coat.

(2) Adjective Compounds

- (1) Noun + Adjective: sky-blue, blood-red, foot-sore, air-tight.
- (2) Noun + Participle: tongue-tied, crest-fallen, hen-pecked.
- $(3) \ \ Adjective + Noun: {\it blind-fold, bare-foot-ed, public-spirit-ed.}$

Note.—In such a word as "bare-footed" we have the compound "bare-foot" with the particle ed added to the end of it. Such words are very common.

- (4) Adjective + Adjective or Participle: red-hot, high-born, blue-green, ready-made, hard-boiled.
 - (5) Preposition + Noun: over-land, under-hand, over-hand.
- (6) Adverb + Adjective or Participle: so-called, far-fetched, half-blind, ill-bred.

(3) VERB Compounds

(1) Noun + Verb: back-bite, way-lay, hen-peck, brow-beat.

(2) Adjective + Verb: white-wash, rough-hew, safe-guard, rough-shoe (chiefly seen in the participial form "rough-shod").

(3) Adverb + Verb: back-slide, over-awe, up-set, with-hold.

(4) Verb + Adverb: doff (do off), don (do on), turn out, put on.

(4) Adverb Compounds

(1) Adjective + Noun: mean-time, other-wise, mid-way, yester-day.

(2) Adverb + Preposition: here-in, forth-with, there-for(e),

here-upon.

(3) Noun + Noun: length-ways, side-ways. (The final s is a sign of the Genitive case, see § 47.)

(5) Double Compounds

(1) The notion that realism is somehow immoral faintly suggests a French-novel-reading Bishop.—Times Weekly. (A bishop who is a reader of French novels.)

(2) A seventeen-year-old girl is alleged to have attacked a woman with a chopper, etc.—Daily Express. (A girl seventeen

years old.)

(6) Phrase Compounds

Forget-me-not (noun); hand-and-glove (adj. said of friends that fit each other as closely as hand and glove); man-of-war; would-be (adj. used for one who intended to be or do something, but was stopped); barrister-at-law; note-of-hand; ticket-of-leave; Jack-o'-lantern; hole-and-corner (adj. clandes-tine); son-in-law; four-in-hand.

Note.—Such phrase-compounds as the above are all well established; the student is not at liberty to coin fresh ones whenever he likes.

142a. Spelling of Compounds.—In words of two or more syllables the accent is usually thrown back on the first syllable, and in many cases this has the effect of altering the spelling:—

Bon-fire from bone-fire. Hus-band from house-band (lit. house-dweller). Hus-sif or hus-sy from house-wife. Nos-tril

from nose-thrill. Star-board from steer-board. Tad-pole from toad-poll. Fort-night from four-teen-night. Suf-folk from South-folk. Fur-long from furrow-long. Sus-sex from South-Sex (i.e. South Sax-on).

In some words, however, the change of sound produced in the first syllable by the accent is not accompanied by any change in the spelling:—

Black-guard. Cup-board. Break-fast. Two-pence, three-pence. Row-lock (sounded as *rullock*).

142b. The Forming of Compounds in Modern English.—It has been asserted that the forming of compounds in modern English is practically extinct. "The power of making new words by the combination of other words seems to have perished through the influence of the Norman French. At any rate our language possesses it no longer" (West).

This statement is altogether erroneous. Most of the compounds quoted above in this chapter were formed long after the introduction of Norman French. Our language has lost none of its old power of learning new compounds, whenever the need of a new compound exists. In Tennyson alone we have proxy-wedded, crimson-circled, slow-arching, heavy-shotted, hammock-shroud, hundred-throated, breakerbeaten, flesh-fallen, gloomy-gladed, lady-laden, mock-meek, rain-rotten, tongue-torn, work-wan, etc.

CHAPTER XXXII.—DERIVATIVES

143. Root, Stem, Prefixes, Suffixes. — A Primary word reduced to its simplest etymological form is called a Root.

A **Stem** is the change of form (if any) assumed by the root, before a suffix is added to it. Thus in the word "fals-i-ty" the root is fals (Lat. fals-us); the stem is fals; and the suffix is ty. The stem and the root, however, often coincide; as in man (root or stem) + ly (suffix).

Particles added to the end of a stem are called **Suffixes**. Those added to the beginning are called **Prefixes**. The name "Affix" stands for either, though it is more commonly used for Suffix.

As a general rule Prefixes alter the meanings of words, while Suffixes show to what Part of Speech they belong. Thus there is a very radical difference of meaning between "pre-scribe," to order, and "pro-scribe," to prohibit; but there is no change in the Part of Speech; both are verbs. A change of Suffix, however, usually produces a change in the Part of Speech. Thus "dark-ness" is a noun, "dark-ly" is an adverb, "dark-en" is a verb.

144. Sources of Prefixes and Suffixes. — The three sources from which our Prefixes and Suffixes have come are:—

I. Teutonic (Anglo-Saxon, with a few Norse and Dutch). These are sometimes, but unsuitably, called "English."

II. Romanic (Latin or French, with a few Spanish and

Italian).

III. Greek (borrowed either directly from Greek or through French).

145. Hybrids.—The name "hybrid" (which means "of mixed origin") is applied to any Compound or Derivative word whose parts have come from different sources, *i.e.* are neither purely Teutonic, nor purely Romanic, nor purely Greek. Hybrids are very common in our language.

Thus in en-dear the prefix is Romanic, the stem is Teutonic. In starv-ation the stem is Teutonic, the suffix is Romanic. In be-siege the stem is Romanic, the prefix is Teutonic. In false-hood the stem is Romanic, the suffix is Teutonic. In bi-cycle the stem is Greek, the prefix is Romanic. In art-ist the stem is Romanic, the suffix is Greek.

Section 1.—Suffixes: Teutonic, Romanic, Greek

146. I. Noun-forming.—We may classify the principal suffixes under the following headings:—

(a) Denoting agent, doer, or one appointed to act:

Teutonic :-

-er, -ar, -or (modern forms of A.S. -ere): bak-er, do-er, li-ar, tail-or, London-er, law-y-er, saw-y-er.

-ther, -der (A.S. -ther, -der): fa-ther, bro-ther, daugh-ter, spi(n)-der.

Romanic :-

-or, -eur (Latin -or, -ator, French -eur); aggress-or, doct-or, amat-eur, emper-or, cens-or, specul-ator.

-ary, -aire, -ar, -eer, -ier (Latin -arius, -aris): secret-ary, million-aire, schol-ar, volunt-eer, cash-ier, brigad-ier.

-an, -ain, -en, -ian, -on (Latin -anus): public-an, capt-ain, citiz-en, guard-ian, sext-on.

-ant, -ent (Latin -antem, -entem): merch-ant, tru-ant, ten-ant, combat-ant, stud-ent, rod-ent, cli-ent.

-ate (Latin, -atus, -atem): candid-ate, magistr-ate, prim-ate.

-ee, -ey, -y (French -é, from Latin -arus): deput-y, jur-y, attorn-ey, grand-ee, employ-é, absent-ee, refug-ee.

-ive, -iff (Latin, -ivus, French -if): fugit-ive, mot-ive; plaint-iff, bail-iff.

Greek:-

-ist, -ast (Greek -ist-es, -ast-es): soph-ist, art-ist, psalm-ist, botan-ist, nihil-ist; enthusi-ast.

-ot (Greek -ot-es): patri-ot, zeal-ot, idi-ot, Iscari-ot.

-ite, -it (Greek -it-es): Israel-ite, erem-ite, herm-it, Jesu-it.

(b) Marking the Feminine gender:-

Teutonic:-

-ster (A.S. -es-tre), -en (A.S. -en): spin-ster, vix-en (Fem. of "fox").

Romanic:-

-ess (Latin -ix, French -esse): testatr-ix, shepherd-ess.

Note.—"Sultan-a," "donn-a." Here the a is Italian.

Greek :--

-ine (Greek -in-e, French -ine): hero-ine, czar-ina.

(c) Diminutives (denoting smallness, endearment, contempt):—

Teutonic :--

-el, -le, -l (A.S. -el): hov-el, bund-le, freck-le, gir-l.

-erel, -rel (A.S. -er + el, Double suffix): cock-erel, mong-rel, dogg-erel (?).

-en (A.S. -en): maid-en, chick-en.

-ing, -ling (A.S. -ing, Double suffix, -el + ing); farth-ing, tith-ing; hire-ling, duck-ling. (Note.—The suffix -ing is not always in a diminutive sense, as Vik-ing, "a man of the creek," a creeker.)

-kin (Dutch -ken): fir-kin, nap-kin.

-ock, -k (A.S. -uc, -c): bull-ock, hill-ock, stir-k (little steer).

-y, -ey, -ie (A.S. -ig): bab-y, Tomm-y, Charl-ey, bird-ie, lass-ie.

-ster (A.S. es-tre): trick-ster, pun-ster, young-ster, rhyme-ster, Romanic:—

-aster (Lat. -aster, cf. A.S. -estre): ole-aster, pil-aster, poet-aster.

-ule, -le (L. -ulu): pill-ule, sched-ule; circ-le (hence circ-ul-ar).

-cule, -cle (Lat. -cu-lus, Fr. -cle): animal-cule, pinna-cle.

-el, -le, -l, -elle (Lat. -ellus): dams-el, cast-le, vea-l, bagat-elle, vermi-c-elli, umbr-ella, violon-c-ello (Ital.).

-et, -ot, -ette (Fr. -et, fem. -ette; Ital. -etto): lock-et, lanc-et; ball-ot; brun-ette, cigar-ette; stil-etto, fals-etto.

-let (Double suffix, -el + et): brook-let, rivu-let, ham-let, cut-let.

-ito (Span. -ito): negr-ito, mosqu-ito.

Greek :---

-isk (Gr. -iscos): aster-isk, obel-isk.

(d) Augmentatives (denoting greatness, or excess to a fault):—

Romanic :-

-ard, -art (Low Lat. -ardus): drunk-ard, wiz-ard, bragg-art. -oon, -on, -one (Fr. -on, Ital. -one): ball-oon, flag-on, tromb-one.

(e) Abstract suffixes (denoting act, state, quality, etc.) :-

Teutonic :-

-dom (A.S. dóm): free-dom, martyr-dom, earl-dom, Christen-dom.

-hood, -head (A.S. had): man-hood, priest-hood, maiden-head.

-lock, -ledge (A.S. lác): wed-lock, know-ledge.

-red (A.S. réd): hat-red, kind-red.

PART V

- 182 ANALYSIS AN
 - -ric (A.S. rice): bishop-ric.
 -ness (A.S. -nis, -nes): dark-ness, aloof-ness, holi-ness.
 - -ship (A.S. scipe): friend-ship, wor(th)-ship, owner-ship.
 - -t, -th (A.S. -ith): leng-th, tru-th, heigh-t, ligh-t, sigh-t.
 - -ter, -der (A.S. -ther, -der): slaugh-ter, laugh-ter, mur-der.

Romanic:-

- -age (Fr. -age): cour-age, hom-age, umbr-age, bond-age.
- -al (Fr. -aille): refus-al, tri-al, surviv-al, bestow-al.
- -ance, -ence, -ancy, -ency (Lat. -antia, -entia): dist-ance, prud-ence, guid-ance, const-ancy, urg-ency.
 - -cy, -acy, (Lat. -tia): cur-acy, prel-acy, secre(t)-cy, idiot-cy.
- -ice, -ise, -ess (Lat. -itia, Fr. -esse): serv-ice, exerc-ise, prow-ess.
 - -ion (Lat. -ionem): relig-ion, suspic-ion, relat-ion.
 - -ment (Lat. -mentum): enjoy-ment, fer-ment, attach-ment.
 - -mony (Lat. -monio, or -monium): parsi-mony, matri-mony.
 - -or, -our, -eur (Lat. -or, Fr. -eur): err-or, fav-our, grand-eur.
 - -ry, -ery (Fr. -rie, -erie): slave-ry, trick-ery, brave-ry.
 - -tude (Lat. -tudo): forti-tude, longi-tude, magni-tude.
 - -ty (Lat. -tas, Fr. -te): cruel-ty, certain-ty, frail-ty, falsi-ty.
 - -ure, -ury (Lat. -ura): seiz-ure, cult-ure, capt-ure, us-ury.
 - -y (Lat. -ia, -ium): infam-y, stud-y, perjur-y.

Greek :-

- -ism, -asm (Gr. -ismos, -asmos): optim-ism, enthusi-asm.
- -y (Gr. -ia): monarch-y, energ-y, sympath-y.
- (f) Collective (denoting a collection or the place of one):—

Romanic :-

- -ade (Fr. -ade): arc-ade, colonn-ade, balustr-ade.
- -age (Fr. -age): foli-age, plum-age, vill-age, cott-age.
- -ry, -ery (Fr. -rie, -erie): tenant-ry, rook-ery, gent-ry.
- -ory (Lat. -orium): dormit-ory, fact-ory, invent-ory.
- -ary (Lat. -arium): gran-ary, libr-ary, gloss-ary.
- (g) Miscellaneous suffixes, not included in the above:—

 Teutonic:—
- -m, -om (A.S. -m, -ma): bloo-m, (from blow), doo-m (from do), bes-om.
 - -nd, -and (A.S. Pres. Part. ending): frie-nd, wi-nd, husba-nd.
 - -ow, -w (A.S. -u, -we): mead-ow, shad-ow.

Romanic :--

- -ace (Lat. -atio, -atium; Fr. -ace): popul-ace, terr-ace, pal-ace.
- -ine, -in (Lat. -inus): libert-ine, cous-in (Lat. consobr-inus).
- -me, -m (Lat. -men): cri-me, char-m, real-m (Lat. regali-men).
 -0 (Lat. -us, -um; Span. -o): Studi-o, grott-o, incognit-o.
- -0 (Lat. -us, -um; Span. -o): Studi-o, grott-o, incogni

-cre, -chre (Lat. -crum): sepul-chre, lu-cre.

Greek:-

-on (Gr. -on): criteri-on, skelet-on, col-on, phenomen-on.

-ic, -ics (Gr. -ikos, -ika): log-ic, mus-ic, phys-ics, eth-ics.

147. II. Adjective-forming:

(a) Possessing a quality of any kind:—

Teutonic:-

-ed (A.S. -d): wretch-ed, gift-ed, fabl-ed, money-ed.

-en (A.S. -en): wheat-en, gold-en, heath-en, op-en.

-ly (A.S. -lic): god-ly, woman-ly, man-ly.

-some (A.S. -sum): toil-some, hand-some, whole-some, bux-om.

-y, -ey (A.S. -ig): might-y, wood-y, clay-ey, drear-y. an-y.

Romanic:-

-al (Lat. -alis): vit-al, parti-al, mort-al, comic-al.

-an, -ane, -ain (Lat. -anus): pag-an, hum-an, hum-ane, cert-ain.

-ant, -ent (Lat. -antem, -entem): dist-ant, abs-ent, pres-ent.

-ar, -ary, -arious (Lat. -aris, -arius): lun-ar, contr-ary, vic-arious, greg-arious.

-esque (Lat. -iscus, Fr. -esque): pictur-esque, grot-esque, Arab-esque.

-ile, -il, -eel, -le, -el (Lat. -ilis): frag-ile, fra-il, gent-eel, gent-le, hum(b)-le, cru-el.

-ic, -ique (Lat. -icus, -iquus): rust-ic, com-ic, un-ique, obl-ique.

-ine (Lat. -inus): div-ine, clandest-ine, infant-ine.

-lent (Lat. -lentem): pesti-lent, corpu-lent, vio-lent.

(b) Possessing a quality in a high degree :-

Teutonic :-

-ful (A.S. -ful, Eng. -full): plenti-ful, master-ful.

Romanic:-

-ous, -ose (Lat. -osus): numer-ous, fam-ous, verb-ose.

PART V

(c) Possessing a quality in a slight degree; hence sometimes used in a depreciative sense:—

Teutonic :--

184

-ish (A.S. -isc): pal-ish, redd-ish, woman-ish (fit for a woman, but not fit for a man), snapp-ish, upp-ish, slav-ish, baby-ish.

Note.—The prefix sub- (Latin) sometimes means "slightly"; as, sub-acid (slightly acid), sub-tropical (not quite tropical).

(d) Conveying an Active sense :-

Romanic :-

-ive (Lat. -ivus): recept-ive, act-ive: (capt-ive, which has a Passive sense, is exceptional).

-ory, -orious (Lat. -orius): illus-ory, cens-orious.

-fic (Lat. -ficus): terri-fic, honori-fic, beati-fic.

(e) Conveying a Passive sense :-

Romanic :--

-able, -ible (Lat. -bilis): laugh-able, eat-able, ed-ible.

(f) Describing nation, sect, creed, etc.:

Teutonic :-

-ish, -ch (A.S. -isc): Engl-ish, Ir-ish, Span-ish, Fren-ch.

Romanic :--

-an (Lat. -anus): Rom-an, Austri-an, Belgi-an, Christi-an.

-ese (Lat. -ensis): Chin-ese, Siam-ese, Portugu-ese.

Greek :---

-ite (Gr. -it-es): Israel-ite, Irving-ite, Carmel-ite.

(g) Miscellaneous suffixes, not included in the above :-

Teutonic :--

-teen, -ty (A.S. -tén, tig, ten): thir-teen (3+10), thir-ty (3×10) .

-ern (A.S. irn-an, to turn): north-ern, north-er(n)-ly.

-ther (A.S. ther, Comp. degree): o-ther, fur-ther, whe-ther, ne-ther.

Romanic:-

-ior (Lat. comp. degree): exter-ior, pr-ior, super-ior.

-monious (Lat. -monius): cere-monious, sancti-monious.

-ple, -ble (Lat. -plex, Fr. -ple, fold): tri-ple, tre-ble.

Greek :-

-astic, -istic (Gr. -astikos, -istikos): dr-astic, art-istic.

148. III. Verb-forming:

(a) Causative: hence forming Transitive words:—

Teutonic:-

- -en (A.S. -en or -n): dark-en, sweet-en, length-en, height-en. Romanic:—
- -fy (Lat. facio): magni-fy, terri-fy, stupe-fy.

Greek:-

- -ise (through French -iser): galvan-ise, brutal-ise, fertil-ise.
- Note.—Some Prefixes are also used for the same purpose:— Teutonic be-, as be-friend, be-calm, be-numb; Romanic im-, en-, as im-peril, en-dear, en-large.
 - (b) Frequentative, denoting frequency or continuance:—

 Teutonic:—
 - -el, -le, -l: cack-le, jost-le, sniv-el (sniff), draw-l (draw).
 - -er, -r: batt-er (beat), sputt-er (spout), glimm-er (gleam).
 - -k: har-k (hear), hear-k-en, lur-k, tal-k (tell).
 - (c) Other verb-forming suffixes:

Romanic:-

- -ate (Lat. -atum): captiv-ate, gradu-ate, filtr-ate.
- -ish (Lat. -isc, Fr. -iss): pun-ish (pun-ch), per-ish, flour-ish.
- -esce (Lat. -esco, inceptive): coal-esce, acqui-esce.

149. IV. Adverb-forming:

Teutonic:-

- -ly (A.S. lic-e, in a like way): on-ly, bad-ly, dark-ly, open-ly.
- -ling, -long (A.S. linga): head-long, dark-ling, side-long.
- -meal (A.S. mál, a time): piece-meal, inch-meal (Shakespeare).
- -ward, -wards (A.S. weard, direction): back-ward, back-wards.
- -wise (A.S. wis-e, manner): like-wise, other-wise.
- -way, -ways (A.S. weg, way); straight-way, al-ways.
- -s, -ce (sign of Genitive): need-s, twi-ce, back-ward-s, sometime-s.
 - -n: whe-n, the-n-ce. (The n in often is an intruder.)
 - -re: whe-re, the-re.
- **-om** (old Dative ending: cf. who-m, the-m, hi-m): whil-om, seld-om.
 - -ther (direction): whi-ther, hi-ther, hi-ther-to.
- Note.—We have no Romanic or Greek suffixes for forming Adverbs.

SECTION 2.—PREFIXES: TEUTONIC, ROMANIC, GREEK

150. Teutonic Prefixes.—These have been distinguished into (a) Separable, and (b) Inseparable:—

(a) Separable; i.e. capable of being used as separate words; such as after-life, by-path, fore-cast, forth-coming, off-shoot, on-set, out-let, through-ticket, up-start, wel-fare. Such words might be called Compounds (§ 141). These do not require further explanation. The few mentioned below are somewhat peculiar.

Out-.—This gives certain verbs the sense of surpassing; as out-live (to live beyond), out-vote (to defeat by votes), out-run, out-shine.

Over-.—This denotes excess; as over-eat (eat too much), over-sleep (sleep too long), over-worked (worked too much).

Under.—This denotes deficiency, too little; as under-fed, under-paid, under-valued, under-cooked.

With-.—This denotes "back," "against"; as with-stand, with-hold, with-draw. ("Drawing-room" means "with-drawing-room." The with has been elided.)

(b) Inseparable; i.e. not used as separate words:-

A- (on, in): a-bed, a-shore, a-jar, a-stir, a-sleep, etc.

A-(of, from): a-down (off a down or hill), a-fresh, a-kin, a-new.

A- (Intensive): a-rise, a-waken, a(f)-fright, a(c)-cursed.

Al- (all): al-one, l-one, al-most, al-ready, al-together.

Be- (by): (1) Transitive force: as be-calm. (2) Intensive force; as be-smear. (3) Forming adverbs or prepositions; as be-sides, be-fore. (4) Privative force in be-head.

For- (not the prep. "for"): (1) Intensive; as for-bear, for-lorn. (2) Privative; as for-bid, for-get, for-swear, fore-go (a bad spelling for for-go. The prefix fore is quite distinct from for).

Gain- (A.S. gegn, against): gain-say, gain-strive (out of use).

N- (Indef. article "a," the n being wrongly detached): n-ewt
(for an ewt), n-ugget (for an ingot), n-ickname (for an eke-name).

N- (Negative prefix): n-or, n-either, n-av.

Mis- (miss): mis-take, mis-hap, mis-deed, mis-trust.

Twi- (A.S. twi, double): twi-light, twi-n, twi-ce, twi-st.

Un- (A.S. un-): (1) Negative: un-wise=not wisc. (2) Reversal: twist, un-twist. (In "un-loose" the un- is merely Intensive.)

151. Romanic Prefixes.—The following are of frequent occurrence :-

A-, ab-, abs- (from): a-vert, ab-use, ab-normal, abs-tain.

Ad- (to): ad-vice, ab-breviate, ac-cent, af-fable, ag-gressor, al-lude, an-nex, ap-pear, ar-rears, as-sert, at-tain.

Ambi- (on both sides): amb-iguous, amb-ition, ambi-dextrous.

Ante-, anti-, ant- (before): ante-cedent, anti-cipate, ant-ique.

Bene- (well): bene-fit, bene-volent, ben-ison.

Bis-, bi-, bin- (twice): bis-cuit, bi-ped, bi-cycle, bin-ocular.

Circum-, circu- (around): circum-stance, circu-it, circumference.

Cis- (on this side): cis-Alpine, on this side of the Alps.

Con- (with), coun- (Fr.): con-tend, col-lege, com-pete, cor-rect, coun-sel, con-temporary.

Contra- (against), counter (Fr.): contra-diet, contra-st, counter-act, counter-part, counter-mand.

De- (down, from, astray): de-grade, de-part, de-viate.

, (Reversal): merit, de-merit; en-camp, de-camp.

(Intensive): de-liver, de-clare, de-file, de-fraud.

Dis-, di- (asunder): dis-tract, dis-miss, dis-member, di-vulge.

(Intensive): dis-sever, dis-annul, di-minish.

(Reversal): en-chant, dis-enchant; illusion, dis-99 illusion.

(Negative): ease, dis-ease; honour, dis-honour: dif-ficult.

Ex-, e-, extra- (out): ex-ample, e-lapse, extra-vagant.

, (loss of office): ex-king, ex-empress.

In-, en-, em-(in): in-ject, im-pute, ir-ritate, en-close, em-ploy.

In- (not): in-firm, il-literate, im-pious, ir-regular, i-gnorance.

Inter-, enter- (among): inter-est, intel-lect, enter-prise.

Intro-, intra- (within): intro-duce, intra-tropical, intr-insic.

Male-, mal- (badly): male-volent, male-factor, mal-ady.

Mis- (Lat. minus, badly): mis-chance, mis-chief, mis-nomer.

Non-, ne-, neg- (not): non-sense, ne-uter, neg-lect.

Ob- (against): ob-ject, oc-cur, of-fer, op-press, os-tensible, o-mit.

Pen- (Latin, pæne, almost): pen-insula, pen-ultimate.

Per- (through): per-form, per-haps, pel-lucid.

, (wrong direction): per-vert, per-jury, per-fidy, per-ish.

Post- (after): post-script, post-pone, post-ern,

PART V

Pre- (Latin præ, in front, before): pre-occupy, pre-tend, pre-dict, pre-vent.

Preter- (Latin, præter, beyond): preter-natural, preter-ite.

Pro-, por-, pur- (Latin pro, for, before): pro-fess, pour-tray, por-trait, pur-pose.

Re-, red- (back): re-fer, re-new, red-eem, red-undant.

Retro- (backwards): retro-cession, retro-grade, retro-spect.

Se-, sed- (apart): se-cret, se-cure, se-parate, sed-ition.

Semi-, demi- (half): semi-circle, demi-god.

Sub- (under): sub-ject, suc-cour, suf-fice, sug-gest, sum-mon, sup-pose, sur-render, sus-pend, sub-marine ("under the sea").

(slightly): sub-acid, sub-tropical.

(of lower rank): sub-judge, sub-committee, sub-division.

Subter- (under, secretly): subter-fuge.

Super-, sur- (above): super-fluous, sur-face, sur-vive.

Trans-, tra- (across): trans-mit, trans-gress, tra-duce, tra-ffic.

Tri-, tre- (three, thrice): tri-angle, tri-nity, tri-vial, tre-ble.

Ultra- (beyond, excess): ultra-marine, ultra-radical.

Vice-, vis- (instead of): vice-roy, vis-count.

152. Greek Prefixes :--

Amphi- (on both sides): amphi-bious, amphi-theatre.

An-, a- (not): an-archy, an-ecdote, a-pathy, a-theism, a-gnostic.

Ana- (again, back): ana-logy, ana-lyse, ana-tomy.

Anti-, ant- (against): anti-podes, anti-pathy, ant-agonist.

Apo-, aph- (from): apo-logy, apo-state, apo-stle aph-orism.

Archi-, arch- (chief): archi-tect, arch-bishop, arch-angel.

Auto- (self): auto-car, auto-graph, auth-entic.

Cata-, cath- (down): cata-ract, cath-edral, cat-echism.

Dia- (through): dia-logue, dia-meter, dia-gnosis.

Dis-, di- $(in \ two)$: dis-syllable, di-phthong, di-lemma, di-stich, di-graph.

Dys- (ill, badly): dys-entery, dys-pepsia.

Ek-, ex- (out): ec-stasy, ex-odus.

En- (in): en-thusiasm, em-phasis, el-lipsis. Eu-, ev- (well): eu-phony, eu-logy, ev-angelist.

Epi-, eph- (on): epi-taph, ep-och, eph-emeral, ep-isode.

Hemi- (half): hemi-sphere, hemi-stich.

Hyper- (above, beyond): hyper-critical, hyper-bole.

Hypo-, hyph- (under): hypo-crite, hypo-thesis, hyph-en.

Meta-, meth-, met- (after): meta-phor, meth-od, met-eor.

Mono-, mon- (single): mono-poly, mon-arch, mon-k.

Pan-, panto- (all): pan-orama, panto-mime, pan-oply.

Para-, par- (beside): para-ble, para-graph, par-allel, para-lysis.

Peri- (around): peri-od, peri-phrasis, peri-meter.

Pro- (before): pro-gramme, pro-phet, pro-blem, pro-em.

Syn- (with): syn-od, syl-lable, sym-bol, sym-pathy, sy-stem.

Tri- (thrice): tri-pod, tri-syllable, tri-chord, tri-cycle.

153. General results, regarding the uses of Prefixes :-

(a) Prefixes denoting the undoing of something done:—

Teutonic :---

un-: un-bolt, un-tie, un-lock, un-fold.

Romanic :---

dis-: dis-mount, dis-arm, dis-appear, dis-close, dis-embark.

de-: de-odorise, de-plete, de-camp, de-throne.

(b) Prefixes denoting a Negative, with one Suffix:—

 $Teutonic : \longrightarrow$

un-: un-happy, un-safe, un-ready, un-certain, un-selfish.

-less: hap-less, law-less, hope-less, spot-less.

n-: n-one, n-ever, n-or, n-either.

Romanic:-

ne-, neg-, non-: ne-uter, neg-lect, non-sense.

dis-, di-: dis-contented, dif-ficult, dif-fident, dis-agree.

in-: in-human, ir-rational, im-moral, ig-noble, il-legible.

ab-: ab-normal.

Greek :-

a-, an-: a-pathy, an-archy.

(c) Prefixes indicating something good:

Teutonic :--

well-: wel-fare, wel-come, well-bred.

Romanic:-

bene-: bene-volent, bene-fit, ben-ignant, ben-ison.

Greek :---

eu-, ev-: eu-phony, ev-angelist.

PART V

190

(d) Prefixes indicating something bad:

Tentonic :--

mis- (from miss): mis-deed, mis-take, mis-hap.

Romanic .--

mis- (from minus): mis-carry, mis-use, mis-fortune. male-, mal-: male-factor, mal-ignant, mal-treat.

Greek :-

dys-: dys-entery, dys-pepsia.

Exercise 42.—On Word-building

- (a) 1. Supply the feminine forms of sultan, hero, testator, shepherd, spinner, fox. 2. Break up mistrustfully, unwholesomeness into syllables, and show how each syllable contributes to the meaning of the words. 3. What are the suffixes in the following words: -farthing, foremost, kingdom, fallen, English, thirsty? 4. Reverse the meaning of each of the following words by adding a prefix: -happy, possible, rational, contented, valid, noble, sense. 5. Give four examples of diminutive forms in English nouns. 6. Form adjectives from disaster, two, wheat, and adverbs from gay, holy, other, south, week. 7. How are verbs formed (a) from nouns: (b) from adjectives: (c) from other verbs? Give two examples of each, and show the exact force of the change of the word. 8. By the use of a suffix, change each of the following nouns into an adjective, and give the force of each suffix :-sister, fame, quarrel, slave, silver. 9. What is meant by saying that the word bicycle is a hybrid? 10. Write words (one in each case) containing the following prefixes and suffixes:—ante-, anti-, auto-, vice-, -ess, -ness, -ry, -kin. (Oxford and Cambridge, Junior and Senior.)
- (b) 1. How are Compound verbs formed? Write down ten Compound verbs with different prefixes, giving the meaning of these. 2. Give the diminutive forms of stream, hill, duck, lass; and the meaning of the prefix in each of the following words:mischance, importunate, retrospect, subterfuge, constant. 3. Why is co-temporary an incorrect torm? What different forms do cum, in, ad, inter, per assume in composition? 4. Write down suffixes employed to denote (1) the agent, (2) diminution, (3) gender. 5. Give with examples three affixes (suffixes) of Latin

origin, by which Abstract nouns in English are formed. 6. Give the exact force of the following prefixes and affixes (suffixes):—manhood, spinster, tiresome, sparkle; misgive, forget, betroth, innocent. 7. What is the force of the prefixes in the words impossible, except? From what languages are they respectively taken? Write down three other examples of the use of each of these prefixes. 8. Explain the meaning of the following prefixes, and write words formed by means of them:—un-, ante-, bi-, circum-, inter-. 9. Give (i) three prefixes of Latin origin, and (ii) three noun suffixes; and by examples show what effect they have upon words in which they are introduced. (Preceptors', Second and Third Classes.)

- (c) 1. Give the different ways of forming adverbs in English.

 2. Explain the force of the syllables in italics in the following words:—spinster, headlong, twenty, improper, hillock, eldest, kingdom, besprinkle.

 3. In the following words what is the force of the parts printed in italics?—around, numerous, aloud, governesses, recite, English, Italian.

 4. Mention two ways in which abstract nouns can be formed from common nouns, and give two examples of each.

 5. What is meant by diminutives and augmentatives? Illustrate by examples the suffixes used in the formation of such words.

 6. What are compound adjectives? Give three examples.

 7. Give the meanings of the following Latin Prefixes, and illustrate each by two English words:—ab-, bis-, con-, non-, pro-, se-.

 8. Give the meanings of the following prefixes, and two instances of the use of each:—in-, pier-, dis-, re-. (Preceptors', Second and Third Classes.)
- (d) 1. Say what you know about the Feminine endings in vixen, spinster, duchess, baxter, margravine, infanta, and testatrix.

 2. Mention six English Inseparable prefixes; and give two examples of words formed with each of them. 3. What is the force of the prefix in:—undismayed, mislay, behind, forgive, withstand, prefix, extravagant, postpone, superscription, anarchy, epitaph, perimeter? 4. Give the meaning and function of the following prefixes (with two examples in each case), and state whether they are English or Latin:—be-, con-, for-, gain-, in-, pro-, re-, with-. 5. Give the derivation and meaning of each of the following suffixes, with two examples of each:—-ard or -art, -fy, -kin, -ock, -ous, -some, -ster, -tude. 6. Give the meaning and function of the following suffixes; and state whether they are

added to nouns, or verbs, or adjectives : -- -ing, -lock, -m, -red, -ther, -s, -ward. 7. Give examples of the following suffixes, and state their derivation and their meaning: -- -ster, -kin, -ly, -tude, -let. -ous. -fy. -ise. 8. Explain with examples the force of the following prefixes and suffixes: -be-, for-, with-, cata-, intro-, -der, -nd, -ship, -eer, -le, -ment. 9. Give the origin and meaning of the prefix in each of the following words:—advent, contradict, forlorn, hypercritical, interpose, mistake, reopen, transmarine, unkind, withstand. 10. Give the meaning and derivation of the suffixes (distinctly specifying these) of the following words:wisdom, bounty, slavish, clayey, worship, blackness, longitude, sepulchre, strengthen, gamble. 11. Explain the force of the terminations in any five of the following: -oxen, vixen, maiden, holden, wooden, open, often. 12. With what different suffixes, and derived from what sources, do we form Abstract nouns? Give one or two examples of each. 13. Point out the force of the prefix in each of the following, explaining the words themselves:—hypercritical, antechamber, cisalpine, synchronous, percolate, cataract. (Preceptors', First Class.)

CHAPTER XXXIII.—SOUNDS, SYMBOLS, AND SPELLINGS

SECTION 1.—LETTERS, ACCENT, SYLLABLES

154. A letter (Latin litera, Fr. lettre) is a mark or symbol that stands for a certain sound. Without letters men can talk as fast as they like, but they cannot either read or write. A word, until it is written, is merely a sound, perceptible to the ear, but not to the eye. It is really the sound that makes the word, not the letters.

Letters are subdivided into two great classes, vowels and consonants.

155. Vowel is from Lat. vocalis, Fr. voyelle,—L. vox, vocis, the voice. A vowel, as its etymology implies, stands for a voice-sound, i.e. a sound or tone produced by the unimpeded passage of the breath, without the help of a consonant. Thus it is quite as easy to say e as be.

- 156. Consonant (Lat. con, together with, sonant-em, sounding).—This, as its name implies, stands for a sound that cannot be easily, if at all, produced except in company with a vowel. Thus it is not easy to pronounce the letter b, until we connect it with some vowel, as be. In fact, we find it so difficult to sound b by itself, that we have called the consonant be, not b.
- 157. The English Alphabet.—Our alphabet consists of 26 letters, of which 5 are vowels, 19 are consonants, and 2 are semivowels, *i.e.* dubious letters.

Vowels.-A, a; E, e; I, i; O, o; U, u.

Consonants.—B, b; C, c; D, d; F, f; G, g; H, h; J, j; K, k; L, l; M, m; N, n; P, p; Q, q; R, r; S, s; T, t; V, v; X, x; Z, z.

Semivowels.-Y, y; W, w.

The letter y is superfluous as a vowel; for it expresses precisely the same sound as i. Thus there is no difference of sound between the first syllables of sin-ner and syn-tax, sis-ter and sys-tem. As a consonant, however, the y is indispensable; for we could not express such words as yoke, yet without it.

The letter w as a vowel is even less useful (if this were possible) than y; for it cannot stand alone as y can, but is seen only in such combinations as aw, ew, ow, all of which could be quite as easily, and in fact often are, spelt au, eu, ou. As a consonant, however, the letter w is indispensable; for it enables us to express such words as will, wax, wet.

Note.—The vowels i and u (care being taken that u here stands for the u in full, and not for the u in tune) acquire the consonantal sounds of y and w respectively, when they are followed by other vowels. Thus opinion is sounded as if it were spelt o-pin-yon (three syllables). Similarly if we attempt to sound uilliam we get William. The letter w, when written, is merely a double v, though is it called a "double u." The symbol v is merely another form of u, and in Latin during the classical period u was the only symbol used.

158. Digraph, diphthong.—It is necessary to understand clearly what is meant by these two words.

A digraph is a compound letter; a diphthong is a compound sound. "Digraph" is from Greek di, two or twice, and graph, to write: it therefore means "a double letter." "Diphthong" is from Greek di, two or twice, and phthong-os, a sound; it therefore means "a double sound."

Owing to the fewness of our vowel-symbols and the multiplicity of our vowel-sounds we are sometimes forced to use a digraph for expressing a vowel-sound that is simple or uncompounded, as au in fraud. On the other hand, it sometimes happens (such is the perversity of our spelling) that we use a single letter to express a vowel-sound that is compound; as u in tu-bu-lar.

Similarly we sometimes use a digraph to express a single consonantal sound, as ph in Philip (=flip); and a single consonant to express a double sound, as x in tax (=taks).

159. Voiceless and Voiced Consonants. 1— Consonants are subdivided into two great classes, the Voiceless and the Voiced. Voiced is the name given to those consonants which can be sounded to a slight extent without the help of a vowel; the Voiceless are those to which no sound whatever can be given without this help. The Voiced therefore have something of a vocalic character, and are a connecting link between Voiceless consonants and Vowels.

Consonants as thus distinguished go for the most part in pairs. All consonants not included amongst these pairs are Voiced, with the exception of h, which is Voiceless.

Voiceless.	Voiced.	Voiceless.	Voiced.	Voiceless.	Voiced.
k	g	8	Z	p	b
ch s	j	t	d	f	V
sh	zh	th(ing)	th(is)	wh	w

¹ Voiceless and Voiced are the names adopted by Professor Skeat. Surd (silent) and Sonant (sounding) are equally suitable. The names Hard and Soft, Sharp and Flat, are also used; but they are not suitable. An apple may be hard or soft, but not a consonant.

The distinction between Voiceless and Voiced can be easily verified by any one who will make the experiment on his own organs. We can sound k, for instance, so long as the k is followed by a vowel, as in ka. But if we cut off the a and try to sound the k alone, we cannot produce any sound whatever, though we are conscious of a feeling of muscular tension in the tongue. There is no *voice* in it; and hence the consonant k is classed as Voiceless.

On the other hand, if we take the combination ga, and cut off the a, we find that without the assistance of this or any other vowel it is possible to make an audible guggle. This consonant is therefore classed among the Voiced.

The following facts are of very wide application:

- I.—When two consonants come together, voiceless consonants are assimilated in sound to voiced ones, or voiced to voiceless.
- (a) In monosyllables the first letter usually holds its ground, and the second has to give way to it. Compare the s in cats with the s in lads. In the first the s remains voiceless, because it is preceded by the voiceless t. In the second the s becomes a voiced letter, i.e. receives the sound of z, because it is preceded by a voiced d. Similarly compare the d in looked with that in loved, the s in caps with that in cabs.
- (b) In dissyllables and compound words the first letter usually gives way to the second one; as in five-teen, sounded and spelt as fif-teen; cup-board, sounded, though not spelt, as cub-board; black-guard, sounded, though not spelt, as blag-guard.

This process is very commonly at work in prefixes. Thus we have accent for adcent, afflict for adflict, appear for adpear, assent for adsent, attain for adtain, aggrieve for adgrieve, allot for adlot, annul for adnul, arrive for adrive, intellect for interlect, occur for obcur, offer for obfer, oppose for obpose, pellucid for perlucid, pollute for porlute, succeed for subceed, support for subport, etc.

II.—A voiceless consonant often receives the sound of a voiced one, when it is placed between two vowels. Thus in

breath the th is voiceless; but in breathe, where it stands between two vowels, it is voiced. Again, rise is sounded as rize, not as rice. Lathe is sounded, not as lath, but with the sound th as in th(is).

III.—When one consonant is substituted for another, as sometimes happens, a voiceless consonant is displaced by a voiceless one, and a voiced by a voiced. This is especially seen in doublets,—that is, pairs of words derived from the same original elements, but differently spelt:—

Crook, cross (k substituted for s, both voiceless). Aptitude, attitude (p and t, both voiceless). Apricock (older spelling) and apricot (k and t, both voiceless). Barb, beard (b and d, both voiced). Wrap, lap (r and l, both voiced). Prune, plum (r and l, n and m, both pairs voiced). Ward, guard (w and g, both voiced).

In shoe (A.S. scó) we find sh substituted for sk (both voiceless). So too in she (Midland scé). In "seethe," "sodden," voiced th is interchanged with voiced d; so too in murther (older spelling), murder. In the 3rd Sing. "cast-s" (older form, cast-es, cast-eth) we find the voiceless s substituted for the voiceless th.

In A.S. final or medial h was sounded almost like k, as in "Loch Lomond." A survival of this occurs in the word next (= nekst), which in A.S. was spelt nehst. In modern English this h has been usually respelt as gh. In the words "lough" and "hough" (sounded as lok, hok), the original sound of the k has been retained. But in certain other words, as enough, laugh, rough, trough, tough, cough, the sound of f has been substituted for the sound of k.

160. Accent, Emphasis, Quantity.—Roughly speaking, both accent and emphasis are the effect of *loudness* (which helps to produce distinctness), while quantity depends on the *time* that it takes to pronounce a syllable.

When we lay stress upon a single syllable, i.e. pronounce it more loudly and distinctly than the other syllable or syllables of the same word, this is called **Accent** (Latin, ad, to, cantus, a song).

Sup-ply', sim'-ply. Re-bel' (verb), reb'el (noun).

When we lay stress upon an entire word, i.e. pronounce it more loudly and distinctly than any other word of the same sentence or phrase, this is called **Emphasis** (Greek en, in or on, phasis, speech).

I appeal from Philip drunk to Philip sober.

Quantity means "the amount of time occupied in uttering a vowel or syllable." If the time so occupied is short, the vowel or syllable is said to be short; otherwise, it is said to be long.

A vowel can be long either by nature or by position. (1) Vowels long by nature are exemplified in fate, fraud, smote, bite, etc.; vowels short by nature are seen in fat, pod, hit, wet, etc. (2) Vowels long by position, but short by nature, are seen in west, land, flint, stump, bond. The vowels themselves in such words or syllables are not long, but they are said to be made long by position, because they are followed by a strong combination of consonants, which prevents the syllable from being sounded rapidly.

Note.—In words of three or more syllables the tendency is to throw the accent on the third syllable from the end, as in sen'-a-tor, doc'-u-ment, hap'-pi-ness, sla've-ry. In words of three syllables there is sometimes a minor or inferior accent on the last syllable; as in ref'-u-gee', cav'-a-lier', mar'-i-time', am'-bus-cade'.

In words of four syllables the accent is often thrown on the third syllable from the end, as in words of three syllables: ge-ol'-o-gy, ex-trav'-a-gant, cir-cum'-fe-rence, an-tip'-o-des. But there is no uniform practice; thus we may have the accent thrown on the fourth syllable from the end, with a minor accent on the third syllable: as in tem'-po-ra'-ry, in'ter-fe'-rence, con'-tro-ver'-sy, def'-e-ren'-tial. Or the minor accent may be thrown on the fourth and last syllable: as in het'-e-ro-dox', a'-e-ro-plane'.

161. Importance of Accent in English.—In English as now spoken quantity counts for very little; accent is all-important. Thus the word guard is certainly a long syllable when it stands alone; but in the combination

"blackguard" (sounded as blag'-guard) the accent thrown upon the first syllable compels us to make the second syllable as short as we can pronounce it. Again, the diphthong u (i.e. u sounded as $y\bar{oo}$) is long by nature, as in tube. But in the adjective tu'-bu-lar the second u, though long by nature like the first one, is, owing to the want of

accent, made as short as we can pronounce it.

Such is the effect of accent in our language that an unaccented syllable sometimes disappears altogether. Thus ap-pren'-tice has been reduced to pren'-tice; dam-o-sel (older spelling) to dam'-sel; co-rone' (Lat. corona) to crown; la-ven'-der-ess to laun'-dress; with-draw'-ing-room to draw'-ing-room; pun'-ish to punch; sa'-cris-tan to sex'-ton; pa-ral'-y-sie (Gr. paralysis) to pal'-e-sy, pal'-sy; ensam'-ple to sam'-ple; dis-port' to sport; hy-drop'-sy to drop'-sy; af-fray' to fray; es-quire' to squire; a-mend' to mend; ap-peal to peal; de-spite' to spite.

The part of speech to which a word belongs often depends upon the accent. If the choice lies between a verb and a noun, both spelt alike, the verb has the accent on the last syllable, the noun on the first. Of this we have at least

sixty examples.

Com-pound' (verb), com'-pound (noun). Con-duct' (verb), con'-duct (noun). Con-fine' (verb), con'-fine (noun). Con-vert' (verb), con'-vert (noun). Con-vict' (verb), con'-vict (noun). Re-bel' (verb), reb'-el (noun). De-sert' (verb), des'ert (noun). Es-cort' (verb), es'-cort (noun). Im-port' (verb), im'-port (noun).

If the choice lies between a verb and an adjective, the verb has the accent on the last syllable, as before:—

Ab-sent' (verb), ab'-sent (adj.). Fre-quent' (verb), fre'-quent (adj.).

If the choice lies between a noun and an adjective, the noun has the accent on the first syllable, as before, and the adjective on the second:—

Com'-pact (noun), com-pact' (adj.). Min'-ute (noun), mi-nute' (adj.). In'-va-lid (noun), in-val'-id (adj.). Au'-gust (noun), au-gust' (adj.).

Note.—Sometimes, however, there is no difference of accent; as con-tent' (adj. and verb), con-tents' (noun); con-sent', re-spect', her'-ald, sup-port' (all nouns and verbs); con'-crete, pa'-tient (both nouns and adjectives). Such examples are not common.

162. Syllabic division. — In dividing a word into syllables we must be guided by the pronunciation (which of course is very much affected by the accent), not by the etymology. "Word-division," says Professor Skeat, "has nothing to do with etymology. From a practical point of view im'-pu-dence is right, being based on the spoken language. It is only when we take the word to pieces, that we discover that it is formed from im- (for in-), the base pud, and the suffix -ence. Yet we divide the word as im'-pu-dence, not as im'-pud-ence. The spoken language has pe-ruse' at one moment, and pe-ru'-sal at another. It rightly regards ease of utterance, and nothing else."

We divide "banquet" into ban'-quet; we are compelled to do so by the accent. But it we followed the etymology we should have to divide it into banquet, and ignore the accent altogether; for the stem of the word is banque, Fr.

SECTION 2.—VOWELS: SOUNDS, SYMBOLS, AND SPELLINGS

163. Twenty vowel-sounds.\(^1\)—If our alphabet were more perfect than it is, we should have one separate symbol to express each separate sound. Unfortunately it is very imperfect; for we have only five vowel-signs (y having been excluded as superfluous) to express four times as many sounds. Of these twenty vowel-sounds, sixteen are simple, and four are diphthongal. (The phrase "phonetic symbol" used below means the symbol used to express or denote the

¹ The list of twenty sounds here given is based upon that given by the best authorities,—Professor Skeat, Mr. Sweet, Miss Laura Soames, Mr. Rippmann, and Dr. Murray (in the introduction to the Oxford Dictionary). Dr. Murray's system is much more elaborate, but the basis is the same. As to the phonetic symbol most suitable for each sound, authorities are not equally unanimous. I have myself adopted those symbols which seemed likely to cause the least difficulty to a beginner, and which come nearest to those used in the current Dictionaries.

one particular sound assigned to it. The reason why some are bracketed as pairs, while others are not so bracketed, is explained in § 164.)

- A. Four sounds 1 frequently denoted by the symbol a: one short, and three long; all simple, none diphthongal.
 - (1. Short: the sound of a in marry. Phonetic symbol ă.
 - 2. Long: the sound of a in Mary. Phonetic symbol â.
 - 3. Long: the sound of a in mason. Phonetic symbol \bar{a} .

Note.—Observe that (3) is quite a distinct sound from (2). In sounding (2) you have to open the mouth a great deal wider than in sounding (3). In (2) the a is always followed by an r; in (3) it never is.

- 4. Long: the sound of a in path. Phonetic symbol \bar{a} .
- E. Two sounds commonly denoted by the symbol e; one short, and one long; both simple, neither diphthongal.
 - 5. Short: the sound of e in fed. Phonetic symbol &.
 - 6. Long: the sound of ee in feed. Phonetic symbol ē.
- **I.** Two sounds commonly denoted by the symbol i; one short, and one long: the short is simple, the long diphthongal.
 - 7. Short: the sound of i in bit. Phonetic symbol i.
 - 8. Long: the sound of i in bite. Phonetic symbol 1.
- O. Three sounds commonly denoted, and a fourth occasionally denoted, by the symbol o; two short and two long; all simple, none diphthongal.

 - 9. Short: the sound of o in not. Phonetic symbol δ . 10. Lono: the sound of o in frost. Phonetic symbol au.

¹ To the four a sounds given above, some writers add two more, viz. the a in fall and the a in want. The latter is evidently a mistake. It creates a redundancy and leads to confusion; for the a in want is identical in sound with the o in not, and it never has the sound of o except when it is preceded by w. In fact, it is an o sound, and its connection with a is both accidental and exceptional. The former is not an a sound either, and is not espressed by a except when the a is followed by l. Professor Skeat associates only four sounds with the symbol a (see his Note printed in page 459 of my English Grammar Past and Present).

Note.—Since the usual spelling is au, as in "fraud," this has been made the phonetic symbol in preference to o. But the use of the digraph au does not make the sound less simple than it is. In fact (10) is nothing more than (9) drawled or lengthened. If dog is drawled, it has the sound of daug. If the first syllable of laurel is shortened (as in practice it always is), it has the sound of $l\~orel$, rhyming with "moral." Not is merely the short of naught.

11. Short: the sound of o in o-mit. Phonetic symbol o'. 12. Long: the sound of o in tone. Phonetic symbol ō.

Note.—There is a great difference between (11) and (9). In sounding (9) you have to open your mouth rather wide, whereas in sounding (11) you almost close it. No. (12) is merely No. (11) drawled or lengthened.

- **00.** Two sounds commonly denoted by the digraph oo; one short, the other long; both simple, neither diphthongal.
 - (13. Short: the sound of oo in stood. Phonetic symbol, oo.
 - 14. Long: the sound of oo in stool. Phonetic symbol, 50.
- **U.** Two sounds commonly denoted by the symbol u; one short, the other long; the short simple, the long diphthongal.
 - 15. Short: the sound of u in duck. Phonetic symbol ŭ.
 - 16. Long: the sound of u in duke. Phonetic symbol $\bar{\mathbf{u}}$.
- Oi. One sound commonly denoted by the digraph oi; diphthongal.
 - 17. Long: the sound of oi in toil. Phonetic symbol oi.
- Ou. One sound commonly denoted by the digraph ou; diphthongal.
 - 18. Long: the sound of ou in mouse. Phonetic symbol ou.

Lastly, we come to two sounds, one short, the other long, and both simple or non-diphthongal. These have been called the Obscure, Neutral, or Indefinite sounds. For the expression of these sounds we have no vowel in our alphabet. So the expedient which the best authorities have agreed upon is to use $\mathfrak d$ (inverted e) for the phonetic symbol.

(19. Short: the sound of er 1 in gath'-er. Phonetic symbol a. 20. Long: the sound of er 1 in con-fer'. Phonetic symbol 30.

164. General results. - We have thus twenty vowelsounds, of which sixteen are pure or simple, and four are mixed or diphthongal. The sixteen simple sounds are subdivided into (a) eight short, viz. ă, ĕ, ĭ, ŏ, o', ŏŏ, ŭ, and a; and (b) eight long, viz. â, ā, ē, au, ō, oō, and əə. The

four diphthongs are ī, ū, oi, and ou.

Sounds which in the above description are bracketed together as short and long are real pairs. Thus, the α of Mary is the drawled or lengthened sound of the a in marry; the o of frost is the lengthened sound of the o in not; the o of tone is the lengthened sound of the o in o-mit; the oo of stool is the lengthened sound of the oo in stood; the er in con-fer' is the lengthened and accented sound of the er

in gath'-er.

On the other hand, the sounds which are paired, but not bracketed together, as short and long are not real pairs. Thus the ee in feed is not the long sound of e in fed; the i of bite is not the long sound of i in bit; the u of duke is not the long sound of u in duck. Though the same vowel is used in each case, the sounds are entirely distinct. For instance, the sound of ee in feed pairs not with &, but with &. The sound of i is actually expressed by ee in the word "breeches" (sounded short as if it were spelt briches). Again, the sound of \bar{a} pairs not with \check{a} , but with \check{e} : thus waist'-coat is sounded short as if it were spelt west'-coat.

165. How the four diphthongs are produced.—Let us take each diphthong in turn.2

¹ In Scotland, however, and in some of the northern counties of England, the r is trilled, that is, distinctly sounded as r. Owing to this peculiarity of the Northern dialect, I have been reluctantly compelled to adopt from Mr. Skeat, Mr. Sweet, Miss Soames, and Dr. Murray the awkward-looking symbol e. This sound is so natural to human speech that hesitating speakers use it to fill up the pauses in their sentences. In books such pauses are printed thus:-"I-er-am aware-er-that," etc.

² It has been pointed out by phoneticians (Skeat, Sweet, Soames, Dr. Murray) that the long vowels which I have written as a and o are usually sounded with the glides i and u respectively, as ai, ou, and that hence these

i. The first vowel-sound that helps to make this diphthong is obsolete in modern English, though still heard in the north-country dialects, where the a of man has retained a sound intermediate between a and a (Nos. 1 and 4). This intermediate sound rapidly followed by the i of bit produces a third sound distinct from both. The spelling, ai, is seen in the word aisle (sounded as il or ile).

Note.—The sound of a, when added to i, would produce a diphthong, like the sound of ai in Isaiah, naive, Kaiser.

- **ū.** Made up of $i + \overline{oo}$. These, when sounded rapidly in succession, give $y\overline{oo}$, like the u in duke (sounded as " $dy\overline{oo}$ k").
- oi. Made up of au (see No. 10 in § 163) + i. The utterance of these two simple sounds in rapid succession produces a mixed sound distinct from both.
- ou. Made up of $\hat{\mathbf{a}}$ (see No. 4 in § 163) + $\delta\delta$. The utterance of these two simple sounds in rapid succession produces a mixed sound distinct from both.

Note.—We now see very clearly what was stated above in \S 158, that the use of a digraph or two letters to express a sound must not be taken to indicate that the sound is diphthongal or mixed. Thus \mathbf{I} and $\ddot{\mathbf{u}}$, though expressed by single vowels, are both diphthongs; while \mathbf{au} , \widecheck{oo} , \widecheck{oo} , $\eth o$, though expressed by digraphs, are all simple sounds.

- 166. Spellings of the twenty vowel-sounds. It will be convenient to follow the order of vowels, simple and diphthongal, given in § 163.
 - 1. a: mad, plaid, have, salmon, thresh.
 - 2. â: Mary, airy, bearer, heiress, mayoralty, therein.
- 3. ā: fatal, fate, tail, play, campaign, straight, vein, they, reign, weigh, steak, gaol, gauge, eh, dahlia, halfpenny. French words: fête, conjé, ballet, champagne, demesne.
- 4. å: path, art, heart, clerk, aunt, bazaar, palm, hurrah, plaister. Fr. words: vase, éclat.

vowels are in a certain sense diphthongal. They are not diphthongal, however, to the same extent that I, II, oi, and ou are. For the sake of simplicity I have followed Miss Laura Soames in treating them as simple vowels, not as diphthongs.

5. &: bed, head, any, said, says, leopard, leisure, reynard, ate, friend, Thames, bury.

6. ē: me, theme, seen, each, field, seize, key, Casar, police,

invalid, quay, people, Beauchamp.

7. I: bit, nymph, pretty, give, surfeit, married, happy. guinea, donkey, women, busy, breeches, sieve.

8. 1: idol, try, mine, lyre, sign, high, height, die, rye, island,

aisle, choir, indict, eye.

- 9. o: from, want, shone, laurel, knowledge, vacht, hough.
- 10. au: haul, law, lost, tall, talk, pour, ought, broad, sore, lord, war, water, aught, Vaughan, gone.
 - 11. o': hero, follow, heroes, followed, furlough. Fr. depôt.
- 12. o: no, note, both, toad, toe, dough, mow, brooch, oh, yeoman, sew, Cockburn. Fr. mauve, beau.

13. oo: stood, full, could, wolf.

14. 00: fool, tomb, shoe, move, soup, through, truth, blue, iuice, sleuth-hound, slew, rude, manœuvre.

15. ŭ: shut, blood, son, come, touch.

16. ü: (=voo): du-ty, tune, due, suit, few, feud, lieu, view, impugn.

17. oi : coil, boy.

18. ou: loud, down.

19. 9:2 Chi'-na, Sa'-rah, suf'-fer, squir'-rel, but'-ton, Eu'-rope. thor'-ough, tor'-toise, fa'-mous, meer'-schaum, waist-coat, cup'board, pleas'-ure, col'-lar, mar'-tyr, bun'-kum, an'-chor, ran'-cour, mur'-mur (all in unaccented syllables. This sound is never accented).

20. ee: herd, erred, heard, bird, stirred, turn, blurred, word, colo-nel (sounded as ker'-nel). (All in accented syllables.)

One hundred and ninety spellings (not counting the French words) for twenty vowel-sounds.

The following is a list of all the words in which ei has the sound of e:conceive, perceive, deceive, receive (and their derivatives), ceiling, seize, either, neither, plebeian, weir, weird, seignory, inveigle, counterfeit. The words "either" and "neither" are by some persons sounded as ither and mither.

² Final r or re is not trilled in the Southern dialect as it is in the Northern. but is sounded as ?. Thus fair is sounded as fai-?, poor as poo-?, pour as pou-?, more as mau-2, spire as spi-2. But if the r is followed by a vowel, it retains and recovers its consonantal sound, as in the words fair-y, poor-est, spir-al, and a great many more.

167. Same spelling with different sounds.—We may now invert the process, and show how the same symbol (i.e. the same spelling) may be used to denote different sounds:—

a: cat, tall, many, made, care, want, steward.

a-e: rave, have, are.

ai: maid, said, plaid, aisle.

au: aunt, haunt, gauge, mauve, meer-schaum.

e: he, her, clerk, bed, pretty.

e-e: there, here.

ea: heat, steak, heart, head.

ei : vein, leisure, seize, sur-feit, height.

ey: they, key, eye.

ew: new, sew.

i-e: bite, niche, police.

ie: field, die, sieve.

0: hot, cold, wolf, women, whom, son, button, lost, hero.

o-e: cove, prove, love, move, shove.

oa: load, broad, cup-board.

oe: shoe, toe.

oo: hook, fool, brooch, flood, door.
ou: pour, young, thou, soup, soul.

ough: rough, hiceough, cough, hough, trough, bough, though, through.

al: fall, palm, shall, hospital. ol: cold, wolf, golf, sym'-bol.

ar: ar'-row, art, col-lar.

Section 3.—Consonants: Sounds, Symbols, and Spellings

168. Twenty - five Consonantal sounds. — In English as now spoken there are altogether twenty-five consonantal sounds. The symbols used to denote these sounds, if we place them as nearly as we can in the order of the alphabet, run as follows:—

1. b 4. g 7. k 10. n 2. d 5. h 8. l 11. p 3. f 6. j 9. m 12. r	14. t 17. y	20. ng 23. sh	g)
--	---------------	---------------	----

169. Simple and Compound.—Out of the twenty-five sounds enumerated above all are simple or uncompounded except two, viz. j and ch. These are called by Dr. Murray (in the Oxford Dictionary) "consonantal diphthongs," because he, with other phoneticians, has analysed ch into t+sh, and j into d+zh.

Though we have to accept this analysis not only on the word of the best authorities, but also on the testimony of our own experience, it would be very inconvenient to write tsh for ch, and dzh for j. Moreover, the two sounds in question are of such frequent occurrence in our language, that j and ch, even though the sounds are diphthongal, deserve a place in the list of our consonantal symbols.

170. Redundant consonants.—It has been said "that our alphabet contains four redundant consonants—c, j, q, x."

C is superfluous, because (1) when it precedes a, o, or u, it expresses the sound of k; (2) when it precedes e or i, it expresses the sound of s; (2) when it is combined with h, as in church, the digraph ch has been analysed into tsh.

J is superfluous, because it has been analysed into dzh.

Q is superfluous, because it is never used except in combination with u, and the combination can be expressed equally well by kw, as in awkward.

X is superfluous, because in such words as extra it is equivalent to ks, and in example to qz.

171. Main divisions of consonants.—The consonantal sounds can be classified according to the organ chiefly used in uttering them. Any part of our bodily structure that helps us to utter articulate sounds may be called an organ of speech. The chief organs are the tongue, the throat, the palate, the teeth, and the lips. By means of these organs the breath is modified as it passes through the larynx and comes out by the mouth.

The most important of all these organs is the tongue; for the loss of this organ involves the loss of articulate speech. Since the tongue is the necessary helpmate to the other four organs, there is no separate class of Lingual (Lat. lingua, tongue).

The main divisions of consonants are as follows:-

I. Gutturals (Lat. guttur, throat): k, g, ng (as in thing).

II. Palatals (Lat. palat-um, palate): ch, $j \mid sh$, $zh \mid y$, r. III. Dentals (Lat. dent-em, tooth): t, $d \mid s$, $z \mid n$, $l \mid \iota h (in)$,

IV. Labials (Lat. labi-um, lip): $p, b, m \mid f, v \mid wh, w$.

I. Gutturals: these three sounds are produced by raising the back of the tongue against the soft palate, viz. that part of the palate that lies farther back in the throat (Lat. guttur):—k, as in keen; g, as in good; ng, as in thing or fin-ger. The last, though expressed by a digraph, is as "simple" a sound as the other two. It occurs only when it is followed by another guttural, k or g, as in blan-ket, fin-ger, or when it comes at the end of a word, as in thing, riding. There is a great difference of sound between the n of fin-(ger) and the n of fin. The former is a guttural, which you cannot utter without opening your jaws; the latter a dental, which you utter with closed teeth.

II. Palatals: all these sounds are produced by raising the front of the tongue towards the hard palate, or palate proper (viz. that part of the palate that lies farther forward than the soft palate):—ch, as in chair; j, as in joke; sh, as in ship; zh, as in seizure; y, as in yield; r, as in rob. All of these are simple sounds with the exception of the

first two (§ 169).

III. Dentals: all these sounds are produced by bringing the point of the tongue towards the teeth or upper gums:— t, as in tail; d, as in dog; |s, as in seal; z, as in zeal; |n, as in name; |s, as in |s in breathe. In sounding the first pair, t and d, the point of the tongue touches the upper teeth. In sounding the second pair, s and z, it comes very near the roots of the upper teeth, but does not quite touch them. In sounding the third pair, n and l, it touches the upper gums. In sounding the fourth pair, th(ing) and th(is), it is placed between the upper and the lower teeth.

IV. Labials: all these sounds are produced by closing the lips:—p, as in poor; b, as in boon; m, as in moon; |f|, as in fox; v, as in vixen; |w|, as in whine; w, as in vine. In sounding p, b, and m the lips are closed against each other, while the tongue is left to rest on the lower jaw. In sounding f and v the edges of the upper teeth are pressed against the lower lip, while the tongue rests on the lower jaw. In sounding vh and v the lips are rounded with the corners drawn together, while the tongue is almost in the same position as in sounding vh ence v and v are liable to be interchanged, as in v ard (A.S. v eard), v guard (French spelling).

172. The Glottal "h" (Greek glottis, mouth of the windpipe). "Glottal" is the name given to the open throat-sound expressed by the letter h. In sounding h we make no use of the palate, tongue, teeth, or lips. It is a mere breath-sound or aspirate, and stands alone in our alphabet.

The uncertainty about sounding or not sounding this unfortunate letter appears to have arisen in some way from the collision between English and French, which resulted from the Norman Conquest. In Anglo-Saxon the h was very distinctly sounded; in French very indistinctly. This may perhaps help to account for the confusion.

173. Minor subdivisions of Consonants.—There are a few subdivisions of consonants, which cross with the four main divisions described above, and sometimes with one another.

Sibilants (Lat. *sibilant-es*, hissing). On account of the hissing sound which they express, the name "sibilant" has been given to the letters s, z, sh, and zh.

Liquids (Lat. *liquid-us*, flowing). This is the name given to the letters l, m, n, r, nq.

Nasals (Lat. nas-us, nose); the name given to the three letters n, m. ng. These are called nasals, because in forming the sounds which they express the breath passes up the nose-passage and escapes through the nostril. If the nose-passage is blocked by a cold, ng (a guttural) is

sounded almost as g (another guttural), n (a dental) almost as d (another dental), and m (a labial) almost as b (another labial).

Note.—When an intrusive consonant, i.e. one not belonging to the root, is inserted into a word, the intruder is usually of the same class as the consonant going before:—

Num-b-er (Lat. num-er-us); hum-b-le (Lat. hum-il-is); tender (Lat. ten-er); gen-d-er (Lat. gen-er-is). Observe the m and b are both labials, while the n and d are both dentals.

- 174. Spellings of the Consonantal sounds. We shall take each of the twenty-five sounds in the order in which their respective symbols are given in § 168:—
 - 1. **b**: bond (initial), ebb (final), buoy, cup-board.
 - 2. d: bond, ladder, called, horde, would.
- 3. **f**: felt, whiff, phlegm, laugh, half, often, sapphire, lieutenant (where ieu=ef).
 - 4. g: game, egg, ghost, guard.
 - 5. h: hot, who.
- 6. j: job, gist, George, judge, judgment, soldier, Greenwich, gaol.
- 7. **k**: kill, call, account, back, biscuit, quell, liquor, grotesque, ache, lough.
 - 8. 1: lake, kill, island, aisle, gazelle, seraglio, Woolwich.
- 9. m: mend, hammer, hymn, lamb, programme, phlegm, $\operatorname{Hampden}$, drachm.
- 10. n: pin, inn, deign, knee, gnaw, John, Lincoln, Wednesday, riband, borne, Anne, coigne.
 - 11. p: place, happy, steppe, Clapham, hiccough.
 - 12. r: rain, borrow, rhythm, write, Norwich.
- 13. s: self, kiss, dense, cell, dance, scene, coalesce, schism, quartz, sword, hasten, isthmus, psalm, crevasse.
- 14. t: wet, kettle, gazette, Thames, looked, two, debt, indict, receipt, yacht, caste.
 - 15. v: vest, have, navvy, of, nephew, halve.
 - 16. w: wine, when, suave, choir.
- 17. **y**: yield, union, hallelujah. French, vignette $(gn=ny)_0$ cotillon.
- 18. z: zeal, fizz, his, cleanse, scissors, Xerxes, furze, Wednesday, Chiswick, Windsor, venison, czar, business.

19. ch: church, niche, latch, nature, question, righteous, violoncello.

20. ng: thing, finger, tongue, handkerchief, Birmingham.

21. th(is): then, soothe.

22. th(ing): breath, Matthew.

23. sh: shall, Asia, tissue, pension, moustache, fuchsia, mission, fashion, officiate, social, ocean, conscience, schedule, vitiate, portion, luncheon, chaise.

24. zh: seizure, leisure, occasion, transition. Fr. rouge,

régime, jujube (sometimes sounded as jujube).

25. wh: while (often sounded merely as w, except in North Britain).

One hundred and sixty-six spellings (not counting the French words) for twenty-five different sounds.

175. Same spelling with different sounds:

c: violoncello, cat, city.

ch: ache, chaise, such, drachm (silent).

j: Jew, jujube, hallelujah.

ge: rouge, village, get.

gi: give, ginger.

ti: notion, question, transition.

S: has, gas.

SC: scene, scarce.

sch: scheme, schedule.

si: occasion, dispersion.

th: thin, this, Thames.

x: extra, example, Xerxes. Fr. beaux.

ph: nymph, nephew. gh: ahost, laugh, hough.

qu: liquor, queen.

176. Causes of discrepancies in spelling. — In the earliest form of English every simple sound was expressed by its own particular symbol, and no sound (with very few exceptions) had more than one symbol. The spelling therefore was in the main "phonetic." But the phonetic system was marred and eventually ruined (a) by the mixture of French words with English consequent on the Norman Conquest; (b) the disuse of marks to denote the

lengthening of vowels; (c) the loss of the Old English symbols x and x, which left the vowel a much more work to do than it had before; (d) changes in the pronunciation both of vowels and consonants,—changes that were seldom accompanied by a change of spelling; (e) the respelling of many of our words during the Revival of Learning (A.D. 1500–1600), so as to bring them more in accordance with the classical originals: thus vitailles was respelt as "victuals" (Lat. victus, food); dett as "debt" (Lat. debit-um); dout as "doubt" (Lat. dubit-are); sutil as "subtle" (Lat. subtil-is).

Exercise 43

- (a) 1. Distinguish between emphasis, accent, quantity. 2. Give two instances in which words, identical in spelling, are distinguished one from another by accent. 3. "A perfect alphabet would contain a separate letter to represent every simple or elementary sound." Show that the letter a in English represents several simple or elementary sounds. 4. What single letters in our alphabet represent compound sounds? 5. "Our alphabet contains four redundant letters—c, j, q, x." Discuss this statement. 6. Write two words of one syllable, in the first of which the letter i represents a pure vowel sound, and in the second a diphthongal sound. 7. How do you account for the fact that the spelling of English words is often at variance with their pronunciation? 8. Give one example under each of the following to show that in some words—
 - (i) The letter i represents a diphthongal sound.
 - (ii) The letter s is written where z is sounded.
 - (iii) A letter is not sounded at all.
- 9. State and illustrate the different sounds of the letter s. (Oxford and Cambridge Locals.)
- (b) 1. What consonants are redundant in the English alphabet, and in what respects is our alphabet defective in consonants? 2. The sound of a in hate is expressed in several different ways in written English (as in bait, may, whey, weight, gaol, gauge, etc.). Show that there are also several ways in which the sound of e in me is represented in writing. 3. Give four true Diphthongs,

four Liquids, four Sibilants, and four Labials. 4. Explain the terms letter, diphthong, Labial, Palatal. How many sounds has the combination ough? 5. Quote examples of English words containing ei or ie (four of each), and of verbs ending in ceed or cede (two of each). 6. What is a diphthong? Give six examples, all different, of so-called diphthongs which are not really diphthongs. 7. How many true diphthongs have we in the English language? Quote three words as examples of each of them. (College of Preceptors.)

CHAPTER XXXIV.—PECULIAR PLURALS: ORIGIN AND USES

- 177. Man, men, etc., see § 7 (i).—The eight Plurals there shown are called Mutation-plurals, because they are formed by a change or mutation of the inside vowel of the singular. Once there were many more such plurals than there are now. The original plural of man was "mann-is." The i in the ending -is had the effect of changing the a of mann or man into a sound more like itself; thus mann-is became menn-is. The effect of i in thus changing the preceding vowel is called Vowel-mutation in English and Umlaut in German. When the -is was dropped, nothing but the vowel-change was left to distinguish the Plural from the Singular. This Mutation-method became obsolete when the Anglo-Saxon system of grammar decayed.
- 178. Ox, oxen, etc., see § 7 (ii).—The four Plurals there shown are formed by a process that is now as obsolete as that of vowel-mutation (§ 177). In Old English -an (now written -en) was not less common as a Plural ending than -as (now written -es or -s). But -as or -es became much more common when the decay of Anglo-Saxon was setting in. Afterwards, when French influence had begun to work (about 200 years after the Norman Conquest), the French Plural in -s helped to drive the nail home, so that -s or -es became eventually the sign of the Plural for almost all our nouns.

179. Foreign Plurals.—We have some Plurals which have been borrowed direct from foreign nouns:—

Latin Plurals.—From -um (sing.) to -a (Plur.); addend-a, agend-a, dat-a, errat-a, strat-a, memorand-a (or memorand-ums).

From -us (Sing.) to -i (Plur.); alumn-i, fung-i, radi-i, geni-i

(or genius-es).

Other Latin Plurals are: genera (genus), stamina (stamen), indices (index), series (series), species (species), apparatus (apparatus).

Greek Plurals.—From -is (Sing.) to -es (Plur.): analyses, bases,

hypotheses, parentheses, oases.

From -on (Sing.) to -a (Plur.): phenomen-a, criteri-a.

Italian Plurals.—banditti (or bandits), dilettanti.

French Plurals: beaux, bureaux, chateaux, messieurs, mesdames.

Hebrew Plurals: cherubim (or cherubs), seraphim (or seraphs).

- 180. Nouns of Multitude.—These are a kind of Collective noun (§ 17) which have a plural sense, though they remain singular in form. See § 100, Rule IV.
 - The poultry (=fowls) are doing well. These cattle (=cows) are mine. These vermin (=insects, etc.) do much harm. These people (=persons) have returned home. (People, when preceded by a or used in the Plural number, as "a people," "peoples," signifies "nation.")
- 181. Some nouns, which take a Plural at ordinary times, use the Singular instead of the Plural to express some specific quantity or number:—
 - A twelve-month. A three-foot rule. An eight-day clock. A six-year-old horse. A fort-night (contraction of "fourteen-night"). Forty head of cattle. Twelve pound weight. Ten sail of the line. A six-penny piece.

Note.—Six-pence has a Collective sense denoting a single coin, which makes the noun appear to be Singular, so that we say a sixpence (Singular), sixpences (Plural). The latter is really a double Plural, the ce being a substitute for s.

182. Two forms of Plural, each with a separate meaning:—

PART V

Brot	ther Brothers,	sons of the same mother. members of the same society.
Cher	rub {Cherubim,	angels of a certain rank. images or models of a cherub.
Clot	h {Cloths,	kinds or pieces of cloth (Distributive). articles of dress (Collective).
Cow	Cows,	(There is no real difference, except that kine has now become archaic.)
Die	Dies,	stamps for coining (Distributive). small cubes used in games (Collective).
Folk	$\{ egin{array}{l} ext{Folks}, \ ext{Folks}. \end{array} $	men or persons, as "the old folk." nations (obsolete or very rare).
Gen	ius {Geniuses,	men of genius or talent. fabulous spirits of the air.
Inde	Indexes,	tables of contents.
Pea	Peas,	Common Noun, as "the pod contained 9 peas." Material Noun, as" pease pudding."
Pen	Pennies, Pence,	Material Noun, as "pease pudding." penny-pieces (Distributive). (Collective), as in "sixpence."
Staf	f Staves, Staffs,	sticks or poles. departments in the army.
Star	nen {Stamens, Stamina,	male organs of flowers. endurance, vigour, lit. threads.
Shot	Shot,	little balls discharged from a gun.

183. Different senses of Singular and Plural:—

Iron, a metal.

Singular. Plural. Advice, counsel. Advices, information. Air, atmosphere. Airs, demeanour. Ban, a curse (under a ban). Banns, announcement (banns of marriage.) Beef, flesh of ox. Beeves, cattle, bulls and cows. Compass, range or extent. Compasses, an instrument. Copper, a metal. Coppers, pennies, pence. Domino, a cape with a hood. Dominoes, the game so-called. Force, strength or energy. Forces, army. Good, benefit. Goods, movable property.

discharges; as, "He had two shots."

Irons, fetters made of iron.

Singular.
Physic, medicine.
Return, coming back.
Salt, seasoning substance.
Sand, pulverised rock.
Vapour, invisible steam.
Vesper, evening.
Water, the element.

Plural.
Physics, natural science.
Returns, statistics.
Salts, smelling salts.

Salts, smelling salts.
Sands, a tract of sandy land.
Vapours, dejection, low spirits.
Vespers, evening prayers.
Waters, springs, masses of

water, etc.

184. Two meanings in the Plural against one in the Singular:—

Singular. Plural. (1. Kinds of colour. Colours Colour. colour. 2. Flag of regiment 1. Habits. Customs Custom, habit. 2. Toll or tax. 1. Simple sub stances. simple substance. **Elements** 2. Rudiments Element, first principles of a subject. 1. Results. 2. Goods and chai Effect, result. Effects tels. 1. Of alphabet. 1. Of alphabet. Letters 2. Epistles. Letter. 2. Epistle. 3. Literature. (1. Modes, ways. Manners Manner, mode or way. 2. Behaviour. 1. As in counting Numbers Number. as in counting. 12. Poetry. (1. Sufferings. Pains Pain, suffering. 2. Trouble, care. (1. Portions. Parts Part, portion. 2. Abilities. (a statement or (1. Propositions. Premise. Premises. proposition. 2. Buildings. il. Fourth parts. Quarter, a fourth part. Quarters 2. Lodgings. (1. Things seen. Spectacle, anything seen. Spectacles 2. Eye-glasses.

185. Two meanings in the Singular against one in the Plural:—

Plural. Singular. (1. Wrong use. Abuse Abuses. wrong uses. 12. Reproaches. (1. Part of body. Foot Feet. parts of body. 2. Infantry. (1. A quadruped. Horse Horses, quadrupeds. 2. Cavalry. 1. Result. Issues. results. Issue 2. Offspring. (1. A lamp. Light Lights. lamps. 2. Radiance. (1. A nation. People Peoples, nations. 2. Persons. (1. A medicinal mix-Powder ture. Powders, medicinal mixtures. 2. Gunpowder. 1. Habitual act. 2. Professional con- Practices, habitual acts. nection. 1. A piece of rock. 2. Fourteen pounds, Stones, pieces of rock. Stone 1. A forest. Wood Woods. forests.

186. True Singulars used as Plurals.—By a "True Singular" we mean that the final s is part of the original Singular noun, and not a sign of the Plural.

2. Timber.

Such nouns, though Singular by etymology, are liable to be considered Plural on account of the final s; and all except the first of these named below are now always used as if they were Plural.

Summons (Fr. semonce).—This noun is still correctly used as a Singular; as "I received a summons to attend"; "This summons reached me to-day." The plural form is summonses.

Alms (A.S. xlmesse).—"He asked an alms" (New Testament).

But now the word is generally used as if it were Plural;
as, "I gave alms to the beggar, and for these he thanked
me."

- Eaves (A.S. efese).—The edge or lower borders of the roof of a house. The word is now always used as a Plural; as, "The eaves are not yet finished."
- Riches (Fr. richesse).—This too is really a Singular; as, "In one hour is so great riches come to naught" (New Testament); but now, on account of the final s, this noun is always used as a Plural; as, "Riches do not last for ever."
- Cherries (Mid. Eng. cheris): cf. Latin, ceras-us.—The s looked so like a Plural ending, that a Singular cherry was coined.
- Peas (A.S. pis-a, Singular).—When the a was lost, the final s looked like a Plural; so a Singular pea was coined.

The vaunting poets found nought worth a pease.—Spencer.

Of the bigness of a great peaze.—RALEIGH, Hist. World.

(Spelt with a z by Raleigh, because it was so pronounced.)

- 187. True Plurals used as Singulars.—In such nouns the final s is really a sign of the Plural:—
 - Amends.—This is sometimes used as a Singular and sometimes as a Plural: as, "An honourable amends" (ADDISON).
 - Means.—This is now almost always used as a Singular; as, "By this means."
 - News.—This is now almost always used as a Singular; as, "Ill news runs apace." Mid. Eng. new-es (plural); French nouvelles.
 - Innings.—This is a word used in cricket to denote the turn for going in and using the bat. It is always used as a Singular; as, "We have not yet had an innings"; "Our eleven beat the other by an innings and ten runs."
 - Gallows.—The framework from which criminals are hanged. This noun is used as a Singular; as, "They fixed up a gallows."
 - Odds.—A word used in betting to denote the difference of one wager against another. "We gave him a heavy odds against ourselves."
 - Sledge.—A respelling of sleds, plural of sled, which is still used in Canada for "sledge." This is always used as Singular.

CHAPTER XXXV.—GENDER OF NOUNS: ORIGIN AND HISTORY

188. Different Words for Masculine and Feminine: see § 9.—The origin of the words belonging to this list is given below:—

Bachelor, maid, spinster.—Late Lat. baccalarius, origin unknown. A.S. mægd-en, little maid (the -en being Diminutive). A.S. spinnestre, a woman who spins (the -estre denoting a female).

Boar, sow.—A.S. bár (male pig). A.S. sugu, sow. No

connection with "swine," A.S. swin.

Boy, girl.—Dutch boef, Frisian boi, boy. Old Low German gör, child, with diminutive suffix -l added to it; hence girl.

Brother, sister.—A.S. bróthor (cf. Lat. frater). A.S. seostor,

Norse systir; cf. Latin soror for sosor.

Buck, doe.—A.S. bucc-a, male fallow deer. A.S. dá, doe.

Bull, cow.—A.S. bull-uc, a bull-calf. A.S. cú, cow.

Bullock or steer, heifer.—A.S. bull-uc, as above. A.S. steór, steer; A.S. heáh-fore (lit. a high, i.e. full grown cow-calf).

Cock, hen.—A.S. cocc, of imitative origin. A.S. henn-e, hen. Colt or foal, filly.—A.S. colt, the young of any animal.

A.S. fol-a, male young; Norse fyl-ja, a female foal.

Duck, drake.—Middle Eng. duk-e, a bird that bobs the head (Feminine). A.S. ened-rake, end-rake. Perhaps the en of endrake became confounded with the Indefinite article an, leaving only drake. In A.S. ened means "duck." But Dr. Murray declares himself unable to ascertain the meaning of rake, though he has decided that it did not signify "lord" or "master," as is usually asserted. Rake is not a suffix, as has been stated.

Drone, bee.—A.S. drán, the hummer. A.S. beó, bí, bee.

Earl, countess,—A.S. eorl, a man. Old Fr. cont-esse, Fem. of "count."

Father, mother.—A.S. fæder, father. A.S. moder, mother.

Friar or monk, nun.—Old Fr. freire, brother (cf. Lat. frater). A.S. munec (Late Lat. monachus, one who lives alone). A.S. nunne, a nun or spiritual mother.

Gaffer, gammer.—The first is the short of Eng. grandfather; the second of Fr. grand-mere (grandmother).

Gander. goose.—A.S. gós, from the root gan-s, in which the

s is only a suffix. A.S. gan-d-ra, in which the ra is a suffix, and the d is an intruder, as in ten-der, Lat. ten-er.

Gentleman, lady.—Fr. gentil-homme, a well-born man. For lady, see below under Lord.

Hart, roe. - A.S. heort, hart. A.S. ráh, roe.

Horse, mare.—A.S. hors, a runner, courser. A.S. mere, mare. Husband, wife.—Norse hús-bóndi, house-occupier. A.S. wif, woman or female.

King, queen.—A.S. cyn-ing, one of noble kin. A.S. cwén, woman.

Lord, lady.—A.S. hláford = hláf-weard, loaf-keeper. A.S. hláf-dige, loaf-kneader.

Man, woman.—A.S. mann, person of either sex. A.S. wif-man, a female person.

Milter, spawner.—" Milter" means a fish with milt or milk. "Spawner" means a fish that scatters eggs. Old Fr. espandre, to scatter.

Nephew, niece.—Old Fr. neveu, Lat. nepot-em, a grandson. Old Fr. niece, Lat. neptis, grand-daughter or niece.

Ram or wether, ewe.—A.S. ram, a male sheep. A.S. wether, a yearling. A.S. eowu, a female sheep; cf. Lat. ov-is.

Sir, madam, or madame.—Fr. sire, Lat. senior, older. Fr. madame, Lat. mea domina, my lady.

Sire, dam.—Origin as above.

Son, daughter.—A.S. sunu, son. A.S. dóhtor, daughter.

Stag, hind.—Origin of "stag" unknown. Its derivation from A.S. stiq-an, to mount, is disputed. A.S. hind, female deer,

Uncle, aunt.—Fr. oncle, Lat. avunculus, a little grandfather. Old Fr. ante, Lat. amita, a father's sister.

189. Peculiar forms in "ess" or "-ss":

Abb-ess: Old Fr. ab-esse, Late Latin abbat-issa, the Fem. form of abbas, abbat-em, father.

Duch-ess: Old Fr. duc-esse, duch-esse; Lat. duc-em, leader.

Mistr-ess: Old Fr. maister-esse, Fem. form of maistre, master. "Miss" is a contraction of mistress.

Marchion-ess: Late Lat. marchion-issa, the stem of which is marchion-em, prefect of the marches or border.

Murder-er, murder-ess.—The stem of both is murder; the former has A.S. suffix -ere, which denotes a male agent; the latter the French suffix -esse, which denotes a female agent.

Sorcer-er, sorcer-ess.—Parallel to the above. The stem of both is sorcer, from Old Fr. sorc-ier, Lat. sort-iarius.

Songster, songstress.—Originally the -ster of "song-ster" denoted a Feminine. When the Fem. force of -ster had been forgotten, the final er appeared to signify a male, as in "murder-er," "sorcer-er." So the er was changed to -ess, to form a Feminine.

Empr-ess, govern-ess, nur-se.—In these three words the suffix is from Lat. -icem, not -issa or -esse: imperatr-icem, gubernatr-icem, nutr-icem.

Lad, lass.—It used to be said that *lad* and *lass* were from the Welsh *llawd* and *llodes*. But this is now abandoned. No one knows the etymology of either word. It has been suggested that *lad* may mean "one led," Middle English *lad*, pp. of *led-en*, to lead.

190. Other peculiar endings :-

Widow-er, widow.—The older forms were "widuw-a" (Masc.) and "widuw-e" (Fem.). To make the difference more distinct, the -a of the Masc. was displaced by the suffix -ere or $-\epsilon r$, denoting a male agent as in "murder-er," "sorcer-er."

Wizard, witch.—"Witch" was not long ago of the Common gender: "Your honour is a witch."—Scott. "Wizard" wittish-ard, Old Fr. wisch-ard or quisc-art, sagacjous,

Sultan, sultan-a.—The final a is an Italian feminine form.

Bride-groom, bride: A.S. bryd, a bride. To give this stem a masculine sense A.S. guma (male) was added; in modern Eng. the r of "groom" is an intruder.

Fox, vixen: A.S. fox, a fox. A.S. fyx-en, Middle English fix-en, vixen, a female fox; the final -en being a Fem. suffix. The o of fox was changed to y or i by the laws of Mutation or Umlaut described in § 177.

CHAPTER XXXVI.—ORIGIN AND USE OF CERTAIN ENDINGS

191. The following is an alphabetical list or glossary of certain endings, the origin and use of which are considered more especially worthy of attention:—

-ar (1): A.S. -ere (person, agent): li-ar (for li-er).

- -ar (2): Lat. -aris, -arium, -arius: schol-ar, cell-ar, vic-ar.
- -ble: Lat. plex (fold): dou-ble. Also Lat. -bilis: fee-ble, dura-ble.
- -d (1).—Sign of the Past Participle of Weak verbs. In A.S. this was -t or -d. Cf. Latin "ama-t-us," Gr. "Chris-t-os," Christ "anointed."
- -d (2).—Sign of the Past tense of Weak verbs. A.S. -de, -te, or -the. No connection at all with the preceding. But when the final e was lost, nothing was left to keep them distinct.

'em, as in "kill 'em." From A.S. hem, "them," with the h omitted.

- -en (1), Teutonic: A.S. -en. Seven uses have been served by this suffix:—(a) diminutive, maid-en; (b) feminine, vix-en; (c) agent, hav-en, that which holds or has; (d) plural, ox-en; (e) passive Part., beat-en; (f) quality, wood-en; (g) Trans. verb, dark-en, to make dark.
- -en (2), Teutonic. Obsolete Infinitive ending, of which we see examples in-

In peace may pass-en Lethe lake.—Spenser.

Thinks all is writ he speak-en can.—Shakespeare.

The soil that erst so seemly was to see-n.—Sackville.

The Simple or Noun-Infinitive in A.S. had no "to" before it, and ended in -an, which in Mid. Eng. became -en; the -en being eventually dropped. What we now call the Gerundial or Qualifying Infinitive always had "to" before it in A.S. and ended in -anne or -enne; as to bind-enne, "to bind," "for binding." Here to is simply the preposition "to." The ending -enne was gradually reduced to -en and eventually disappeared like the ·en of the Simple Infinitive.

Meanwhile the Simple Infinitive, in compensation for the loss of its ending -en, took to itself the preposition "to" borrowed from the Gerundial Infinitive. Thenceforth the two Infinitives became undistinguishable in form. But they still differ very widely in sense. See §§ 101-103.

Note.—It is a very great mistake to suppose that the old ending -enne or -en has reappeared in modern Eng. in the form of -ing; and that hence "bind-ing" is a form of Infinitive. A correct explanation of -ing is given under -ing. See also footnote to p. 106.

-en (3): Latin -enus: ali-enus, ali-en.

-er (1) Teutonic.—Three uses are served by this suffix:—(a) A.S. -ere, agent; rid-er, robb-er: (b) A.S. -ira, -ra, Comparative suffix: hott-er; (c) A.S. -er, Frequentative suffix: chatt-er.

-er (2), Romanic.—Two uses are served by this suffix:—(1) Lat. -arius or -ator, agent: arch-er (arc-arius), lev-er (lev-ator);

(2) French Infinitive -re: rend-er (Fr. rend-re).

-eth: sign of 3rd Sing. Pres. (older form). See below, s (c)

-ies: Plural ending of Singulars in y. An older form of the

Singular ending was -ie: as citie, cities.

-ing (1).—The Suffix used for forming abstract nouns from verb-stems. A.S. -ing, or more usually -ung. Thus "writ-ing" or "writ-ung" (writing) was a pure noun; as "the writing of letters." (Very erroneously this -ing has been supposed to be an Infinitive ending for -en (2). It has even been called the "Flexional Infinitive." This is purely fictitious, devoid of all historical warrant.)

-ing (2).—The Suffix now used for forming the Present Participle of verbs: a corruption of A.S. inde, and therefore entirely distinct from -ing (1). At the end of a word -ing is more easily sounded than -ind, and so the latter was ousted (1350 A.D.).

See § 107.

Note.—What we now call a Gerund is merely a confusion between -ing (1) and -ing (2). When we leave out the "of" which ought to follow the verbal noun -ing (1), and give it all the participial forms, Past and Present, Active and Passive, of -ing (2), we call this thing a Gerund. The Gerund began to appear about 1500 A.D.

-ish (1), Teutonic: A.S. -isc: pal-ish, woman-ish, peev-ish.

-ish (2), Romanic: Verb-suffix from Lat. -esc, Fr. -iss: pun-ish.

-le (1), Teutonic: two chief uses—(a) Diminutive nouns, as

freck-le; (b) Frequentative verbs, as crumb-le.

-le or -el (2), Romanic: Diminutive nouns: mod-el, circ-le.

-ling (1: A.S. -el, -ing, double Dim., as dar-ling: (2) A.S. -linga or -lunga, adverbial suffix, as dark-ling.

-ly Teutonic.—Two purposes served by this suffix:—(a) A.S. lic (like); for forming adjectives; chiefly added to nouns; as god-ly (god-like), man-ly (man-like): sometimes added to adjectives; as clean-ly, good-ly; (b) A.S. lic-e (adverbial form of lic); for forming adverbs; as tru-ly, rough-ly. This adverbial suffix is sometimes added to Participles, as knowing-ly, learned-ly.

- -on (1), Teutonic: as wag-on, wai-n.
- -on (2), Romanic: two uses—(a) agent, patr-on; (b) augmentative, milli-on.
 - -on (3), Greek: phenomen-on, criteri-on.
 - -or (1), Teutonic.—A.S. -ere (male agent): sail-or.
- -or (2), Romanic: appears in three different characters:—(a) Agent, as mot-or (Lat.-or), emper-or (Lat.-ator); (b) Abstract: err-or (Lat.-or); (c) Lat. compar.: super-i-or, exter-i-or.
- -s: There are three uses served by the inflection s. (a) Sign of the Plural. In A.S. the form was -as, which in Middle English became -es (see § 178). Now the e is omitted, except after nouns ending in ch, s, x or sh; as march-es, glass-es, box-es, bush-es. (b) Sign of the Genitive. In A.S. this was es; but now the e is elided and an apostrophe put in its place. In the Tudor period the es is occasionally seen:—

Larger than the monnes sphere.—Mid. Night's Dream, ii. 1. In A.S. certain Feminines did not take this inflection; hence the contrast between Lord's day and Lady day, Wednesday (Woden's day) and Friday (Freia's day). (c) Sign of the 3rd pers. Sing. Present tense. In A.S. this was -eth or -th. The form -eth is now used only in poetry. The th has become s, on the principle that one dental (voiceless) has been substituted for another dental that is also voiceless. See § 159, III, and § 171, III.

-ther: A.S. -ther. Three uses served by this suffix:—(a) Comparative, as in fur-ther; (b) Agent, as in mo-ther; (c) Adverbias as in hi-ther.

-ves.—Plural ending of nouns whose Singular ends in f or fe. The letter f, when placed between two vowels, as in "wives," is more easily sounded as v, and was so sounded in A.S.

-y (1), Teutonic.—Serves three purposes:—(a) Dimin., as dadd-y; (b) Adjective, as might-y; (c) Verb, as ferr-y, the Causal form of "fare"; see § 62a, p. 52.

-y (2), Romanic.—Serves two purposes:—(a) for -atus, as deput-y, one who is deputed; jur-y, one who is sworn; (b) for -ia, -ium, -ies; as famil-y, stud-y, progen-y.

-y (3), Greek: for -ia, as energ-y.

CHAPTER XXXVII.—ORIGIN AND HISTORY OF CERTAIN WORDS

192. This chapter consists of an alphabetical list or glossary of certain words in common grammatical use, whose origin and history are more especially worthy of attention.

A (1), an, any, one, only, once.—All based upon A.S. an "one." "Any" is A.S. &n-ig. "One" was so spelt in A.D. 1500 to make it look more like Lat. un-us, with which, however, it has no connection in origin. "Only" is A.S. án-lic (one-like). "Once" is A.S. án-es (of one), Adv. Genitive (§ 149). "A" is merely a contraction of an.

A (2).—Disguised preposition ($\S 55a$); as "four a (on) day." Ago: A.S. á-gán (agone, agon, ago), Past Part. of "go";

looking back from time present to time gone or past.

Am, is, are.—The verb "to be" is a patchwork of three separate roots, (1) -es, (2) -wes, (3) beó. "Am," "is," "are" are all from the first. "Am" is A.S. eam for es-m: cf. Latin su-m, Gr. es-mi. "Is" is A.S. is for es, es-t: cf. Latin est, Gr. es-ti, German ist. "Are" is from ar-on, northern dialect, the s being changed to r.

As, a contraction of also (all so), A.S. eal-swá.

Aught, A.S. á-wiht, one whit.

Aye (1), yes. Apparently a corruption of yea, A.S. geá.

Aye (2), ever: A.S. áwa; cf. Latin æv-um, an age.

Bad, worse, worst.—A patchwork of two roots. is from A.S. bæd-el, an effeminate man. "Wor-se" is A.S. wyr-sa, in which -sa is the original Comparative suffix for -ra. "Wor-st" is from A.S. wyrr-est, Superlative of wyr.

Be, been, being.—All these are based on the third root named under am. "We be twelve brethren."-Old Testament. The n of "been" is the regular participial ending of Strong verbs.

Breeks, breeches.—These are two forms or spellings of the same plural. This plural is a double one, made up (1) of A.S. bréc, plural of bróc, as "feet," "foot," by vowel-mutation, see § 177; (2) the superadded plural ending -s or -es.

But, A.S. bútan from be, "by," and útan, "out."
Can, could.—"Could" (in which the l is an intruder in

imitation of should, would) is from A.S. cu-the, past tense of the Weak conjugation. Hence "un-couth," literally "unknown," "strange." There is no such word as can-s in the Present tense, because can was originally the Past tense of a verb, which had lost its Present form even in A.S. and gradually acquired a Present sense.

Dare, durst.—The root is dars, hence Past tense dors-te, "durst." The Pres. has the form of dare, A.S. dearr, because the final s of dars was changed to r.

Deer: A.S. deór. In A.S. it was of the Neuter gender, and Neuters of a certain class had no Plural inflection. Hence in Eng. too the form of the Plural is the same as that of the Singular.

Do, did: A.S. dó (Pres.), dy-de (Past). The latter is believed by some to be a reduplicated Past, like Latin pell-o, pe-pul-i. But this is doubtful. The -de of -dy-de might be merely the regular ending of the Past tense in Weak verbs; see above -d (2), p. 221.

Dozen: Old Fr. dos-aine, Latin duo-decim, two +ten.

During.—Properly the Pres. Part. of the verb dure or endure, to continue. "During this week" was originally "this week during or enduring," absolute construction. By an inversion of the order of the words, "during" has assumed the status of a preposition.

Each: A.S. \(\delta lc\), contraction of \(\delta - ge - lic\), ever like, all alike.

Eight: A.S. eah-ta, Lat. oc-to. Medial h in A.S. was sounded almost as c or k. In modern Eng. this letter passed into gh, which in many words became silent.

Either: A.S. &g-ther, contraction of á-gi-hwæther, "ever

which of two." The negative form is neither.

Eleven: A.S. end-lufon, Gothic ain-lif, where ain means "one," and lif means "over," "left." So "eleven" literally means "ten and one over."

Enough: A.S. ge-nóh or ge-nóg, Mid. Eng. i-nóh or e-nógh.

Ere: A.S. &r; hence early from &r-lic.

Every: A.S. &fre, ever, and &fe, each. In Mid. English it was ever-ich. The ch became eventually silent, and was dropped.

Evil: A.S. yfel. No connection with ill. See Ill below.

Except: Lat. except-us, excepted. "God and his son except."—MILITON. Here except is a participle, formed direct from except-us; and the construction is absolute. By an inversion of the order of the words except has become a preposition; cf. During.

Far, farther, farthest.—In A.S. the forms were feor, fyr-ra, fyrr-est. But the analogy of fore, fur-ther, fur-thest was too strong, and so the original forms have been superseded.

First.—This is the regular and oldest Superlative of fore. A.S. fore (Posit.), fyrst (Superlative for for-ist, for-est). The obecame y by Mutation of Umlaut, through the effect of the vowel i in the suffix -ist. See § 177. Cf. fix, fyxen in § 190.

Fore, former, foremost: A.S. fore, standing in front. The Comp. "former" was not seen before the sixteenth century. It comes from an old Superlative for-ma, to which the Comparative suffix -er has been added, making for-m-er. "Foremost" is also modern, and comes from for-ma +est; it has therefore two Superlat. suffixes, -ma and -est.

Forth, further, furthest.—These are duplicates or doublets of the preceding. But the real Positive is "fore," not "forth." The latter is merely an extension of A.S. fore. The real Compar.

and Superl. are fur-ther, fur-thest, not furth-er, furth-est.

Good, better, best.—A patchwork. "Good" is merely a respelling of A.S. gód, good. "Better," "best" are from a root bat, the base of the verb batt-en, to feed or make fat; allied to boot, profit.

Have, had: A.S. habb-an. In the Past tense had-ae the

radical b was dropped.

Her: A.S. hire, in which hi was the base, and -re was a sign of the Genitive and the Dative cases. Thus in Mod. Eng. (as hire in A.S.) her stands for three cases, Genitive, Accusative, and Dative.

Hers.—A double Genitive: he-r-s. For the Genitive r see Her. Compare "ours," "yours," "theirs."

Hight: A.S. $h\acute{e}ht$, Reduplicated Past tense of $h\acute{a}t$ -an, to call. The only certain instance of a Reduplicated Past in English. This is clearly reduplicated, since the h is repeated. See remarks under **Do**.

Him: A.S. him. The m (attached to the base hi) was in A.S. the regular form of the Dative case; cf. who-m. The old Accusative was hine, hi-ne, which has survived only in the colloquial form 'un: "I saw 'un" = I saw hine, the h being silent.

His (1): A.S. his. The s (attached to the base hi) is the regular sign of the Genitive.

His (2): as in "Jesus Christ his sake." In such phrases (on account of the uncertainty of the letter h) his has been written

for is. The participle is or his was written as a separate word after foreign proper names merely as a sign of the Genitive case, because such names could not be regularly declined.

Hisn.—A form used only by peasants. The *n* in A.S. was a regular sign of the Genitive: cf. *mine*, *thine*. Hence *hisn* is a double Genitive. Cf. *ourn*, *yourn*, still used by rustics in southern counties.

I: A.S. ic, which in Mid. Eng. became ich. A Somersetshire peasant in Shakespeare is made to say, "Ch'ill (=ich will, I will) pick your teeth."— $King\ Lear$, iv. 6.

Ill: Northern dialect illr. No connection with "evil."

Is: 3rd pers. Sing. of "am." See Am.

It, its.—"It" is from A.S. hit, the h being omitted: Neuter gender of "he"; cf. Latin "i-d." In A.S. his was the Genitive form for the Neuter as well as the Masculine. "Its" occurs only once in the Translation of the Bible printed in 1611 (Lev. xxv. 5), and only three times in Milton's poetry. In Dryden's time it is thoroughly established. "Its" is written without the apostrophe, because no such form as "it-es" ever existed.

Let (1): A.S. l&t-an, to permit. The two verbs are quite distinct, though now spelt alike.

Little, less, least.—A patchwork from two distinct roots. "Little" is from A.S. lyt, lyt-el; the -el is Diminutive. The Comp. and Superl. are from the root lxs, adverb, as shown in the next line.

Less: A.S. *læs-sa* (Comparative of *læs*), in which the *-sa* is the original form of Comp. suffix that preceded *-ra* (*-er*). So *læs-sa* became simply *less*. "Lesser" is a double Comparative, and modern.

Least: A.S. *læs-st*, Superlative of *læs*.

Many.—Either (a) adjective, A.S. manig; or (b) noun, A.S. manigu or menigu, multitude. The "of" is usually omitted after (b) the noun; as "a great many (of) men," a large number of men.

May, might.—"May" is from A.S. mæg, as "day" is from "dæg," the g being changed to y. "Might" is A.S. meah-te, Weak Past tense. There is no such form as "may-s" in 3rd Sing. Pres. for the reason given under Can.

Methinks.—See Think below.

Million: Lat. mille. The -on is augmentative: a big thousand, a thousand which is a big number.

Mine: A.S. min. The n was a sign of the Genitive case. Hence in the south of England we hear the working classes say

hisn, ourn, yourn.

More, most.—These have no connection either with "many" or "much," though they have been tacked on to them to furnish Comparative and Superlative forms. "More" is from A.S. ma-ra. "Most" is from A.S. mix-st. The base of both is má.

Much or mickle: A.S. myc, myc-el. The -el is Diminutive.

Must: A.S. mós-te, for mót-te. Weak Past tense of the verb mót-an. This verb has survived in the almost obsolete phrase, "So mote it be," so may it be.

My.—Merely a contraction of A.S. min, mine. Compare indef. article a, which is merely a contraction of A.S. an, one. The final n has been cut off before consonants merely to make

the pronunciation easier.

Near, nearer.—"Near," though now considered a Positive adjective, and used sometimes as a Preposition, was originally a Comparative, A.S. neáh-ra, of which "nigh-er" is merely a modern spelling. "Near" has a Comparative force in—

The near in blood, the nearer bloody.—Macbeth, ii. 3.

Next.—Merely another spelling of nigh-est; A.S. $n\ell h\text{-}st$. In A.S. the medial h was sounded almost as c or k. Hence $n\ell h\text{-}st$ is now spelt as "next." See § 159, III.

Nigh: A.S. neáh, or néh, as shown already. For A.S. neáh or néh, neáh-ra, néhst, we have now substituted near, nearer, nearest.

Not, naught.—"Not" is merely a more rapid pronunciation of "naught"; since \check{o} is the short sound of au; see § 163, under O. "Naught" is a modern spelling of A.S. $n\acute{a}wiht$: see Aught.

Notwithstanding.—Properly two words, "not withstanding," not preventing, not standing in the way. "Notwithstanding these facts" was originally "these facts not withstanding"; absolute construction. By a change of order "notwithstanding" has now assumed the status of a preposition. Cf. During, Except.

One, only. See A (1).

Or.—Contraction of Middle Eng. outher or auther, A.S. áhwæther. "Or" is not a contraction of "other," nor a doublet of "either." In A.S. áhwæther, á means "one" and hwæther "which of two."

Often: A.S. oft; Middle English ofte. Final n is an intruder.

Other: A.S. *6-ther*, which at first meant "second." It is a Comparative adjective, and *-ther* is a Comparative suffix. Cf. Latin *al-ter*: and see **Far**, **Forth.**

Ought: A.S. áh-te, he owed. "You ought him a thousand pound."—Shakespeare, 1 Henry II, iii. 3.

Our, ours: A.S. 'ure, 'ures. The r is one sign of the Genitive, and the s is another. So ours is a double Genitive.

Out, utter, uttermost: A.S. úte or útan, útor, útema or útemest. "Uttermost" is merely a respelling or rather misspelling of útemest.

Own: A.S. *ágen*, possessed or owned. Strong form of Past Part.

Past.—A participle, originally absolute, which by change of position became a preposition. "Half past four"=half, four (having) passed. Compare **Except, During, Notwithstanding.**

Pending.—Similar to the above. Pending notice=notice pending, expected but not yet come.

Prithee: for "I pray thee."

CH. XXXVII

Quoth: A.S. cweth, Strong Past of A.S. cweth-an, to say.

Rather.—Comparative of rathe, "early." A.S. hræth, quick.

Save.—An adjective (Lat. salvus, Fr. sauf) which through change of position has become a preposition: "all save one" = all, one being safe or reserved. See above, Pending, During, etc.

Score.—Used in English for either Sing, or Plur. In A.S. scor-a was Plural only. Original meaning "notch" cut in a stick called tally.

Our forefathers had no other books but the score and the tally. Shakespeare, 2 Henry VI, iv. 7.

Second: Lat. secund-us. It superseded A.S. other, which at first meant "second," but eventually acquired a different sense.

Self: A.S. self or silf, signifying "same," "identical"; as in self-same. Observe then that in A.S. self was an adjective, not a noun. As an adjective it was put after the pronoun in the same number and case. Hence we find such forms as ic selfa (Nom.), min selfes (Gen.), mé selfum (Dative), mec selfne (Acc.). In the Mod. period self acquired the status of a noun, with a plural selves, like "shelf, shelves." So we get the forms myself, thyself.

herself, ourselves, yourselves, where the noun "self," or "selves," is qualified by a Possessive adjective. In himself the word "self" is still an adjective. In themselves there is a confusion between "self" as noun and "self" as adjective. In strict grammar it should be either themself or theirselves. The latter is common among peasants in the southern counties of England.

Shall, should: A.S. sceal or scal (Pres.), scol-de (Past). There is no such form as shall-s, because shall belongs to the same class of irregular verb as can, may. On sc changed to sh

see p. 196, and observe the change of scó to shoe.

She.—Not from the A.S. seo, as has been asserted, but from the Midland sck. which in modern English has been regularly respelt as "she." (Sch occurs in the last two chapters of the Old English Chronicle that were written in the Mercian or Midland dialect.) For change of sc to sh see p. 196, as before.

Sheep: A.S. sceáp or scép. Plural the same as Singular, for the same reason as that stated under Deer. See p. 196, as before.

Since.—So spelt for sins: contraction of Mid. Eng. sithens (now almost obsolete), in which the final s is the Genitive adverbial suffix: cf. alway-s. See § 149. "Sithen" is from A.S. sith thám, after that.

Some: A.S. sum.

Such: A.S. swylc, from swá (so) and lc (like). Hence the modern phrase "suchlike" is pleonastic.

Swine: A.S. swin, pig. Plural the same as Singular for the reason stated under Deer.

Than, then: A.S. thænne or thonne. No distinction was made between than and then before the modern period. In Shakespeare we have than in the sense of "then" rhyming with "began"—

> And their ranks began To break upon the galled shore and than Retire again.—Rape of Lucrece.

That: A.S. thæt, thæ-t. The t is a mark of the Neuter: cf. i-t, Lat. i-d, illu-d, quo-d.

The (1), Def. Article: A.S. the: used in A.S. not for the Def. Article, but for an indeclinable Relative. In A.S. the Def. Article in the Nom. Case was sé (Masc.), seó (Fem.), and thæ (Neuter).

The (2), Adverb used with Comparatives: A.S. thý, Instrumental Case of the Demonstrative pronoun. See § 40 (b).

Their, theirs: Northern dialect their-ra. The s is a sign of the Genitive, and -ra was another such sign. So "theirs" is a double Genitive.

Them: A.S. thám, thá-m, Dative case: cf. hi-m, who-m.

These, those: A.S. thás, thás. No difference between them in A.S. Both were plurals of the same Singular. The distinction is modern.

They: Northern dialect their, thei.

CH. XXXVII

Thine, thy: A.S. thin, in which n is a sign of the Genitive. "Thy" is merely a contraction of "thine." See remarks under My, mine.

Think (1): A.S. thenc-an, to think or reflect.

Think (2), in "me-thinks"; A.S. thync-an, to seem. See § 85.

This: A.S. thes (Masc.), theós (Fem.), this (Neuter).

To wit: A.S. to wit-enne, "for knowing"; Gerundial or Qualifying Infinitive. On the loss of -enne see -en (2), p. 221.

Twelve: A.S. twá-lif, i.e. ten and two (twá) left (lif), or "two over." Compare the etymology of Eleven.

Unless.—Formerly written "on lesse that" i.e. on a less supposition than, if not. Here un stands for the prep. on. For the origin of "less" see Less.

Was, wast, were.—All these are based on the root wes, one of the three roots out of which the verb "to be" is conjugated (see Am). "Was" is A.S. wæs. "Were" is A.S. wær-on, in which an r has been substituted for s, as in ar-t for as-t.

What: A.S. hwat, Neuter of hwá. Hwa-t; cf. Lat. quo-d.

Which: A.S. hwile, short for hwi-lie, why like.

Who, whose, whom: A.S. hwá, hwæ-s (Gen.), hwæ-m (Dative).

Whole.—An ill-spelt doublet of hale, A.S. hál, sound.

Why: A.S. hwi, Instrumental case of hwa.

Will, would.—"Would" is A.S. wol-de, where -de is the correct regular ending of the Past tense in the Weak conjugation. In won't we have wol not, wol being another form of the root: cf. Latin vol-o, vol-untary. Will is from A.S. will-an.

Wont (accustomed): A.S. wun-od, pp. of A.S. wun-ian, to remain. Wont-ed=won-d-ed, with two participal endings.

Worse. See Bad.

Worth, as in "Woe worth the day," i.e. Woe befall the day. "Worth" is all that remains of A.S. weorth-an, to become, once very widely used.

Wot, wist: A.S. wát (Pres. tense), wis-te (Past tense). The root of the verb is wit, which in the Past is changed to wis. The only form of this verb that is now much used is the Infin. "to wit."

Yclept: A.S. ge-clipod, called. The ge prefix had become y. You, your, yours: A.S. eów, eów-er, -eów-r-es. The last is a double Genitive: cf. ou-r-s, thei-r-s.

Exercise 44

(a) 1. Write short notes on the forms—kine, riches, children. 2. Why is the parsing of words in the English of to-day more difficult than in the older forms of the language? 3. What is case? What case-forms are found in English? Give two examples of each. 4. State what you know about the history of the changes that have taken place in the inflection of (a) the Present Participle, (b) the Past Participle, (c) the Infinitive mood in English. Parse and account for the form do in "I can do it." 5. Give instances of obsolete ways of forming the plural of nouns in English. How was it that they became obsolete? 6. Mention three nouns of which the plural form has a different meaning from that of the singular. 7. Write short notes on the wordsvixen, drake, nearer. 8. Show that our language possesses inflections which mark (1) gender, (2) number. 9. Give examples of English Past Participles which are formed by obsolete processes. Comment on the forms of the Past Participles-done, drunk, beaten, made, wrought, bereft. 10. Write notes on the history of myself, his, hers, every, which; and state the conditions under which the last two are now used. 11. Mention four Common nouns which have been derived from names of persons or places. 12. Give the usual adverbial suffix by which adjectives are turned into adverbs (a) in Old English, (b) at the present time. Explain by notes on the words—seldom, hither, once, asleep, to-morrow in what other ways adverbs are made, 13. Enumerate with examples the several grammatical uses served by the inflection s. Write notes on the history of any two of them. 14. Name the chief Indefinite and Distributive adjectives; and in the case of any three of them point out what changes they have undergone in meaning and form. 15. Write down examples of all the suffixes that give a negative or contrary meaning to a word. 16. What is a diphthong? From the following words make a list of those which contain true diphthongs:—aunt, build, buoy, eye, few, fought, gaol, powder, seat, soul, suit. 17. Explain how the function of a Relative pronoun in a sentence differs from that of a Personal pronoun. State what you know about the history of the Relative pronouns what and which, and parse what in the sentences "I am what I am," and "I did not repeat what you said." 18. State and illustrate the uses of the verb to be. Comment on the history of the forms am, is, are, was. 19. Give examples of the employment of the suffix -en in the formation of Nouns, Adjectives, and Verbs, and state the force of the suffix in each case. (Cambridge, Junior and Senior.)

- (b) 1. Note anything remarkable in the formation of the following words:—any, could, first, every, naught, next, least, ought, prithee, methinks. 2. Account for the selection of the suffix which is in common use for forming the plural of English nouns. 3. Describe the several ways of indicating gender in English nouns. Explain the origin of the following forms:—executrix, duchess, sir, woman, drake, widower, daughter. 4. Classify conjunctions according to (a) their use, (b) their origin. Give an example of each class. 5. Explain with examples the terms—Root, Stem, Primary Derivative, Secondary Derivative. 6. Give the derivation of eleven and twelve. 7. Give the rules for the division of words into syllables. Divide, stating the reason in each case—tablet, table, counter (noun), counteract. 8. "Pronouns have more traces of old forms than other parts of speech." Briefly justify this statement, and give examples. 9. What was the origin of the verbals in -ing? In what ways are they used? (Oxford, Junior and Senior.)
- (c) 1. Account for the contradictory forms—Lord's day and Lady-day; Wednesday and Friday. 2. Write the plurals of alkali, shelf, attorney, Percy, alms, gallows, man-servant, logic, trout, cloth; and the plurals of any six foreign words in common use. 3. State the different ways of forming adverbs in English. 4. State what you know about the forms—worse, further, better, next, and uttermost. 5. Annotate the following words:—drake, bridegroom, gender, bachelor, spider. 6. What is meant by the plural of a noun? Write the plurals of memorandum, journey, folio, sow, cow, axis, salmon, cloth, James, Miss Williams. 7. Write down four nouns which have double plurals, and point out the difference of meaning in the two forms. 8. State what

you know about the following words:—filly, goose, lady, wizard, sir. 9. Comment on any peculiarities that exist in the following words:—vixen, Thursday, Friday, other, worst, next, rather, nethermost. 10. Give the derivation and meaning of each of the following words:—whilom, methinks, egotism, pea, perchance, forgive, untoward. 11. Comment upon any peculiarities that exist in the following words:—pease, riches, Lady-day, least, farthing, needs, darkling. 12. Write the plurals of ox, potato, chimney, Henry, penny, die, dye, lord-lieutenant, aide-de-camp, beau, portmanteau, brother. (Preceptors', Second and First Class.)

(d) 1. Give the derivations of whilom, why, than, neutralise, whole. 2. State what you know about the words—worse, less, rather, midmost, children. 3. Give the rule for the formation of the plural of nouns ending in y. Write the plurals of joy, journey, difficulty, colloquy. Also of chief, staff, quarto, die, cloth. 4. Quote four nouns which in appearance are plural, but are in reality singular, and give the derivation of each. 5. Account for the omission of w in the pronunciation of whole. 6. Account for the doubled consonant in—accommodate, assessor, corroborate, innate, innocuous, intelligent, pellucid, hotter, witty. 7. What is notable in the spelling or formation of could, imbecility, opaque, connection, secrecy, colonelcy? 8. Point out the force of the prefix in undismayed, mislay, behind, forgive, withstand, prefix, extravagant, postpone, superscription, anarchy, epigram, perimeter. (Preceptors', Second and First Class.)

INDEX OF SUBJECTS AND SELECTED WORDS

The references are to pages

" A," " an," when used, 22, 23 origin, 224 Absolute construction : with participle, 89 with Infinitive, 89 Abstract noun, defined, 16 how formed, 17, 18 used as Proper noun, 19 used as Common noun, 19, 20 suffixes, 181, 182 Accent, 197, 198 Accusative case, parsing of, 90, 91 Active, voice, described, 56 in form, not in sense, 62 Adjective, described, 2 kinds of, 21, 22, 23 how formed, 23, 24 comparison of, 25, 26, 27 incapable of comparison, 25 parsing of, 94 two uses of, 95 Adjective-clause, 132 Adjective-compounds, 176 Adjective-forming suffixes, 183, 184Adjuncts, 140 Adverb, described, 3, 4 kinds of, 36, 37 comparison of, 38 forms of, 38, 39, 40 parsing of, 107, 108 two uses of, 107, 108 object to preposition, 45 Adverb-clause, 133, 134 Adverb-compounds, 177 Adverb-forming suffixes, 185 Adverbial accusative, 90 Adversative conjunctions, 143 Agent, suffixes denoting, 180

Agreement of verb with subject, 96, 97, 98, 99 Alphabet, 193 Alternative conjunctions, 143 Analysis of sentences, form of, 135, 136 Antecedent, defined, 31, 33 Apostrophe s, 13, 14 Apposition of Noun, 88, 90 of Noun-clause, 130 Articles, 22, 23 "As," Relative pronoun, 35 conjunction, 47, 49 "As well as," Rule IX., 99 Assimilation of consonants, 195, 196Augmentative suffixes, 181, 183 Auxiliary verbs, defined, 50, 51 list and description, 75, 76, 77 used as Principal verbs, 77, 78 "Be," conjugated, 59, 60 origin of, 224 prefix, 186 uses of, 76 "Beware," 79 "But," as if a Relative, 35 origin of, 224 preposition, 48 conjunction, 48 adverb, 48 "Can," "could," 78, 79 origin of, 224, 225 Case, of nouns, 13, 14 of pronouns, 13, 14, 29 rules of, 88, 89 Causal verbs, 52, 53 suffixes, 185 prefixes, 185
